100% Pass Cisco - Authoritative 300-720 - Latest Securing Email with Cisco Email Security Appliance Test Objectives

TrainingDump has rich resources and 300-720 test questions. It equips with 300-720 exam simulations and test dumps. You can try to download questions and answers. Moreover, TrainingDump answers real questions. Equipping with online Cisco 300-720 Study Guide, 100% guarantee to Pass Your 300-720 Exam.

Cisco Securing Email with Cisco Email Security Appliance Sample Questions (Q160-Q165):

NEW QUESTION # 160

What is the maximum message size that can be configured for encryption on the Cisco ESA?

- A. 30 MB
- B. 20 MB
- C. 15 MB
- D. 25 MB

Answer: D

Explanation:

Enabling Message Encryption on the Email Security Appliance

Procedure

- Step 1** Click **Security Services > Cisco IronPort Email Encryption**.
- Step 2** Click **Enable**.
- Step 3** (Optional) Click **Edit Settings** to configure the following options:
- The maximum message size to encrypt. Cisco's recommended message size is 10 MB. The maximum message size the appliance will encrypt is **25 MB**.

Note Encrypting messages larger than the recommended 10 MB limit may slow down the performance of the appliance. If you are using the Cisco Registered Envelope Service, message recipients will be unable to reply to an encrypted message that has attachments larger than 10 MB.

- Email address of the encryption account administrator. When you provision an Encryption Profile, this email address is registered automatically with the encryption server.
- Configure a proxy server.

NEW QUESTION # 161

What must be configured to allow the Cisco ESA to encrypt an email using the Cisco Registered Envelope Service?

- A. content filter to forward the email to the Cisco Registered Envelope server
- B. provisioned email encryption profile
- C. message encryption from a content filter that select "Message Encryption" over TLS
- D. message encryption from the mail flow policies with "CRES" selected

Answer: C

Explanation:

Explanation/Reference: https://www.cisco.com/c/en/us/td/docs/security/esa/esa12-0/user_guide/b_ESA_Admin_Guide_12_0/b_ESA_Admin_Guide_chapter_010010.html

NEW QUESTION # 162

What are two primary components of content filters? (Choose two.)

- A. actions
- B. content
- C. conditions
- D. subject
- E. policies

Answer: A,C

Explanation:

NEW QUESTION # 163

What is the default behavior of any listener for TLS communication?

- A. required
- B. preferred-verify

- C. off
- D. preferred

Answer: C

Explanation:

The default behavior of any listener for TLS communication is B. off. This means that TLS is not allowed for incoming connections to the listener and connections to the listener do not require encrypted Simple Mail Transfer Protocol (SMTP) conversations. This is stated in the web search result 1 . To enable TLS for a listener, you need to configure the Use TLS option in the mail flow policy settings for the listener on the Mail Policies > HAT Overview page 1 . You can choose from three different settings for TLS: No, Preferred, or Required 1 .
