

# 300-710 Exam Certification, 300-710 Dumps Discount

What's more, part of that DumpsTests 300-710 dumps now are free: [https://drive.google.com/open?id=1aC\\_Hyk03g1sWUzVtWMxXYDoH3\\_maEGys](https://drive.google.com/open?id=1aC_Hyk03g1sWUzVtWMxXYDoH3_maEGys)

Our company always lays great emphasis on service. All of our works have good sense of service. Once you browser our website and select the 300-710 exam questions, we have arrange all study materials separately and logically. You will know the details if you click the 300-710 practice quiz. You will find that it is easy, fast and convenient. And if you have something confused on our 300-710 learning braindumps, then you can contact with our service online or send email to us. We will help you in the first time.

Cisco 300-710: Securing Networks with Cisco Firepower exam is an excellent certification for professionals who want to enhance their skills and knowledge in network security. Securing Networks with Cisco Firepower certification validates the expertise of individuals in configuring, deploying, and managing Cisco Firepower NGIPS and NGFW solutions. Securing Networks with Cisco Firepower certification is highly valued in the industry and can help professionals to advance their careers in the field of network security.

## Pass Guaranteed Quiz Cisco - Reliable 300-710 - Securing Networks with Cisco Firepower Exam Certification

IT certification candidates are mostly working people. Therefore, most of the candidates did not have so much time to prepare for the exam. But they need a lot of time to participate in the certification exam training courses. This will not only lead to a waste of training costs, more importantly, the candidates wasted valuable time. Here, I recommend a good learning materials website. Some of the test data on the site is free, but more importantly is that it provides a realistic simulation exercises that can help you to pass the Cisco 300-710 Exam. DumpsTests Cisco 300-710 exammaterials can not only help you save a lot of time, but also allows you to pass the exam successfully. So you have no reason not to choose it.

## Cisco 300-710 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• Configure Cisco AMP For Networks In Firepower Management Center</li> <li>• Configure Objects Using Firepower Management Center</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Configure These Features Using Cisco Firepower Management Center</li> <li>• Management And Troubleshooting</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Configure Cisco AMP For Endpoints In Firepower Management Center</li> <li>• Configure Dashboards And Reporting In FMC</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Describe Using Cisco Threat Response For Security Investigations</li> <li>• Active</li> <li>• Standby Failover</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Configure System Settings In Cisco Firepower Management Center</li> <li>• Describe IRB Configurations</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Troubleshoot Using Packet Capture Procedures</li> <li>• Implement NGIPS Modes</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Describe Rapid Threat Containment (RTC) Functionality Within Firepower Management Center</li> <li>• Application Detectors (Open Appid)</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Configure Devices Using Firepower Management Center</li> <li>• Implement High Availability Options</li> </ul>

## Cisco Securing Networks with Cisco Firepower Sample Questions (Q174-Q179):

### NEW QUESTION # 174

When a Cisco FTD device is configured in transparent firewall mode, on which two interface types can an IP address be configured? (Choose two.)

- A. EtherChannel
- B. Subinterface
- C. BVI
- D. Diagnostic
- E. Physical

**Answer: C,D**

### NEW QUESTION # 175

An engineer is configuring a custom application detector for HTTP traffic and wants to import a file that was provided by a third party. Which type of files are advanced application detectors creates and uploaded as?

- A. LUA script
- B. NBAR protocol
- C. Python program
- D. Perl script

**Answer: A**

Explanation:

A custom application detector is a user-defined script that can detect web applications, clients, and application protocols based on patterns in network traffic. Custom application detectors are written in LUA, which is a lightweight and embeddable scripting language. LUA scripts can use predefined functions and variables provided by the Firepower System to access packet data and metadata, and to specify the detection criteria and the application information1.

To import a custom application detector file that was provided by a third party, you need to follow these steps1:

- \* In the FMC web interface, navigate to Objects > Object Management > Application Detectors.
- \* Click Import.
- \* Browse to the location of the LUA script file and select it.
- \* Click Upload.
- \* Review the detector details and click Save.

The other options are incorrect because:

- \* Perl script is not a supported format for custom application detectors. Perl is a general-purpose programming language that is not embedded in the Firepower System.
- \* NBAR protocol is not a file type, but a feature of Cisco IOS routers that can classify and monitor network traffic based on application types. NBAR protocols are predefined and cannot be imported as custom application detectors.
- \* Python program is not a supported format for custom application detectors. Python is a general-purpose programming language that is not embedded in the Firepower System.

#### NEW QUESTION # 176

An administrator is attempting to add a new FTD device to their FMC behind a NAT device with a NAT ID of NAT001 and a password of Cisco0420106525. The private IP address of the FMC server is 192.168.45.45, which is being translated to the public IP address of 209.165.200.225/27. Which command set must be used in order to accomplish this task?

- A. configure manager add 209.165.200.225 255.255.255.224 <reg\_key> <nat\_id>
- B. configure manager add 192.168.45.45 <reg\_key> <nat\_id>
- C. configure manager add 209.165.200.225/27 <reg\_key> <nat\_id>
- D. configure manager add 209.165.200.225 <reg\_key> <nat\_id>

**Answer: D**

#### NEW QUESTION # 177

A network administrator reviews the file report for the last month and notices that all file types, except exe, show a disposition of unknown. What is the cause of this issue?

- A. The Cisco FMC cannot reach the Internet to analyze files.
- B. Only Spero file analysis is enabled.
- C. The malware license has not been applied to the Cisco FTD.
- D. A file policy has not been applied to the access policy.

**Answer: D**

Explanation:

A file policy defines the actions that the Cisco Firepower Threat Defense (FTD) device should take when it encounters different types of files. The file policy is applied as part of an access control policy. If an access control policy does not include a file policy, the FTD device will not take any action on the files it encounters, resulting in a disposition of "unknown" for all file types except exe.

<https://www.cisco.com/c/en/us/support/docs/security/firepower-ngfw/219759-configure-bypass-policies-on-the-c>

#### NEW QUESTION # 178

What is an advantage of adding multiple inline interface pairs to the same inline interface set when deploying an asynchronous routing configuration?

- A. The interfaces are automatically configured as a media-independent interface crossover.
- B. The interfaces disable autonegotiation and interface speed is hard coded set to 1000 Mbps.
- C. Allows traffic inspection to continue without interruption during the Snort process restart.
- D. Allows the IPS to identify inbound and outbound traffic as part of the same traffic flow.

**Answer: D**
