CompTIA Tech+ Certification Exam Sample Questions (Q121-Q126):

NEW QUESTION # 121

A user has concerns about device theft because they are working on a laptop at a local coffee shop. Which of the following physical devices would be best to protect the laptop?

- A. Privacy shield
- **B. Cable lock**
- C. Firewall
- D. USB lock

Answer: B

Explanation:

A cable lock (also called a Kensington lock) physically secures the laptop to a fixed object, making it difficult to steal in public spaces.

"Cable locks are physical security devices used to deter laptop theft by anchoring the device to a desk or other stationary object." - CompTIA ITF+ Official Guide A . Firewall is software-based and protects data, not the device.

B . Privacy shields prevent screen visibility, not theft.

C . USB locks prevent port access but not physical theft.

Correct answer: D

NEW QUESTION # 122

Which of the following is used to determine whether users accessed inappropriate online content?

- A. System logs
- B. Location tracking
- C. Cookie data
- **D. Web browser history**

Answer: D

Explanation:

The web browser history stores records of websites that a user has visited. This is typically the most straightforward and accessible method for determining whether users accessed inappropriate or unauthorized online content. The CompTIA ITF+ documentation explains:

"Web browsers maintain a history of visited URLs, which can be used for monitoring and auditing user activity, including detecting policy violations regarding internet usage." System logs are broader and generally capture system or security events.

Cookies store session and tracking data but don't always show what content was accessed.

Location tracking helps with geolocation, not content monitoring.

Therefore, the correct choice is D.

NEW QUESTION # 123

Which of the following represents the largest unit of storage?

- A. 200MB
- B. 2,000KB
- **C. 2,000GB**
- D. 20TB

Answer: C

Explanation:

The units rank as follows from largest to smallest:

*1 TB = 1,000 GB,

*20 TB = 20,000 GB,
*2,000 GB is smaller than 20 TB
*200 MB and 2,000 KB are much smaller units.

NEW QUESTION # 124

Which of the following is the number of bits in a byte of data?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

A byte consists of exactly 8 bits. Bits (binary digits) are the smallest unit of data, and eight of them grouped together form one byte, which is used to represent characters and numbers in digital systems.

"A byte is made up of 8 bits and is the standard unit of data used to represent information such as characters in computing." - CompTIA ITF+ Fundamentals Correct answer: C

NEW QUESTION # 125

Which of the following internet services traditionally has the most challenges with latency?

- A. DSL
- B. Cable
- C. Satellite
- D. Fiber

Answer: C

Explanation:

Satellite internet traditionally has the most latency because data must travel to and from satellites orbiting the Earth, introducing significant delay.

DSL, fiber, and cable are ground-based and generally have much lower latency.
