

# New AIGP Exam Review | AIGP Reliable Exam Prep

DOWNLOAD the newest ActualTorrent AIGP PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1u0RaFzZ1IRQekQFz21am-2d4NP4onHjZ>

With the arrival of a new year, most of you are eager to embark on a brand-new road for success (AIGP test prep). Now since you have made up your mind to embrace an utterly different future, you need to take immediate actions. Using AIGP practice materials, from my perspective, our free demo is possessed with high quality which is second to none. This is no exaggeration at all. Just as what have been reflected in the statistics, the pass rate for those who have chosen our AIGP Exam Guide is as high as 99%, which in turn serves as the proof for the high quality of our practice torrent.

## IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Understanding How to Govern AI Deployment and Use:</b> This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Understanding the Foundations of AI Governance:</b> This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.</li> </ul>

## **New AIGP Exam Review - High-quality AIGP Reliable Exam Prep and Pass-Sure Valid IAPP Certified Artificial Intelligence Governance Professional Exam Question**

AIGP exam certification is an international recognition, which is equivalent to a passport to enter a higher position. The AIGP exam materials and test software provided by our ActualTorrent are developed by experienced IT experts, which have been updated again and again. Now you just take dozens of Euro to have such Reliable AIGP Test Materials. Once you get the certification you may have a higher position and salary.

### **IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q33-Q38):**

#### **NEW QUESTION # 33**

All of the following are obligations of providers under the EU AI Act EXCEPT:

- A. Record keeping
- B. Performing post-market monitoring.
- C. Establishing a quality management system.
- **D. Ensuring human oversight in accordance with the instructions for use.**

**Answer: D**

Explanation:

Under the EU AI Act, providers of high-risk AI systems are required to implement a quality management system (QMS) that includes various components such as risk management, data governance, post-market monitoring, and record-keeping. However, the responsibility for ensuring human oversight in accordance with the instructions for use primarily falls on the deployers of the AI system, not the providers. Deployers are the entities that operate or use the AI system within their scope of authority and are responsible for implementing the necessary human oversight measures as specified by the provider.

#### **NEW QUESTION # 34**

A Canadian company is developing an AI solution to evaluate candidates in the course of job interviews. Before offering the AI solution in the EU market, the company must take all of the following steps EXCEPT?

- A. Engage a third-party auditor to perform a bias audit.
- **B. Register the AI solution in a public EU database.**
- C. Establish a risk and quality management system.
- D. Draw up technical documentation and instructions for use.

**Answer: B**

Explanation:

Before offering an AI solution in the EU market, a Canadian company must take several steps to comply with the EU AI Act. These steps include establishing a risk and quality management system (B), engaging a third-party auditor to perform a bias audit (C), and drawing up technical documentation and instructions for use (D). However, there is no requirement to register the AI solution in a public EU database (A). This registration step is not specified as part of the compliance requirements under the EU AI Act for such solutions.

### NEW QUESTION # 35

In 2025, which U.S. agency ordered companies to provide information about the safety of their AI companion chatbots?

- A. The Central Intelligence Agency CIA
- B. The Federal Communications Commission FCC
- C. The Federal Trade Commission FTC
- D. The Department of Justice DOJ

**Answer: C**

Explanation:

The correct answer is C, the Federal Trade Commission. The FTC plays a central role in U.S. AI governance by enforcing consumer protection and unfair or deceptive practices laws. In the context of AI systems such as companion chatbots, the FTC has authority to investigate risks related to user harm, transparency, safety, and misleading claims. AI governance frameworks emphasize regulatory oversight where AI systems may impact individuals psychologically, financially, or socially. Agencies like the FTC focus on ensuring that companies deploying AI systems do not cause harm through unsafe or deceptive practices and that they provide adequate disclosures about risks and system behavior. This aligns with broader AI governance principles of accountability, transparency, and risk management highlighted in the AI Governance in Practice Report 2024, which stresses the importance of regulatory involvement in managing AI-related risks.

### NEW QUESTION # 36

#### CASE STUDY

Please use the following answer the next question:

A mid-size US healthcare network has decided to develop an AI solution to detect a type of cancer that is most likely arise in adults. Specifically, the healthcare network intends to create a recognition algorithm that will perform an initial review of all imaging and then route records a radiologist for secondary review pursuant agreed-upon criteria (e.g., a confidence score below a threshold). To date, the healthcare network has taken the following steps: defined its AI ethical principles; conducted discovery to identify the intended uses and success criteria for the system; established an AI governance committee; assembled a broad, crossfunctional team with clear roles and responsibilities; and created policies and procedures to document standards, workflows, timelines and risk thresholds during the project.

The healthcare network intends to retain a cloud provider to host the solution and a consulting firm to help develop the algorithm using the healthcare network 's existing data and de-identified data that is licensed from a large US clinical research partner. In the design phase, what is the most important step for the healthcare network to take when mapping its existing data to the clinical research partner data?

- A. Evaluate the country of origin of the data.
- B. Ensure the data is labeled and formatted.
- C. Apply privacy-enhancing technologies to the data.
- D. Identify fits and gaps in the combined data.

**Answer: D**

Explanation:

In the design phase of integrating data from different sources, identifying fits and gaps is crucial. This process involves understanding how well the data from the clinical research partner aligns with the healthcare network 's existing data. It ensures that the combined data set is coherent and can be effectively used for training the AI algorithm. This step helps in spotting any discrepancies, inconsistencies, or missing data that might affect the performance and accuracy of the AI model. It directly addresses the integrity and compatibility of the data, which is foundational before applying any privacy-enhancing technologies, labeling, or evaluating the origin of the data. Reference: AIGP Body of Knowledge on Data Integration and Quality.

### NEW QUESTION # 37

During the planning and design phases of the AI development life cycle, bias can be reduced by all of the following EXCEPT?

- A. Data collection.
- B. Stakeholder involvement.
- C. Feature selection.
- D. Human oversight.

**Answer: C**

Explanation:

Bias in AI can be reduced during the planning and design phases through stakeholder involvement, human oversight, and careful data collection. While feature selection is critical in the development phase, it does not specifically occur during planning and design. Ensuring diverse stakeholder involvement and human oversight helps identify and mitigate potential biases early, and data collection ensures a representative dataset. Reference: AIGP Body of Knowledge on AI Development Lifecycle and Bias Mitigation.

### NEW QUESTION # 38

.....

The price for AIGP study materials is convenient, and no matter you are a student or an employee, you can afford the expense. Moreover, AIGP exam materials are high-quality, and you can pass your exam just one time by using them. We offer you free demo to have a try before buying AIGP exam materials, and you can have a try before purchasing, so that you can have a better understanding of what you are going to buy. We are pass guarantee and money back guarantee if you fail to pass the exam. We have online and offline service, if you have any questions for AIGP Exam Dumps, you can contact us, we will give you reply as soon as possible.
