Many students often start to study as the exam is approaching. Time is very valuable to these students, and for them, one extra hour of study may mean 3 points more on the test score. If you are one of these students, then CRT-211 exam tests are your best choice. Because students often purchase materials from the Internet, there is a problem that they need transport time, especially for those students who live in remote areas. When the materials arrive, they may just have a little time to read them before the exam. However, with CRT-211 Exam Questions, you will never encounter such problems, because our materials are distributed to customers through emails. After you have successfully paid, you can immediately receive CRT-211 test guide from our customer service staff, and then you can start learning immediately.

Salesforce CRT-211 (Certification Preparation for Advanced Administrator) is a widely recognized certification program designed for professionals who seek to demonstrate their expertise in advanced Salesforce administration. Certification Preparation for Advanced Administrator certification exam is designed to test the skills and knowledge required to manage and administer complex Salesforce environments. CRT-211 Exam is intended for experienced Salesforce administrators who want to advance their career and demonstrate their mastery of Salesforce administration.

The Salesforce CRT-211 Exam covers a wide range of topics, including advanced security and access control, data management, automation, and reporting. It also includes questions on advanced topics such as Lightning Experience, Einstein Analytics, and Salesforce Connect.

Salesforce Certification Preparation for Advanced Administrator Sample Questions (Q135-Q140):

NEW QUESTION # 135

Applicant should be associated to interviewee. What relationship will allow you to create a report on number of applicants per interviewee. Choose 2

- A. Self Relationship
- B. Hierarchical Relationship
- C. Master Detail
- D. Lookup Relationship

Answer: C,D

NEW QUESTION # 136

Universal Containers uses Enterprise Territory Management to manage its sales territories. The sales managers want to see who the account is manually shared outside of territory rules. How can the system administrator meet this requirement? * (1 Point)

- A. Add the "Assigned Territories" related list to the sales page layout
- B. Add the "Users in Assigned Territories" related list to the sales page layout
- C. Add "Assign Territories" permission to the sales manager's profile
- D. Add "Manage Territories" permission to the sales manager's profile

Answer: B

NEW QUESTION # 137

At Ursa Major Solar, several different planetary teams handle leads depending on which planet the lead is coming from. While most of the teams only need a few fields filled out to work the lead, the Jupiter team requires additional information to be filled out, such as which moon the lead is coming from. The administrator needs to automate which team is allocated the lead record based on the planet and ensure that every team has all of the information they need.

Which two features will satisfy these requirements?

Choose 2 answers

- A. Assignment Rules
- B. Matching Rules
- C. Workflow Rules
- D. Validation Rules

Answer: A,D

Explanation:

Assignment rules and validation rules are two features that can satisfy these requirements:

* Assignment rules are used to automatically assign leads or cases to users or queues based on certain criteria. In this case, an assignment rule can be used to assign leads to different planetary teams depending on which planet the lead is coming from

* Validation rules are used to validate the data entered by users and prevent records from being saved if they do not meet certain criteria. In this case, a validation rule can be used to ensure that every team has all of the information they need by making certain fields required or dependent on other fields.

The other two options are incorrect because:

* Matching rules are used to identify duplicate records based on certain fields or fuzzy logic. They do not assign records or validate data.

* Workflow rules are used to automate tasks or actions based on certain criteria. They do not assign records or validate data.

NEW QUESTION # 138

Sales management wants a small subset of users with different profiles and roles to be able to view all data for compliance purposes. How can an administrator meet this requirement?

- A. Enable the View All Data permission for the roles of the subset of users
- **B. Create a permission set with the View All Data permission for the subset of users**
- C. Assign delegated administration to the subset of users to View All Data
- D. Create a new profile and role for the subset of users with the View All Data permission

Answer: B

NEW QUESTION # 139

The administrator at Cloud Kicks (CK) is troubleshooting why users are missing expected email alerts from an automated process. The investigation shows that CK is hitting its daily limit.

What should the administrator review to resolve the issue?

- A. Outbound Messages
- B. HTML Email Status Report
- C. Notification Delivery Settings
- **D. Email Logs**

Answer: D

Explanation:

Email logs provide information about email delivery, such as the sender, recipient, date and time, delivery status, and any error messages. The administrator can use email logs to troubleshoot why users are missing expected email alerts and identify which emails are hitting the daily limit.
