These Excellence in Design for Greater Efficiencies (EDGE Expert) Exam (EDGE-Expert) exam questions help applicants prepare well prior to entering the actual Excellence in Design for Greater Efficiencies (EDGE Expert) Exam (EDGE-Expert) exam center. Due to our actual EDGE-Expert Exam Dumps, our valued customers always pass their EDGE EDGE-Expert exam on the very first try hence, saving their precious time and money too.

Our EDGE-Expert guide materials are high quality and high accuracy rate products. It is all about the superior concreteness and precision of the EDGE-Expert exam questions that helps. Every page and every points of knowledge have been written from professional experts who are proficient in this line and are being accounting for this line over ten years. And they know every detail about our EDGE-Expert learning prep and can help you pass the exam for sure.

Latest Upload EDGE New EDGE-Expert Exam Labs: Excellence in Design for Greater Efficiencies (EDGE Expert) Exam - Latest EDGE-Expert Braindumps Pdf

Our EDGE-Expert study guide provides free trial services, so that you can learn about some of our topics and how to open the software before purchasing. During the trial period of our EDGE-Expert study materials, the PDF versions of the sample questions are available for free download, and both the pc version and the online version can be illustrated clearly. You can contact us at any time if you have any difficulties in the purchase or trial process of our EDGE-Expert Exam Dumps.

EDGE Excellence in Design for Greater Efficiencies (EDGE Expert) Exam Sample Questions (Q103-Q108):

NEW QUESTION # 103

In order for a project to complete the design certification stage requirements, the EDGE Client must do which of the following?

- A. Review and sign an agreement with a local or global partner to provide EDGE certification services.
- **B. Provide the EDGE Auditor access to the self-assessment and all supporting documentation.**
- C. Access the EDGE software and begin and complete a full self-assessment of the building.
- D. Internally review the EDGE measures with their design team and third-party consultant.

Answer: B

Explanation:

The design certification stage (Preliminary Certification) in EDGE requires specific actions from the Client to ensure the project can be audited and certified. The EDGE Certification Protocol outlines the process: "To complete the design certification stage, the EDGE Client must provide the EDGE Auditor with access to the completed self-assessment in the EDGE software, along with all

supporting documentation, such as drawings, specifications, and calculations, to verify the selected measures" (EDGE Certification Protocol, Section 3.1:

Certification Process). Option C, provide the EDGE Auditor access to the self-assessment and all supporting documentation, matches this requirement. Option A (internally review the EDGE measures) is a preparatory step, not a certification requirement: "Internal reviews are recommended but not mandated for certification" (EDGE User Guide, Section 6.1: Project Preparation).

Option B (access the EDGE software and complete a self-assessment) is a prerequisite to the audit, not the final step for design certification: "The self-assessment must be completed before the audit, but certification requires submission to the Auditor" (EDGE Certification Protocol, Section 3.1: Certification Process). Option D (sign an agreement with a certification partner) is incorrect, as this is typically handled during project registration, not design certification: "Agreements with Certification Providers are signed prior to registration, not at the design stage" (EDGE Certification Protocol, Section 2.1: Registration). Thus, providing the Auditor access (Option C) is the required action.

Reference:EDGE Certification Protocol, Section 3.1: Certification Process, Section 2.1: Registration; EDGE User Guide Version 2.1, Section 6.1: Project Preparation.

NEW QUESTION # 104

The COP of the water-cooled chiller is 6, and the cooling thermal load is 3516 W. What is the power rating of the chiller?

- A. 3522 W
- **B. 586 W**
- C. 21096 W
- D. 3510 W

Answer: B

Explanation:

The Coefficient of Performance (COP) is used in EDGE to calculate the electrical power input required for a given thermal output of a chiller. The EDGE Methodology Report defines COP as: "COP is the ratio of thermal output to electrical input, expressed as $COP = \text{Thermal Output} / \text{Electrical Input}$. To find the electrical input (power rating), rearrange the formula: $\text{Electrical Input} = \text{Thermal Output} / COP$ " (EDGE Methodology Report Version 2.0, Section 5.1: Energy Efficiency Metrics). Given the COP of the water-cooled chiller as 6 and the cooling thermal load (thermal output) as 3516 W, the power rating is calculated as follows: $\text{Electrical Input} = 3516 \text{ W} / 6 = 586 \text{ W}$. Option A, 586 W, matches this calculation. Option B (3510 W) is incorrect, as it is slightly less than the thermal output, implying an unrealistic COP near 1. Option C (3522 W) is slightly above the thermal output, also incorrect. Option D (21096 W) is the result of multiplying the thermal output by the COP (3516×6), which is the inverse of the correct calculation. The EDGE User Guide confirms: "For a chiller with a COP of 6, the electrical input is one-sixth of the thermal output, ensuring energy efficiency is accurately assessed" (EDGE User Guide, Section 4.2: Energy Efficiency Measures). Thus, the power rating is

586 W (Option A).

Reference:EDGE Methodology Report Version 2.0, Section 5.1: Energy Efficiency Metrics; EDGE User Guide Version 2.1, Section 4.2: Energy Efficiency Measures.

NEW QUESTION # 105

Which of the following wall solar reflectivity indexes would be the most energy efficient in a hot climate?

- A. 0.2
- **B. 0.7**
- C. 0.3
- D. 0.4

Answer: B

Explanation:

In hot climates, reducing heat gain through building envelopes is a key strategy for energy efficiency, as emphasized in EDGE's green building design principles. The EDGE User Guide discusses solar reflectivity (measured by the Solar Reflectance Index, SRI) for walls and roofs, stating: "Higher SRI values indicate greater reflectivity, which reduces heat absorption and lowers cooling energy demand in hot climates. For walls in hot climates, an SRI of 0.7 or higher is recommended to maximize energy savings" (EDGE User Guide, Section 3.5: Passive Design Strategies). The options provided are 0.2, 0.3, 0.4, and 0.7. Since 0.7 is the highest SRI value among the choices, it reflects the most solar radiation, thereby reducing the cooling load and improving energy efficiency in a hot climate, as per EDGE's guidance. Options A, B, and C have lower SRI values and would result in greater heat absorption, increasing energy use for cooling.

Reference:EDGE User Guide Version 2.1, Section 3.5: Passive Design Strategies.

NEW QUESTION # 106

For which of the following is EDGE Advanced certification available?

- A. Green lease agreements
- **B. New constructions**
- C. Infrastructure constructions
- D. Parks and landscape projects

Answer: B

Explanation:

The EDGE Standard defines specific project types eligible for certification levels, including EDGE Advanced, which requires at least 40% energy savings. The EDGE Certification Protocol specifies: "EDGE Advanced certification is available for new constructions that achieve a minimum of 40% energy savings compared to the base case, applicable to building typologies such as homes, hotels, offices, hospitals, retail, and schools" (EDGE Certification Protocol, Section 2.3: Certification Levels). Option A, new constructions, aligns with this scope, as EDGE focuses on new buildings across supported typologies. Option B, green lease agreements, is not a building type and is outside EDGE's certification framework. Option C, infrastructure constructions, and Option D, parks and landscape projects, are also not covered under EDGE typologies, as confirmed by the EDGE User Guide: "EDGE certification applies to new buildings and major renovations of specific typologies, excluding infrastructure or landscape-only projects" (EDGE User Guide, Section 1.2:

Scope of EDGE Certification). Thus, only new constructions qualify for EDGE Advanced certification.

Reference:EDGE Certification Protocol, Section 2.3: Certification Levels; EDGE User Guide Version 2.1, Section 1.2: Scope of EDGE Certification.

NEW QUESTION # 107

During an EDGE audit for a project, the Auditor discovers that members of the design team have provided misleading information on certain green building measures to the Client. This incorrect information has unknowingly been used by the Client to support their application for EDGE certification. What should the EDGE Auditor do?

- A. Call the offending design team member and negotiate a friendly solution.
- B. Contact the Client and warn them of the deception, pointing out the design team members at fault.
- C. Reject the information and adjust the EDGE assessment accordingly, returning the assessment to the Client.
- **D. Contact the design team and recommend that they provide updated and correct information.**

Answer: D

Explanation:

EDGE Auditors are bound by ethical protocols to maintain professionalism and independence when encountering issues like misleading information. The EDGE Expert and Auditor Protocols outline the procedure: "If an EDGE Auditor discovers misleading or incorrect information during an audit, they must contact the design team to recommend that they provide updated and correct information to the Client. The Auditor should document the issue in the audit report but must not adjust the assessment themselves or take punitive actions, ensuring the process remains transparent and fair" (EDGE Expert and Auditor Protocols, Section 4.3: Handling Discrepancies). Option B, contacting the design team to recommend updated information, aligns with this protocol. Option A (negotiate a friendly solution) violates the Auditor's impartiality: "Auditors must avoid direct negotiations that could compromise their independence" (EDGE Expert and Auditor Protocols, Section 2.3: Conflict of Interest). Option C (warn the Client of deception) oversteps the Auditor's role by assigning blame: "Auditors should not accuse parties of deception but focus on facilitating corrections" (EDGE Expert and Auditor Protocols, Section 4.3: Handling Discrepancies).

Option D (reject and adjust the assessment) is incorrect, as Auditors cannot modify assessments: "Auditors must assess the project as submitted and cannot reject or adjust measures on their own" (EDGE Certification Protocol, Section 3.2: Audit Requirements). Thus, recommending corrections to the design team (Option B) is the appropriate action.

Reference:EDGE Expert and Auditor Protocols, Section 4.3: Handling Discrepancies, Section 2.3: Conflict of Interest; EDGE Certification Protocol, Section 3.2: Audit Requirements.

NEW QUESTION # 108

.....

We have thousands of satisfied customers around the globe so you can freely join your journey for the Excellence in Design for Greater Efficiencies (EDGE Expert) Exam certification exam with us. ITExamDownload also guarantees that it will provide your money back if in any case, you are unable to pass the EDGE EDGE-Expert Exam but the terms and conditions are there that you must have to follow.

Latest EDGE-Expert Braindumps Pdf: <https://www.itexamdownload.com/EDGE-Expert-valid-questions.html>

EDGE New EDGE-Expert Exam Labs Are you still worried about low wages, In order to meet the demands of all customers, our company has a complete set of design, production and service quality guarantee system, the Latest EDGE-Expert Braindumps Pdf-Excellence in Design for Greater Efficiencies (EDGE Expert) Exam test guide is perfect, Someone will ask if we are legal company and our EDGE EDGE-Expert exam collection materials are really valid & latest, EDGE New EDGE-Expert Exam Labs To help you out, here are some features you can refer to.

Select all of the text, and choose Edit > Copy, Everything you do will help you pass the EDGE-Expert exam and get your EDGE-Expert certificate, Are you still worried about low wages?

In order to meet the demands of all customers, our company EDGE-Expert has a complete set of design, production and service quality guarantee system, the Excellence in Design for Greater Efficiencies (EDGE Expert) Exam test guide is perfect.

Get Latest EDGE EDGE-Expert PDF Questions For Instant Success

Someone will ask if we are legal company and our EDGE EDGE-Expert exam collection materials are really valid & latest, To help you out, here are some features you can refer to.

Therefore, to solve these problems, the EDGE-Expert test material is all kinds of qualification examination, the content of the difficult point analysis, let users in the vast amounts of find the information you need in the study materials, the EDGE-Expert practice materials improve the user experience, to lay the foundation for good grades through qualification exam
