It is known to us that the privacy is very significant for every one and all companies should protect the clients' privacy. Our company is no exception, and you can be assured to buy our CWAP-404 exam prep. Our company has been focusing on the protection of customer privacy all the time. We can make sure that we must protect the privacy of all customers who have bought our CWAP-404 Test Questions. If you decide to use our CWAP-404 test torrent, we are assured that we recognize the importance of protecting your privacy and safeguarding the confidentiality of the information you provide to us. We hope you will use our CWAP-404 exam prep with a happy mood, and you don't need to worry about your information will be leaked out.

CWNP CWAP-404 Exam Syllabus Topics:

Topic	Details
Topic 1	• PHY Layers and Technologies: In the topic, the CWAP-404 exam tests the understanding of a wireless network professional about the Physical (PHY) layer functions and technologies. Wireless analysts need to describe and apply knowledge of PHY headers, PPDUs, and other PHY-related data. This topic ensures that analysts are proficient in interpreting PHY information within protocol analyzers and can select appropriate capture devices for different PHY types.
Topic 2	• Frame Exchanges: The topic evaluates the skills of a wireless network professional in capturing, understanding, and analyzing various frame exchanges, including BSS discovery, joining, roaming, and data frames. The CWAP-404 exam targets the ability of candidates to troubleshoot and resolve issues related to MAC layer operations, ensuring they can maintain robust and efficient WLAN communications.

Topic 3	• Spectrum Analysis: The topic assesses the ability of a wireless network professional to capture and interpret RF spectrum data. The exam targets the skills in identifying device signatures and RF issues through spectrum analyzers.
Topic 4	• Protocol Analysis: The topic in the CWNP CWAP-404 Exam evaluates the skill of a wireless network professional to capture and analyze 802.11 frames effectively. Candidates must demonstrate proficiency in configuring protocol analysis tools, interpreting frame captures to diagnose issues, and applying appropriate troubleshooting methods.
Topic 5	• WLAN Medium Access: The exam evaluates the understanding of a wireless network professional about 802.11 contention algorithms and their impact on WLAN performance. The CWAP-404 exam requires candidates to analyze QoS configurations and operations.

CWAP-404 Prepaway Dumps | Reliable CWAP-404 Exam Review

Quality of CWAP-404 learning quiz you purchased is of prior importance for consumers. Our CWAP-404 practice materials make it easier to prepare exam with a variety of high quality functions. The quality function of our CWAP-404 exam questions is observably clear once you download them. We have three kinds of CWAP-404 Real Exam moderately priced for your reference: the PDF, Software and APP online. And you can choose any version according to your interests and hobbies.

CWNP Certified Wireless Analysis Professional Sample Questions (Q157-Q162):

NEW QUESTION # 157
As a WLAN consultant, you have been asked to troubleshoot a problem with a single wireless client station (Station-Z). Your customer informs you that other wireless client stations are not having problems with wireless connectivity, and that Station-Z is configured in the same manner as all other wireless client stations on the network. Station-Z is showing an unusually high retransmission count in its client utility statistics. Using a wireless protocol analyzer, where and how should you begin troubleshooting this problem? (Choose 2)

- A. Position the analyzer near Station-Z. Analyze the frames Station-Z is receiving, looking for delayed ACK frames.
- B. Position the analyzer near Station-Z. Analyze Station-Z's transmissions and acknowledgements. Look for RF and obstacle-induced interference.
- C. Position the analyzer halfway between Station-Z and the access point. Analyze the data rate at which frames are sent and how long they take to be received.
- D. Position the analyzer near the access point. See if Station-Z's frames are reaching the access point and if so, analyze their signal strength.
- E. Position the analyzer halfway between Station-Z and the access point. Measure the distance between Station-Z and the access point.

Answer: B,D

NEW QUESTION # 158
You are tasked with describing the various frames used in 802.11 communications.
What frame is used for spectrum management, fast BSS transition and some other actions taken within a BSA?

- A. CTS
- B. Action
- C. PS Poll
- D. BlockAck

Answer: B

NEW QUESTION # 159
Given the IEEE 802.11 Beacon frame decode shown, determine which statement is definitively true.

- A. ERP mobile stations must use the RTS/CTS protocol before Data transmissions.
- B. The SSID value in this Beacon is null.
- C. The access point is operating on channel 3.
- D. The access point has both 1 Mbps and 2 Mbps configured as basic rates.
- E. This Beacon frame came from an ERP or HT access point.

Answer: B

NEW QUESTION # 160
A manager at a retail outlet has complained that an incident occurred allowing a STA to launch an attack against another STA connected to their public Wi-Fi hotspot. He has asked you to troubleshoot the situation and verify that all possible measured are being taken to prevent this.
What configuration should you check in the AP?

- A. Client-to-client direct communications
- B. DNS settings
- C. Captive portal Internet gateway
- D. Inter-VAP filtering

Answer: A

Explanation:
Disabling client-to-client communication (also known as peer-to-peer or "AP isolation") prevents devices connected to the same wireless network from communicating directly with each other.
This helps mitigate attacks where one client station (STA) could attack another STA, such as through ARP spoofing or other local network-based attacks.

NEW QUESTION # 161
What is the function of 802.11 Management frames?

- A. Communicate configuration changes between WLAN controller and APs
- B. Prioritize network administration traffic
- C. Manage the BSS
- D. Manage the flow of data

Answer: C

Explanation:
Explanation
The function of 802.11 management frames is to manage the BSS. A BSS (Basic Service Set) is a group of STAs (stations) that share a common SSID (Service Set Identifier) and communicate with each other through an AP (access point) or directly in an ad hoc mode. Management frames are one of the three types of 802.11 frames, along with control and data frames. Management frames are used to establish, maintain, and terminate associations between STAs and APs, as well as to advertise and discover BSSs, exchange security information, report errors, and perform other management functions. The other options are not correct, as they are not functions of 802.11 management frames. Prioritizing network administration traffic, communicating configuration changes between WLAN controller and APs, and managing the flow of data are functions of other types of frames or protocols.
