The product available at PassExamDumps includes CompTIA 220-1202 Real Dumps pdf and mock tests (desktop and web-based). Practice exams give an experience of taking the CompTIA A+ Certification Exam: Core 2 (220-1202) actual exam.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q52-Q57):

NEW QUESTION # 52
As a corporate technician, you are asked to evaluate several suspect email messages on a client's computer.
Corporate policy requires the following:

>All phishing attempts must be reported.

>Future spam emails to users must be prevented.

INSTRUCTIONS

Review each email and perform the following within the email:

>Classify the emails

>Identify suspicious items, if applicable, in each email

>Select the appropriate resolution

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

Inbox mail 4 –Security Update – Spam - Report email to Information Security
Inbox mail 5 –Interview - Legitimate - Perform no additional actions

NEW QUESTION # 53
A user cannot upload files to corporate servers from their mobile device when outside the office, but uploads work fine in-office.
What should a technician do to determine the root cause?

- A. Enable airplane mode
- B. Check the data usage limit

- C. Verify the last device reboot
- D. Enable Bluetooth connectivity

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
If uploading fails only offsite,mobile data limits or restrictionsare the likely cause. Data caps or network management can interfere with uploads.
FromTravis Everett - All-in-One Exam Guide:
"When mobile users experience network issues, always check if the device has reached a data cap or roaming restriction."

NEW QUESTION # 54
A user takes an iOS-based smartphone to a repair shop due to performance issues. The technician observes:
Battery charge: 25%
Battery health: 90%
Hotspot: On
Used space: 63.76GB / 64GB
Which of the following is the most likely cause of the performance issue?

- A. Too many applications are open
- B. The hotspot is degrading the performance
- C. The battery health is low
- D. The phone is not sufficiently charged
- E. The device is running out of free space

Answer: E

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
Running atnear full storage capacitysignificantly slows down smartphones. iOS in particular requires space for caching and temporary files. Performance improves when storage is cleared.
FromMike Meyers' Lab Manual:
"Lack of free space causes mobile operating systems to struggle with temp files and updates. Performance improves significantly with adequate storage."

NEW QUESTION # 55
A user is attempting to open on a mobile phone a HD video that is hosted on a popular media streaming website. The user is receiving connection timeout errors. The mobile reception icon area is showing two bars next to 3G. Which of the following is the most likely cause of the issue?

- A. The mobile device storage is full.
- B. The website's subscription has run out.
- C. The bandwidth is not fast enough.
- D. The user does not have Wi-Fi enabled.

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
3G networks generally do not provide the bandwidth required for seamless HD video streaming. With only two signal bars and a 3G connection, the mobile device likely cannot maintain the necessary data throughput, resulting in timeouts or buffering failures. This is a classic symptom of insufficient network speed or signal strength.
A: Lack of Wi-Fi may contribute, but the root cause is the low mobile bandwidth, not the Wi-Fi state.
B: A website subscription lapse would return an account error, not a timeout.
D: Full device storage can affect downloads but not streaming from the internet.

Study Guide Section: Connectivity and network performance issues on mobile devices

NEW QUESTION # 56

Which of the following malware types typically has very high computing resource usage?

- A. Rootkit
- B. Cryptominer
- C. Boot sector virus
- D. Trojan

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
Cryptominers exploit system resources to mine cryptocurrency, often without user consent, leading to high CPU and GPU usage.
From Quentin Docter - CompTIA A+ Complete Study Guide:
"Cryptomining malware can cause significant performance degradation by monopolizing system resources like CPU and GPU to mine digital currency."
