Fortinet FCP_FMG_AD-7.6 Reliable Dumps, FCP_FMG_AD-7.6 Study Reference

FCP_FMG_AD-7.6 study material is suitable for all people. Whether you are a student or an office worker, whether you are a veteran or a rookie who has just entered the industry, FCP_FMG_AD-7.6 test answers will be your best choice. For office workers, FCP_FMG_AD-7.6 test dumps provide you with more flexible study time. You can download learning materials to your mobile phone and study at anytime, anywhere. And as an industry rookie, those unreadable words and expressions in professional books often make you feel mad, but FCP_FMG_AD-7.6 Study Materials will help you to solve this problem perfectly.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
Topic 2	Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.
Topic 3	Troubleshooting
Topic 4	Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q42-Q47):

NEW QUESTION # 42

Refer to the exhibits. An administrator has been asked to install the same policies from a central policy package onto the BR1-FGT-1 firewall.

The administrator added BR1-FGT-1 as a target in the central policy package installation.

What should the administrator do when reinstalling the central policy package on the BR1-FGT-1 firewall?

FortiManager device database

Installation Targets Central policy package

BR1-FGT-1	Installation Target	Config Status	Policy Package Status
Central	BR1-FGT-1	✓ Synchronized	BR1-FGT-1
Firewall Policy	Local-Firewall	Unknown	▲ Central
Installation Targets	Remote-Firewall	Unknown	▲ Central
HQ-NGFW-1			
default			

- A. Assign only one policy package to the firewall because FortiManager does not allow more than one policy package assigned per device at the same time.
- B. First resolve the modified status in the configuration and provisioning templates to allow a smooth installation.
- C. Import the policy package to change the unknown status and synchronize the policy package.
- D. Use the install wizard to install the central policy package on the BR1-FGT-1 firewall.

Answer: D

Explanation:

Using the Install Wizard is the recommended method to reinstall the central policy package on the BR1-FGT-1 firewall, ensuring all settings, installation targets, and dependencies are correctly processed during installation.

NEW QUESTION # 43

An administrator must create a policy and install it on a FortiGate device within an ADOM in backup mode. How can the administrator perform this task?

- A. Enable workflow mode to allow policy creation and approval.
- B. Make sure the ADOM and FortiGate firmware versions match and use the ADOM policy package.
- C. Use the Install Wizard located on the device manager.
- **D. Use a FortiManager script to apply the configuration changes.**

Answer: D

Explanation:

In backup mode, FortiManager does not directly manage policy installation via the usual ADOM policy packages; instead, administrators use FortiManager scripts to push configuration changes, including policies, to FortiGate devices.

NEW QUESTION # 44

An administrator wants to configure and manage multiple objects in the FortiManager database and give access to other users who work in the same database.

To stay in control of the changes made to firewall policies by other team members, the administrator needs a setup where all modifications go through a central check before they can be installed.

How can the administrator create this setup?

- A. Enable the workspace (for all ADOMs) to control all changes made by any administrator.
- B. Enable the prompt asking the administrator to accept firewall policies changes before saving.
- C. Enable device lock and the advanced mode feature in the ADOM.
- **D. Enable workflow mode and the ADOM lock feature.**

Answer: D

Explanation:

Enabling workflow mode along with the ADOM lock feature ensures that all configuration changes go through a centralized review and approval process before installation, allowing controlled and coordinated management of firewall policies by multiple administrators.

NEW QUESTION # 45

An administrator configures a new BGP peer in the FortiManager device-level database of FortiGate. They reinstall the policy package to the managed FortiGate device without any errors. However, when the administrator logs in to FortiGate, they do not see the BGP configuration changes.

What is the most likely reason why FortiManager did not push the BGP peer changes to FortiGate?

- A. The administrator must run a sanity check on FortiManager to make sure the database is not corrupted.
- B. The FortiGate firmware version is different from the FortiManager ADOM version.
- **C. FortiGate has a BGP template assigned on the FortiManager database.**
- D. The administrator must use the Install Wizard and select Install device settings only to push BGP settings

Answer: C

Explanation:

If a BGP template is assigned to the FortiGate device on FortiManager, device-level BGP configurations made directly in the device-level database are overridden by the template settings, so the changes do not get pushed to the device.

NEW QUESTION # 46

Refer to the exhibit.

FORTINET									
FortiManager # diagnose dvm device list									
--- There are currently 6 devices/vdoms managed ---									
--- There are currently 6 devices/vdoms count for license ---									
TYPE	OID	SN	HA	IP	NAME	ADOM	IPS	FIRMWARE	Hw_GenX
fmgfaz-managed	188	FGVM02TM24013504		100.65.1.111	BR1-FGT-1	My_ADOM	7.0 MR6 (3401)	N/A	
- STATUS: dev-db: not modified; conf: in sync; cond: pending; dm: installed; conn: up; template:[modified]default									
- vdom:[3]root flags:0 adom:My_ADOM pkg:[imported]BR1-FGT-1									

Which two statements about the output are true? (Choose two.)

- A. The latest revision history for the managed FortiGate does match the FortiManager policy database.
- B. The system template default will override device-level database configurations.**
- C. The latest revision history for the managed FortiGate does not match the device-level database.**
- D. Configuration changes have been installed on FortiGate, updating policy and device-level database.

Answer: B,C

Explanation:

The status "pending" indicates the latest revision history does not match the device-level database, meaning there are unapplied changes.

The template is marked as [modified], so the system template default will override device-level database configurations when installed.

NEW QUESTION # 47

.....

Our FCP_FMG_AD-7.6 study materials perhaps can become your new attempt. In fact, learning our FCP_FMG_AD-7.6 study materials is a good way to inspire your spirits. In addition, it is necessary to improve your capacity in work if you want to make achievements. At present, many office workers choose to buy FCP_FMG_AD-7.6 our study materials to enrich themselves. If you still do nothing, you will be fired sooner or later. God will help those who help themselves. Come to snap up our FCP_FMG_AD-7.6 exam guide.
