EUNA_2024 Actualtest & Valid EUNA_2024 Exam Answers

At the time when people are hesitating about which kind of EUNA_2024 study material to choose, I would like to recommend the training materials of our company for you to complete the task. We have put much money and effort into upgrading the quality of our EUNA_2024 preparation materials. It is based on our brand, if you read the website carefully, you will get a strong impression of our brand and what we stand for. There are so many advantages of our EUNA_2024 Actual Exam, such as free demo available, multiple choices, and practice test available to name but a few.

Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q70-Q75):

NEW QUESTION # 70

An engineer is configuring a two-terminal device, a pressure reducing valve, in a water network. Which inputs are required for this terminal configuration?

- A. Name, direction, terminal definitions (In/Out), default path
- B. Asset group and network category only
- C. Service territory and feature dataset

Answer: A

Explanation:

Two-terminal configurations require name, directionality, terminal details, and default path.

NEW QUESTION # 71

Which attribute rule type should be used if you want an attribute to be automatically populated after a feature is added or updated in ArcGIS Pro?

- A. Constraint rule
- **B. Immediate calculation rule**
- C. Validation rule

Answer: B

Explanation:

Immediate calculation rules run instantly after edits to populate attributes automatically.

NEW QUESTION # 72

If a utility analyst needs to constrain traces in an electric network by electrical phases, what should be added to the utility network?

- A. An asset type representing phases
- **B. A network attribute representing phases**
- C. A network category

Answer: B

Explanation:

A network attribute stores electrical phase information and can be used as a constraint during traces.

NEW QUESTION # 73

Which topology tier type in ArcGIS Utility Network supports looping connectivity between network features?

- A. Partitioned
- B. Radial
- **C. Mesh**

Answer: C

Explanation:

Mesh topology allows loops and multiple flow paths, supporting redundancy.

NEW QUESTION # 74

What is the key difference between a domain network and a structure network in ArcGIS Utility Network?

- **A. Domain networks carry resources, while structure networks provide support**
- B. Domain networks define ranks, while structure networks manage terminal paths
- C. Structure networks enforce connectivity, while domain networks enforce containment

Answer: A

Explanation:

Domain networks model the flow of resources (e.g., water, electricity), while structure networks provide physical support.

NEW QUESTION # 75

.....

In today's competitive industry, only the brightest and most qualified candidates are hired for high-paying positions.
