Citrix Latest 1Y0-205 Questions: Citrix Virtual Apps and Desktops Administration - ActualVCE Authoritative Provider

In order to meet the demands of all the customers, we can promise that we will provide all customers with three different versions of

the 1Y0-205 study materials: PDF version, Soft version and APP version. In addition, we can make sure that we are going to offer high quality 1Y0-205 practice study materials with reasonable prices but various benefits for all customers. It is our sincere hope to help you pass 1Y0-205 exam by the help of our 1Y0-205 certification guide. Just come and buy our 1Y0-205 learning prep!

Citrix Virtual Apps and Desktops Administration Sample Questions (Q17-Q22):

NEW QUESTION # 17

Scenario: A StoreFront store supports 150 users who have full access to all enterprise resources.

A Citrix Administrator needs to create a new StoreFront store for contractors who will work onsite for two months. The contractors need access to specific resources but will NOT be Active Directory users.

Which option should the administrator select while creating the store for contractors?

- A. Smart card
- B. HTTP Basic
- C. Pass-through
- D. Unauthenticated

Answer: D

NEW QUESTION # 18

A user complains to a Citrix Administrator that application load time is long when they log on at the beginning of the work day.

Which feature can the administrator enable to reduce the perceived start time of the user's application?

- A. Application Lingering
- B. Application Limits
- C. Application Keyword
- D. Application Prelaunch

Answer: D

Explanation:

Application Prelaunch starts an application session in the background before the user explicitly launches it. This reduces perceived application load time, especially at the beginning of the work day, by keeping sessions ready for faster access.

NEW QUESTION # 19

A Citrix Administrator is concerned about the TCP overhead associated with Citrix HDX connections. There are concerns about latency and TCP overhead associated with setting up a connection to Virtual Delivery Agent (VDA) resources. What technology should be deployed to move connections to UDP and improve the quality of the user experience?

- A. Microsoft Teams Optimization
- B. HDX Adaptive Transport
- C. Browser Content Redirection
- D. Citrix Optimizer

Answer: B

Explanation:

HDX Adaptive Transport uses Citrix's Enlightened Data Transport (EDT) protocol, which runs over UDP instead of TCP. This reduces latency, minimizes TCP overhead, and improves the quality and responsiveness of HDX sessions, especially in high-latency or lossy network conditions.

NEW QUESTION # 20

Scenario: A Citrix Administrator previously configured a Citrix Virtual Desktops Site to use evaluation licenses. The administrator then installed valid advanced licenses on the Citrix License Server and confirmed that licenses show correctly in the licensing console. However, a user reports an issue about logging on to the published desktop. The user receives an error message stating that the evaluation license is about to expire. What should the administrator do to fix this issue?

- A. Change the product edition in Citrix Studio.
- B. Remove the evaluation license.
- C. Restart the License service.
- D. Verify the host name entry in the license file.

Answer: A

Explanation:

After installing valid licenses on the License Server, the Site must be configured in Citrix Studio to use the correct product edition (for example, Advanced, Enterprise, or Premium). If it remains set to "evaluation," users will continue to see the expiration warning. Updating the product edition in Studio resolves the issue.

NEW QUESTION # 21

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a large number of Windows users running various locally attached client printers. No network printers are being used. The administrator has enabled the HDX printer mapping policy to 'Auto-create all client printers', which has resulted in a large number of drivers being loaded onto the Virtual Delivery Agent (VDA) machines. New standards are requiring the administrator to limit these Windows drivers on the VDA machines. Which printing feature can the administrator enable to meet the new standards?

- A. The Citrix Universal Printer Driver
- B. The Auto-create PDF universal printer policy
- C. The Citrix Universal Print Server
- D. The Auto-create local (non-network) client printers only policy

Answer: A

Explanation:

Enabling the Citrix Universal Printer Driver allows client printers to be auto-created without requiring individual printer drivers to be installed on the VDA machines. This standardizes printing, reduces driver sprawl, and meets compliance requirements by minimizing the number of Windows drivers on the VDAs.

NEW QUESTION # 22

.....

With high pass rate of 99% to 100% of our 1Y0-205 training guide, obviously such positive pass rate will establish your confidence as well as strengthen your will to pass your exam. No other vendors can challenge our data in this market. At the same time, by studying with our 1Y0-205 practice materials, you avoid wasting your precious time on randomly looking for the key point information, and being upset about the accuracy when you compare with the information with the exam content. Our 1Y0-205 Training Materials provide a smooth road for you to success.
