## Exam CompTIA 220-1201 Simulator Free - 220-1201 Passing Score

We try to meet different requirements by setting different versions of our 220-1201 question dumps. The first one is online 220-1201 engine version. As an online tool, it is convenient and easy to study, supports all Web Browsers and system including Windows, Mac, Android, iOS and so on. You can practice online anytime and check your test history and performance review, which will help to your study. The second is 220-1201 Desktop Test Engine. As an installable 220-1201 software application, it simulated the real 220-1201 exam environment, and builds 200-125 exam confidence. The third one is Practice PDF version. PDF Version is easy to read and print. So you can study anywhere, anytime.

## CompTIA A+ Certification Exam: Core 1 Sample Questions (Q228-Q233):

### NEW QUESTION # 228

A technician replaces a laptop's failed motherboard. During validation testing, the wireless is slow and shows a weak signal. Which of the following should the technician do first to verify the source of the issue?

- A. Install a new wireless adapter

- B. Restart the access point
- **C. Reseat antenna connections**
- D. Contact the manufacturer

**Answer: C**

Explanation:

Comprehensive and Detailed

Laptop Wi-Fi antennas run through the display bezel and connect via small coaxial clips. After motherboard replacement, these are often not fully seated, causing weak or unstable Wi-Fi.

CompTIA Concepts:

Laptop hardware troubleshooting

Antenna connector checks after repair

WLAN performance issues caused by antenna misalignment

**NEW QUESTION # 229**

A multifunction printer in a small office recently had issues with scan-to-email functionality. The manufacturer has an update ready to fix the printer issues. Which of the following would a technician most likely deploy to remediate the issue?

- **A. Firmware**
- B. OS update
- C. HSM
- D. Driver

**Answer: A**

Explanation:

Firmware is the embedded software on a device such as a printer. Manufacturers often release firmware updates to resolve hardware-specific functionality issues, such as scan-to-email or security vulnerabilities.

From CompTIA A+ 220-1101 Official Study Guide, Objective 3.4 - Printer installation and maintenance:

"Firmware updates provide bug fixes and add new features for multifunction printers. Apply firmware updates to resolve device-specific issues." Verified Source:

CompTIA A+ Core 1 (220-1101) Official Study Guide, Chapter 3: Printer Maintenance CompTIA Exam Objectives 220-1101, Domain 3.4

**NEW QUESTION # 230**

A developer wants to ensure their critical data is protected from hard drive failure. Their workstation has two hard drives. Which RAID level should they use?

- **A. RAID 1**
- B. RAID 10
- C. RAID 0
- D. RAID 5

**Answer: A**

Explanation:

RAID 1 is known as mirroring. It duplicates all data to both drives simultaneously, providing redundancy in the event of a single drive failure. CompTIA A+ teaches that RAID 1 is ideal when reliability is the priority and only two drives are available exactly matching this scenario.

RAID 0 offers no redundancy. RAID 5 requires three or more drives. RAID 10 requires four or more drives.

Since the workstation has only two drives, RAID 1 is the only RAID configuration providing data protection and is heavily featured in CompTIA's coverage of RAID technologies, their requirements, and their purposes in fault tolerance.

**NEW QUESTION # 231**

Which of the following types of RAM would most likely be used in a server?

- A. DDR3

- B. ECC
- C. Unbuffered
- D. SODIMM

**Answer: B**

Explanation:

ECC (Error-Correcting Code) RAM is commonly used in servers because it can detect and correct memory errors, providing greater stability and reliability for mission-critical environments.

From CompTIA A+ 220-1101 Official Study Guide, Objective 3.2 - Types of RAM:

"Servers often require ECC memory, which can detect and correct single-bit errors, preventing data corruption and increasing system reliability." Verified Source:

CompTIA A+ Core 1 (220-1101) Official Study Guide, Chapter 3: Memory Technologies CompTIA Exam Objectives 220-1101, Domain 3.2

**NEW QUESTION # 232**

**SIMULATION**

Laura, a customer, has instructed you to configure her home office wireless access point.

She plans to use the wireless network for finances and has requested that the network be setup with the highest encryption possible. Additionally, Laura knows that her neighbors have wireless networks and wants to ensure that her network is not being interfered with by the other networks.

She requests that the default settings be changed to the following.

Wireless Name: HomeWiFi

Shared Key: CompTIA

Router Password: Secure\$1

Finally, Laura wants to ensure that only her laptop and Smartphone can connect to the network.

Laptop: IP Address 192.168.1.100

Hardware Address: 00:0A:BF:03:C4:54

Smartphone: IP Address 192.168.1.101

Hardware Address: 09:2C:D0:22:3F:11

**INSTRUCTIONS**

Configure Laura's wireless network using the network adapter window.

If at any time you would like to bring back the initial state of the situation, please click the Reset All button.
