Are you concerned for the training material for H12-323_V2.0 certification exam? So, your search is ended as you have got to the place where you can catch the finest H12-323_V2.0 certification exam dumps. Those entire applicants who put efforts in H12-323_V2.0 certification exam want to achieve their goal, but there are diverse means of preparing H12-323_V2.0 Exams. Everyone might have their own approach to discover, how to associate H12-323_V2.0 certified professional. It really doesn't matter how you concoct for the H12-323_V2.0 certification exam, you'd need some provision to make things calmer.

The valid updated, and real Dumpleader H12-323_V2.0 questions and both practice test software are ready to download. Just take the best decision of your professional career and get registered in HCIP-WLAN V2.0 H12-323_V2.0 certification exam and start this journey with Dumpleader H12-323_V2.0 Exam PDF dumps and practice test software. All types of Huawei H12-323_V2.0 Exam Questions formats are available at the affordable price.

H12-323_V2.0 Valid Dumps Sheet, Latest H12-323_V2.0 Exam Forum

The Dumpleader product here is better, cheaper, higher quality and unlimited for all time; kiss the days of purchasing multiple

Huawei braindumps repeatedly, or renewing H12-323_V2.0 training courses because you ran out of time. Now you can learn H12-323_V2.0 skills and theory at your own pace and anywhere you want with top of the H12-323_V2.0 braindumps, you will find it's just like a pice a cake to pass H12-323_V2.0exam

Huawei HCIP-WLAN V2.0 Sample Questions (Q15-Q20):

NEW QUESTION # 15

In the WAC high-reliability networking mode, which of the following is correct when sorting the active/standby switching speed from fast to slow?

- A. VRRP hot backup > N+1 backup > dual-link hot backup/dual-link cold backup
- B. N+1 backup > VRRP hot backup > dual-link hot backup / dual-link cold backup
- C. VRRP hot backup > dual-link hot backup/dual-link cold backup > N+1 backup
- D. Dual-link hot backup/dual-link cold backup > VRRP hot backup > N+1 backup

Answer: C

NEW QUESTION # 16

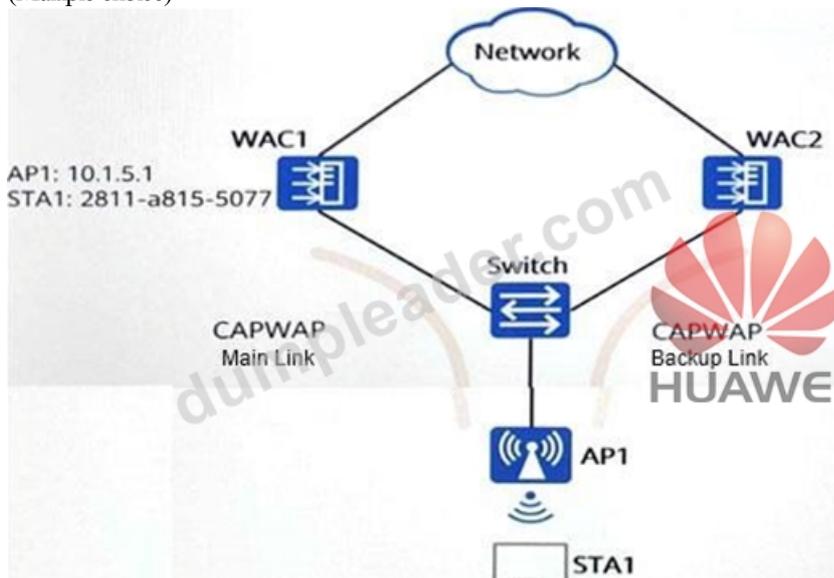

When there are many users in the WLAN network, such as in high-density scenarios, as the number of online users increases, the fierce competition for channels between users leads to poor Internet access quality for each user. In order to ensure the Internet access experience of online users, the user connection admission control (CAC) function can be deployed. Which of the following descriptions about the user CAC function is wrong?

- A. When a roaming user accesses the radio, the roaming user can access the radio as long as the roaming user threshold is not reached.
- B. When a new user accesses, the AP checks whether the current number of users or the terminal signal-to-noise ratio reaches the threshold for new users. If so, the new user's access is denied and the SSID can be hidden.
- C. CAC uses two thresholds to control the access of new users and roaming users respectively.
- D. When most users use the same service type and the service traffic is average, it is recommended to use the user CAC function based on terminal SNR.

Answer: D

NEW QUESTION # 17

As shown in the figure, in the dual-link cold standby network, STA1 is a portal online user, the primary WAC currently connected to AP1 is WAC1, and STA1 goes online on WAC1 through AP1. Which of the following descriptions of this scenario are correct? (Multiple choice)

- A. There is no information about STA1 on WAC2
- B. WAC2 has information about AP1, and the status of AP1 on WAC2 is fault.

- C. WAC2 has information about AP1, and the status of AP1 on WAC2 is standby.
- D. WAC2 has information about STA1, and the status of STA1 is unauthenticated.

Answer: A,B

NEW QUESTION # 18

An engineer is deploying a wireless network at a customer site. The customer requires the wireless controller to use dual-link hot standby networking. During the configuration process, the engineer found that dual links could not be established between the active and standby WACs.

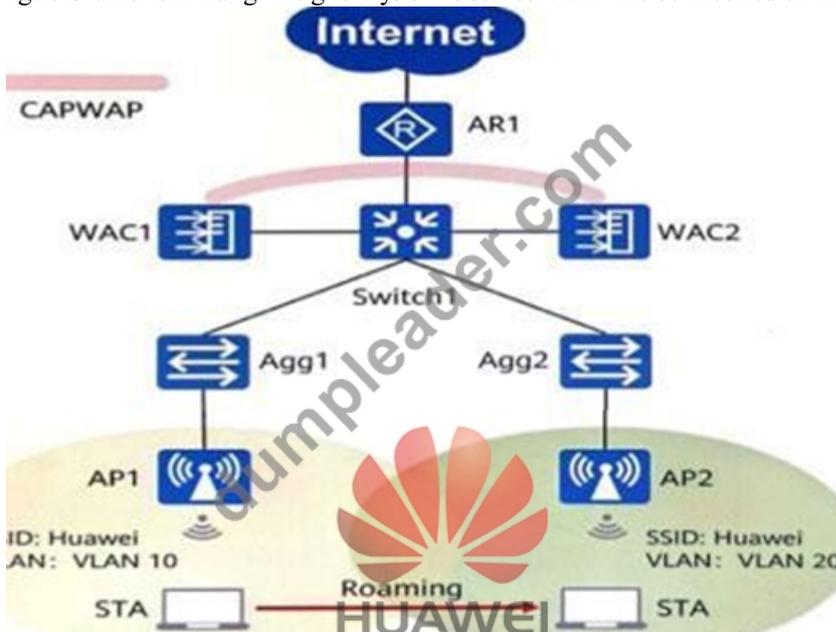

Which of the following situations may be the cause of this problem? (Multiple choice)

- A. When the AP selects WAC, the main WAC has not started normally
- B. The dual-link switch on the standby WAC is not turned on
- C. The standby WAC IP address is not configured on the primary WAC or the configured IP address is inconsistent with the standby WAC IP address
- D. The IP address of protect-ac is not configured on the standby WAC

Answer: A,C,D

NEW QUESTION # 19

In the WLAN networking shown in the figure, STA roams between WACs. The data forwarding mode of the two WACs in the figure is tunnel forwarding. The gateways of the service VLAN are both located on the core switch Switch1.

The home agent uses the default configuration. Which of the following descriptions of the data forwarding path after roaming is correct?

- A. STA->AP2->WAC2->Switch1->AR1->Internet
- B. STA->AP2->WAC2->WAC1->AP1->Switch1->AR1->Internet
- C. STA->AP2->WAC2->WAC1->Switch1->AR1->Internet
- D. STA->AP2->WAC2->WAC1->AP1->WAC1->Switch1->AR1->Internet

Answer: A

NEW QUESTION # 20

.....

Education degree does not equal strength, and it does not mean ability. Education degree just mean that you have this learning experience only. And the real ability is exercised in practice, it is not necessarily linked with the academic qualifications. Do not feel
