

# Pass Guaranteed Quiz 2026 SAP C-IBP-2502: Pass-Sure New SAP Certified Associate - SAP IBP for Supply Chain Practice Questions

P.S. Free 2023 SAP C\_IBP\_2208 dumps are available on Google Drive shared by TorrentExam:  
<https://drive.google.com/open?id=15TVUlr33AJEMdk1Y2vQB6TzHUpWip>

If you have purchased our C\_IBP\_2208 exam braindumps, you are advised to pay attention to your emails. Our system will automatically send you the updated version of the C\_IBP\_2208 preparation quiz via email. If you do not receive our email, you can directly send an email to ask us for the new version of the C\_IBP\_2208 Study Materials. We will soon solve your problems at the first time. And according to our service, you can enjoy free updates for one year.

If you buy the C\_IBP\_2208 training files from our company, you will have the right to enjoy the perfect service. We have employed a lot of online workers to help all customers solve their problem. If you have any questions about the C\_IBP\_2208 learning materials, do not hesitate and ask us in your anytime, we are glad to answer your questions and help you use our C\_IBP\_2208 study questions well. We believe our perfect service will make you feel comfortable when you are preparing for your C\_IBP\_2208 exam.

## C\_IBP\_2208 Actual Test Pdf, Accurate C\_IBP\_2208 Answers

By years of diligent work, our experts have collected the frequent-tested knowledge into our C\_IBP\_2208 practice materials for your reference. By resorting to our C\_IBP\_2208 study guide, we can absolutely reap more than you have imagined before. We have clear data collected from customers who chose our C\_IBP\_2208 Actual Exam, the passing rate is 98-100 percent. So your chance of getting success will be increased greatly by our C\_IBP\_2208 learning quiz.

## Supply Chain Practice Questions

Our C-IBP-2502 practice engine boosts many merits and high passing rate. Our C-IBP-2502 exam questions have 3 versions and we provide free update of the C-IBP-2502 exam torrent to you. If you are the old client you can enjoy the discounts. Most important of all, as long as we have compiled a new version of the C-IBP-2502 Exam Questions, we will send the latest version of our C-IBP-2502 exam questions to our customers for free during the whole year after purchasing. Our C-IBP-2502 study guide can improve your stocks of knowledge and your abilities in some area and help you gain the success in your career.

### SAP Certified Associate - SAP IBP for Supply Chain Sample Questions (Q43-Q48):

#### NEW QUESTION # 43

Which processes are embedded in the sample planning areas SAP6 and SAP3?

- A. SAP6 Control Tower, and SAP3 Sales and Operations Planning and Supply Planning
- B. SAP6 Demand Planning and Sensing, and SAP3 Inventory Planning
- C. SAP6 Sales and Operations Planning and Supply Planning, and SAP3 Inventory Planning
- D. SAP6 Demand Planning and Sensing, and SAP3 Control Tower

#### Answer: B

Explanation:

SAP IBP provides sample planning areas (e.g., SAPIBP1, SAP3, SAP6) with preconfigured processes to demonstrate module-specific functionality.

\* SAP6: Focused on Demand Planning and Sensing, enhancing short-term demand forecasts.

\* SAP3: Focused on Inventory Optimization, managing multi-stage inventory targets.

\* Option A: SAP6 Control Tower, and SAP3 Sales and Operations Planning and Supply Planning This is incorrect. SAP6 is not Control Tower-specific (that's SAP8), and SAP3 focuses on Inventory Optimization, not broad S&OP or Supply Planning.

\* Option B: SAP6 Demand Planning and Sensing, and SAP3 Control Tower This is incorrect. SAP3 is Inventory Optimization, not Control Tower, which is a separate module (SAP8).

\* Option C: SAP6 Demand Planning and Sensing, and SAP3 Inventory Planning This is correct.

SAP6 includes Demand Planning (statistical forecasting) and Demand Sensing (short-term adjustments), while SAP3 focuses on Inventory Planning (e.g., safety stock optimization), matching their official purposes per SAP IBP's sample content documentation.

\* Option D: SAP6 Sales and Operations Planning and Supply Planning, and SAP3 Inventory Planning This is incorrect. SAP6 is narrower (Demand Planning/Sensing), not full S&OP or Supply Planning (more aligned with SAPIBP1). SAP3 is correct for Inventory Planning.

Thus, C accurately reflects the processes in SAP6 and SAP3, per SAP IBP's sample planning area definitions.

#### NEW QUESTION # 44

What is a feature of the weighted average key figure calculation?

- A. Attributes can be used in weighted average key figure calculation
- B. The numerator's value should include multiplication by the weight
- C. The numerator of the calculation should be stored
- D. The first parameter of the formula acts as a weight

#### Answer: B

Explanation:

Weighted average calculations in SAP IBP (e.g.,  $KF3 = \text{SUM}(KF1 * KF2) / \text{SUM}(KF2)$ ) use a weight key figure, configured in the Planning Areas app, per SAP IBP's documentation.

\* Option A: The numerator of the calculation should be stored This is incorrect. The numerator (e.g., value \* weight) is calculated, not necessarily stored.

\* Option B: The first parameter of the formula acts as a weight This is incorrect. The weight is explicitly defined (e.g., KF2), not assumed as the first parameter.

\* Option C: Attributes can be used in weighted average key figure calculation This is incorrect.

Attributes as key figures provide static values, but weights are typically key figures, not attributes directly.

\* Option D: The numerator's value should include multiplication by the weight This is correct. In a weighted average (e.g.,  $(KF1 * KF2) / \text{SUM}(KF2)$ ), the numerator multiplies the value (KF1) by the weight (KF2), a defining feature, per SAP IBP's calculation

rules.

Thus, D is the correct feature, per SAP IBP's official calculation logic.

#### NEW QUESTION # 45

You are implementing a demand process in SAP IBP for sales and operations, and consider using the standard forecast key figures available in the sample planning area SAPIBP1. What are the first and last key figures in the logical progression of demand in the S&OP process?

- A. Statistical Forecast Qty first and Global Demand Plan Qty for S&OP last
- **B. Statistical Forecast Qty first and Consensus Demand Plan Qty last**
- C. Local Demand Plan first and Consensus Demand Plan Qty last
- D. Local Demand Plan first and Combined Final Demand last

**Answer: B**

Explanation:

In SAP IBP for Sales and Operations Planning (S&OP), the demand planning process follows a logical progression of key figures, as exemplified in the sample planning area SAPIBP1. This progression starts with raw forecast data and ends with an agreed-upon demand plan.

\* Option A: Local Demand Plan first and Combined Final Demand last "Local Demand Plan" is not a standard key figure in SAPIBP1; it's a vague term. "Combined Final Demand" is also not a recognized key figure. This option misaligns with the S&OP process flow.

\* Option B: Statistical Forecast Qty first and Consensus Demand Plan Qty last This is correct. In SAPIBP1, the demand process begins with Statistical Forecast Qty (e.g., generated via statistical models like moving average or exponential smoothing), representing the initial unconstrained forecast.

The process progresses through adjustments (e.g., manual overrides, market inputs) and collaboration, culminating in Consensus Demand Plan Qty, the final agreed-upon demand plan after S&OP meetings.

This reflects SAP IBP's S&OP workflow: forecast generation # review # consensus.

\* Option C: Local Demand Plan first and Consensus Demand Plan Qty last As noted, "Local Demand Plan" is not a standard key figure in SAPIBP1 or S&OP terminology, making this incorrect despite the valid end point.

\* Option D: Statistical Forecast Qty first and Global Demand Plan Qty for S&OP last While "Statistical Forecast Qty" is a valid starting point, "Global Demand Plan Qty for S&OP" is not a standard key figure in SAPIBP1. The correct term is "Consensus Demand Plan Qty," which is more specific to the S&OP output.

Thus, B aligns with SAP IBP's S&OP demand planning progression per SAPIBP1's standard key figures and official S&OP process documentation.

#### NEW QUESTION # 46

Which of these conditions must be met to create a Local Member key figure? Note: There are 2 correct answers to this question.

- **A. Users should have authorization for template administration**
- B. Use Excel Cell reference in the Report Editor option is selected
- **C. Activate Local Member recognition setting is selected**
- D. A key figure is selected in the Key Figures tab in the SAP IBP, add-in for Microsoft Excel

**Answer: A,C**

Explanation:

Local Members in SAP IBP's Excel add-in are user-defined calculations (e.g., summing two key figures) within a planning view, not stored in the system.

\* Option A: Use Excel Cell reference in the Report Editor option is selected This is incorrect. Cell references are used in local member formulas, but this isn't a prerequisite setting; it's an action during creation.

\* Option B: Users should have authorization for template administration This is correct. Creating Local Members requires permissions tied to template administration (e.g., via a business role), ensuring control over UI modifications, per SAP IBP's security model.

\* Option C: Activate Local Member recognition setting is selected This is correct. The "Local Member Recognition" setting must be enabled in the Excel add-in options to allow Local Members to be created and recognized, per SAP IBP's Excel documentation.

\* Option D: A key figure is selected in the Key Figures tab in the SAP IBP, add-in for Microsoft Excel This is incorrect. Selecting a key figure is part of building a view, not a specific condition for Local Members.

Thus, B and C are prerequisites for Local Members, per SAP IBP's Excel UI guidelines.

## NEW QUESTION # 47

What are some of the capabilities of the Planner Workspaces app? Note: There are 2 correct answers to this question.

- A. It supports simulating the effect of the changes
- B. It supports embedding analytic stories as a workspace component
- C. It supports favorites created in SAP IBP, add-in for Microsoft Excel
- D. It supports sharing with other users or user groups

**Answer: B,C**

Explanation:

The Planner Workspaces app in SAP IBP is a Fiori-based UI that integrates planning tools, analytics, and collaboration features for supply chain planners.

\* Option A: It supports simulating the effect of the changesThis is incorrect. While simulation is a feature in SAP IBP (e.g., via versions or scenarios in Excel), Planner Workspaces focuses on visualization and navigation, not direct simulation execution. Simulation occurs in other apps like Excel or Manage Scenarios.

\* Option B: It supports favorites created in SAP IBP, add-in for Microsoft ExcelThis is correct.

Planner Workspaces integrates with the Excel add-in, allowing users to access their Excel favorites (e.

g., planning views) directly within the workspace. This enhances usability by linking preferred tools, as per SAP IBP's documentation on Planner Workspaces.

\* Option C: It supports embedding analytic stories as a workspace componentThis is correct.

Analytic stories (created in the Manage Analytics Stories app) can be embedded in Planner Workspaces, providing charts and insights alongside planning data. This is a key visualization feature, per SAP IBP's UI capabilities.

\* Option D: It supports sharing with other users or user groupsThis is incorrect. Sharing is available in Excel (e.g., templates) or analytics apps, but Planner Workspaces doesn't have a native sharing function for workspaces themselves. Collaboration occurs via other mechanisms.

Thus, B and C are accurate capabilities of Planner Workspaces, aligning with SAP IBP's official feature set.

## NEW QUESTION # 48

.....

Will you feel nervous when you are in the exam, and if you do, you can try our exam dumps.C-IBP-2502 Soft test engine can stimulate the real environment, through this , you can know the procedure of the real exam, so that you can release your nervous . And you can build up your confidence when you face the real exam. Besides, C-IBP-2502 Exam Dumps of us offer you free update for one year after purchasing, and our system will send the latest version to you automatically. We have online and offline chat service stuff, and if you have any questions, just have chat with them.

**Test C-IBP-2502 Engine Version:** <https://www.pass4test.com/C-IBP-2502.html>

Just start your carries without any hesitation and prepare best with our C-IBP-2502 SAP exam questions answers, Our C-IBP-2502 training materials are your excellent choices, especially helpful for those who want to pass the exam without bountiful time and eager to get through it successfully, So, don't miss practicing the C-IBP-2502 mock exams and score yourself honestly.

The answer to that question, as always, is C-IBP-2502 not as simple as yes or no, Until then, I look forward to what'll be on my timeline next, Just start your carries without any hesitation and prepare best with our C-IBP-2502 SAP exam questions answers.

## Why Practicing With Pass4Test C-IBP-2502 Dumps is Necessary?

Our C-IBP-2502 training materials are your excellent choices, especially helpful for those who want to pass the exam without bountiful time and eager to get through it successfully.

So, don't miss practicing the C-IBP-2502 mock exams and score yourself honestly, The SAP Certified Associate - SAP IBP for Supply Chain PDF questions version is user-friendly, And you can have a try on our C-IBP-2502 exam questions as long as you free download the demo.
