2026 Licensure Examination for Teachers Reviewer

Professional Education

General Instructions:

Read each question carefully. Choose the letter of the best answer.

Write only the letter of your answer on your answer sheet.

Do not write anything on this reviewer.

Directions: Read each item carefully. Choose the letter of the best answer.

1. A public school teacher is assigned to teach six class periods daily and is also asked to stay two more hours for lesson preparation and other school-related tasks. Under R.A. 4670, which statement best reflects the teacher's required "hours of work"?

 - a. The teacher's workday ends after six class periods; the school cannot require any additional tasks.
 - b. The teacher must render six hours of actual classroom teaching, with the remaining time for other assigned duties.
 - c. The teacher is required to teach eight hours straight as long as tasks are school-related.
 - d. The teacher may choose whether to do preparation work at home, so no school hours are required beyond teaching.

2. A principal assigns a teacher to teach seven hours of actual classroom instruction for two weeks due to a temporary teacher shortage. Under R.A. 4670, what is the teacher MOST entitled to receive for the extra teaching beyond the standard load?

 - a. A promotion credit because the teacher served beyond the normal schedule.
 - b. A service credit that automatically converts to salary regardless of circumstances.
 - c. A compensatory time-off that replaces any monetary compensation.
 - d. Additional compensation for overload teaching as provided by policy.

Test PCEP-30-02 Sample Questions & PCEP-30-02 Reliable Exam Book

Generally speaking, a satisfactory practice material should include the following traits. High quality and accuracy rate with reliable services from beginning to end. As the most professional group to compile the content according to the newest information, our PCEP-30-02 practice materials contain them all, and in order to generate a concrete transaction between us we take pleasure in making you a detailed introduction of our PCEP-30-02 practice materials. We would like to take this opportunity and offer you a best PCEP-30-02 practice material as our strongest items as follows.

Python Institute PCEP - Certified Entry-Level Python Programmer Sample Questions (Q20-Q25):

NEW QUESTION # 20

What is the expected output of the following code?

□

- A. The code raises an unhandled exception.
- **B. 0**
- C. 1

- D. ('Ampere*', '2021', 'False')

Answer: B

NEW QUESTION # 21

A set of rules which defines the ways in which words can be coupled in sentences is called:

- A. lexis
- B. syntax
- C. semantics
- D. dictionary

Answer: B

Explanation:

Syntax is the branch of linguistics that studies the structure and rules of sentences in natural languages. Lexis is the vocabulary of a language. Semantics is the study of meaning in language. A dictionary is a collection of words and their definitions, synonyms, pronunciations, etc.

NEW QUESTION # 22

What is true about exceptions in Python? (Select two answers.)

- A. Not more than one except branch can be executed inside one try-except block.
- B. According to Python terminology, exceptions are thrown
- C. According to Python terminology, exceptions are raised
- D. Python's philosophy encourages developers to make all possible efforts to protect the program from the occurrence of an exception.

Answer: A,C

NEW QUESTION # 23

Arrange the code boxes in the correct positions in order to obtain a loop which executes its body with the counter variable going through values 1, 3, and 5 (in the same order)

□

Answer:

Explanation:

```
for counter in range(1, 7, 2):
```

Explanation:

```
* for
* counter
* in
* range
* (
* 1
* ,
* 7
* ,
* 2
* )
```

Arrange the code boxes in this order:

This will loop counter through: 1 # 3 # 5

NEW QUESTION # 24

What is the expected output of the following code?

□

- A. The code produces no output.
- **B. * ***
- C. * * *
- D. *

Answer: B

Explanation:

Explanation

The code snippet that you have sent is a conditional statement that checks if a variable "counter" is less than 0, greater than or equal to 42, or neither. The code is as follows:

```
if counter < 0: print("") elif counter >= 42: print("") else: print("")
```

The code starts with checking if the value of "counter" is less than 0. If yes, it prints a single asterisk () to the screen and exits the statement. If no, it checks if the value of "counter" is greater than or equal to 42. If yes, it prints three asterisks () to the screen and exits the statement. If no, it prints two asterisks () to the screen and exits the statement.

The expected output of the code depends on the value of "counter". If the value of "counter" is 10, as shown in the image, the code will print two asterisks (**) to the screen, because 10 is neither less than 0 nor greater than or equal to 42. Therefore, the correct answer is C. * *

NEW QUESTION # 25

.....

What is the selling point of a product? It is the core competitiveness of this product that is ahead of other similar brands. The core competitiveness of the PCEP-30-02 study materials, as users can see, we have a strong team of experts, the PCEP-30-02 study materials are advancing with the times, updated in real time, so that's why we can with such a large share in the market. Through user feedback recommendations, we've come to the conclusion that the PCEP-30-02 Study Materials have a small problem at present, in the rest of the company development plan, we will continue to strengthen our service awareness, let users more satisfied with our PCEP-30-02 study materials, we hope to keep long-term with customers, rather than a short high sale.
