Axis Network Video Exam Sample Questions (Q62-Q67):

NEW QUESTION # 62

An IP66 rated camera is

- A. Protected against water from only one direction.

- B. Protected against strong jets of water.
- C. Protected against submersion of 1 m (3 ft).
- D. Protected against vertical drops.

Answer: B

Explanation:

"An IP66 rating means the camera is dust-tight and protected against powerful jets of water from any direction, but not against submersion."

NEW QUESTION # 63

Where is the best place to mount a camera with a fixed iris?

- A. Outside, on a pole
- B. Inside, in a room with very strong light sources
- C. Outside, in a shadowed position
- D. Inside, in a room with large windows

Answer: C

Explanation:

A camera with a fixed iris is best mounted outside in a shadowed position. Fixed iris lenses do not adjust to changes in light levels, making them less suitable for environments with varying lighting conditions. By placing the camera in a shadowed position, you minimize the impact of direct sunlight and glare, which can cause overexposure and poor image quality. Therefore, the correct answer is C. For more detailed information, refer to Axis Communications' documentation on camera installation and fixed iris lenses.

NEW QUESTION # 64

Keeping firmware up to date helps a device to

- A. stay as cybersecure as possible.
- B. remain in focus constantly.
- C. stay compatible with the VMS.
- D. maintain its IP-rating.

Answer: A,C

Explanation:

Keeping firmware up to date helps a device stay as cybersecure as possible by addressing vulnerabilities and incorporating security patches. Regular updates ensure that the device is protected against the latest threats.

Additionally, updating firmware helps the device remain compatible with the Video Management System (VMS), ensuring that it can work seamlessly with the latest software features and improvements. References:

NEW QUESTION # 65

Which of the following actions can be taken using the AXIS T8414 Installation Display? (Choose two)

- A. Power up a PoE camera
- B. Reset a camera to factory default values
- C. Make snapshots
- D. Access a camera's home page
- E. Read user documentation for cameras

Answer: A,C

Explanation:

The AXIS T8414 Installation Display is a portable tool used for easy and efficient installation of network cameras. It can power up a PoE (Power over Ethernet) camera, allowing the installer to work without needing an additional power source. Additionally, the display can take snapshots, which helps in verifying the camera's field of view and focus during installation. It does not support accessing a camera's home page, resetting to factory defaults, or reading user documentation directly. For more details, refer to Axis Communications' product manual for the AXIS T8414 Installation Display.

NEW QUESTION # 66

A customer asks for a fixed mini dome with a DC-iris lens, 2.8-10 mm varifocal lens and wide dynamic range. Which of the following cameras is the only choice to fit all of the requirements?

- A. AXIS M3203
- B. AXIS M5014
- C. AXIS Q1604
- **D. AXIS P3301**

Answer: D

Explanation:

The AXIS P3301 is a fixed mini dome camera that features a DC-iris lens, a 2.8-10 mm varifocal lens, and wide dynamic range (WDR). This combination of features makes it the only suitable choice among the listed options to meet the customer's requirements for a fixed mini dome camera with these specific capabilities.

More details can be found in the Axis Communications product specifications and data sheets for the AXIS P3301.
