弊社のPassTestは専門的、高品質のVMwareの2V0-13.25問題集を提供するサイトです。VMwareの2V0-13.25問題集は専門化のチームが改革とともに、開発される最新版のことです。VMwareの2V0-13.25問題集には、詳細かつ理解しやすい解説があります。このように、お客様は我々の2V0-13.25問題集を手に入れて勉強したら、試験に合格できるかの心配することはありません。

VMware 2V0-13.25 認定試験の出題範囲:

トピック	出題範囲

トピック 1	<ul style="list-style-type: none"> • Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.
トピック 2	<ul style="list-style-type: none"> • Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.
トピック 3	<ul style="list-style-type: none"> • Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.
トピック 4	<ul style="list-style-type: none"> • VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.
トピック 5	<ul style="list-style-type: none"> • IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.

最高-最新の2V0-13.25技術試験試験-試験の準備方法2V0-13.25合格受験記

当社VMwareは、2V0-13.25試験問題を編集するために、この分野で多くの主要な専門家を採用しています。当社のチームベースの作業システムは、次世代の最高の2V0-13.25試験トレントがPassTest最終的に形を成し遂げる精神と手を携える人材を最大限に引き出すように設計されています。当社は、優れたアフターサービスを提供し、ガイドの急流に革新をもたらした実績があります。当社の専門家がお客様に世界クラスの2V0-13.25のVMware Cloud Foundation 9.0 Architectガイドトレントを作成できるため、お客様の成功が保証されます。2V0-13.25試験に合格する必要があります。

VMware Cloud Foundation 9.0 Architect 認定 2V0-13.25 試験問題 (Q52-Q57):

質問 # 52

An organization is evacuating their current datacenter and moving all workloads to a new datacenter.

The organization has a total of 800 workloads to move, and the migration must be completed with no downtime within a planned change window that is scheduled to occur in four weeks.

What migration method will meet the requirements?

- A. HCX OS Assisted Migration
- B. Cross vCenter vMotion

- C. HCX Replication Assisted vMotion
- D. HCX Bulk Migration

正解: C

解説:

The requirements specify:

- * Large-scale migration (800 workloads).
- * No downtime.
- * Strict change window (4 weeks).

HCX Replication Assisted vMotion (RAV) is the only method that combines large-scale migration efficiency with zero downtime:

- * Workloads are replicated in advance.
- * During the cutover, vMotion-like switchover completes with no outage.

Other methods:

- * Cross vCenter vMotion works for live moves but is not efficient for hundreds of VMs within a short timeline.
- * HCX OS Assisted Migration is for physical-to-virtual or non-vSphere workloads (not applicable).
- * HCX Bulk Migration is efficient but introduces downtime during cutover.

Thus, HCX RAV best meets the no-downtime, large-scale requirement.

質問 # 53

What is the key consideration when selecting Broadcom hardware for a VMware environment requiring low-latency networking?

- A. Broadcom 10GbE Ethernet Adapter
- B. Broadcom RAID Controller
- C. Broadcom 25GbE Ethernet Adapter
- D. Broadcom NVMe SSD

正解: C

解説:

The Broadcom 25GbE Ethernet Adapter is critical for achieving low-latency networking in a VMware environment.

質問 # 54

Which Broadcom solutions are critical for designing an efficient VMware data center?

- A. vSAN
- B. Broadcom 25GbE Ethernet Adapter
- C. vSphere HA
- D. Broadcom NVMe SSD

正解: A、B、D

解説:

Broadcom 25GbE Ethernet Adapters, vSAN, and NVMe SSDs are critical for designing an efficient VMware data center.

質問 # 55

Which storage standard enables advanced features like deduplication and compression in vSphere?

- A. NFS
- B. VMFS
- C. iSCSI
- D. vSAN

正解: D

解説:

vSAN enables deduplication and compression in software-defined storage.
