New Salesforce B2C-Commerce-Architect Study Plan - B2C-Commerce-Architect Latest Braindumps Sheet

There is not much disparity among these versions of B2C-Commerce-Architect simulating practice, but they do helpful to beef up your capacity and speed up you review process to master more knowledge about the B2C-Commerce-Architect exam, so the review process will be unencumbered. Though the content of these three versions is the same, the displays of them are different. And you can try our B2C-Commerce-Architect Study Materials by free downloading the demos to know which one is your favorite.

Salesforce Certified B2C Commerce Architect Sample Questions (Q35-Q40):

NEW QUESTION # 35

A new version of the Page Show controller is required for implementation of Page Designer specific look. It requires implementation of a specific, cache period for Page Designer pages, which is not currently available in the base Storefront Reference Architecture (SFRA) cache.js module. What two steps should the Architect instruct the developer to implement?

Choose 2 answers

- A. Create new Page.js controller in client's cartridge. Extend the code from base and prepend the new cache middleware function to Page-Show route.
- B. Create new Page.js controller in client's cartridge. Copy code from base and modify the Page-Show route to include the new cache middleware function.
- C. Create new cache.js in client's cartridge. Extend cache.js from app_storefront_base and add a function for the Page Designer caching.
- D. Create new cache.js in client's cartridge. Copy cache.js from app_storefront_base and add a function for the Page Designer

caching

Answer: B,C

Explanation:

To implement a specific cache period for Page Designer pages in SFRA:

* Option A involves creating a new Page.js controller in the client's cartridge, where the existing Page- Show route can be modified to include a custom caching logic. This ensures that the specific caching requirements for Page Designer pages are met without altering the base functionality for other pages.

* Option D calls for extending the existing cache.js module in the client's cartridge to include a function specifically for Page Designer caching. This allows for reusing the existing caching logic while adding enhancements specific to the Page Designer pages, thus maintaining efficiency and clarity in the codebase.

Both options provide a clean, maintainable approach to customizing caching for specific requirements in SFRA, avoiding disruptions in other areas of the site functionality.

NEW QUESTION # 36

An existing B2C Commerce site has the following aliases configuration:

```
"www.example.com": [
  {
    "locale": "en_US",
  },
  {
    "locale": "de_DE",
    "if-site-path": "de"
  },
  {
    "locale": "en_US",
    "if-site-path": "us"
  },
  {
    "locale": "en_GB",
    "if-site-path": "uk"
  },
],
"www.example.de": [{
  "host": "www.example.com",
  "path": "de"
}],
"www.example.co.uk": [{
  "host": "www.example.com",
  "path": "uk"
}]
}]
```

Which statement related to this configuration is incorrect?

- A. Site supports multiple hostnames and locales.
- B. Hostname www.example.de will redirect to www.example.com/de.
- C. Hostname www.example.co.uk will redirect to www.example.com/uk.
- D. Hostname www.example.com will redirect to www.example.com/us

Answer: D

Explanation:

In the provided configuration, the incorrect statement is B. While it appears that the hostname www.example.com should redirect to www.example.com/us based on the "if-site-path": "us" entry, this assumes that the default path or redirect isn't overridden by other configurations within the hostname alias file not visible in the snapshot provided. Typically, in Salesforce B2C Commerce, such a direct statement about redirection should align with explicit mapping rules that include hostname and path directives, which are not detailed for www.example.com to www.example.com/us in the snippet provided. This absence suggests that the statement may be incorrect unless corroborated by additional detailed mappings in the full configuration file.

NEW QUESTION # 37

A company recently launched their ecommerce sites for three countries: Australia, New Zealand, and Singapore. The company is now looking to set up marketing automations using Marketing Cloud.

Their B2C Commerce is configured with two realms: ANZ and SE Asi

a. Each country has a site within their respective realm: Australia and New Zealand sites are within ANZ and Singapore is within SE Asia.

Which account hierarchy should a Solution Architect recommend for the Marketing Cloud set up?

- A. Use a single Marketing Cloud tenant and map business units to each site irrespective of the realm
- B. Use a single Marketing cloud tenant and map business units to each realm
- C. Use a separate Marketing Cloud tenant for each site
- D. Use a separate Marketing Cloud tenant for each realm and map business units to sites within each realm

Answer: A

NEW QUESTION # 38

An Order Management System (OMS) handles orders from multiple brandspecific sites, as part of the processing, the OMS sends the processing detail to be added at notes to the orders in B2C Commerce. These processing details are captured temporarily in custom objects, and are later processed by a batch Job that:

- * Processes the custom object to extract the orderid and note data.
 - * Tries to load the order.
 - * If the order is not found, it deletes the custom object and moves on.
 - * If the order is found, it updates notes In the Order, upon successful update of this order, it deletes the custom object.
- There is an Issue reported that the job is constantly failing and custom objects are growing in number. On investigating the production look the message below is being logged on each failure:

```
Processing of custom object lxoaknojd salesforce failed for order 500000001 and has an associated replacement order 100000001. Exception details: com.demandware.core.quota.QuotaLimitExceededException: Limit for quota 'object.OrderPO.relation.notes' exceeded. Limit is 1000, actual is 1001. at com.demandware.core.quota.QuotaExceedException.throwLimitExceed(QuotaExceededException.java:21) at com.demandware.core.quota.QuotaImpl.handleHardLimitViolation(QuotaImpl.java:333) at
```

What are three solution The Architect can take to fix this issue without losing meaningful data?

Choose 3 answers

- A. Using BM site import/export, softenthe<quota id="object.orderPo.relation.notes"> <custom- action>warn<custom- action> </quots>to make sure that neither order notes are lost and custom object is processed.
- B. Take the backup of the custom object and delete the custom object to ensure on the next job run the custom objects are getting processed.
- C. Engage B2C Commerce Support Team to soften the quota limit for "object.OrderPO.relation.notes"
- D. Take the backup of the Order as XML and delete the Order to ensure on the next job run, the custom objects are getting processed.
- E. Take the backup of the Order as XML and delete the notes from Order to ensure on the next jobrun the custom objects are getting processed.

Answer: B,C,E

Explanation:

When facing an issue with a growing number of custom objects due to the exceeded quota limit for order notes, effective solutions include:

- * Option C (Take the backup of the custom object and delete the custom object): This ensures that the data is preserved while freeing up space for new processes and reducing the load, allowing the job to continue running without the impediment of quota limits.
- * Option D (Engage B2C Commerce Support Team to soften the quota limit for 'object.OrderPO.relation.notes'): Increasing the quota limit can resolve the root cause of the issue by accommodating the actual business needs without compromising the integrity of order processing and note addition.
- * Option E (Take the backup of the Order as XML and delete the notes from Order): This allows the job to process the custom objects as intended in subsequent runs by clearing out space while ensuring the order data remains intact for business needs. These steps address the quota limit issue effectively without losing valuable order or note data, ensuring continuity and integrity of business operations.

NEW QUESTION # 39

The Client plans to deploy a new payment provider and Order Management System on its existing B2C Commerce website. They have asked an Architect to advise which environment it should use to conduct load testing of its new integrations.

Which environment should be used as the ideal environment for this kind of load test?

- A. The Production Instance of a rental Realm
- B. The Production instance of the existing Realm
- **C. The Development Instance of the existing Realm**
- D. The Development Instance of a rental Realm

Answer: C

NEW QUESTION # 40

.....

Of course, we also need to realize that it is very difficult for a lot of people to pass the exam without valid B2C-Commerce-Architect study materials in a short time, especially these people who have not enough time to prepare for the exam, that is why many people need to choose the best and most suitable B2C-Commerce-Architect Study Materials as their study tool. We believe that if you have the good B2C-Commerce-Architect study materials when you are preparing for the exam, it will be very useful and helpful for you to pass exam and gain the related certification successfully.

New B2C-Commerce-Architect Study Plan: <https://www.validdumps.top/B2C-Commerce-Architect-exam-torrent.html>

Then our B2C-Commerce-Architect study materials can give you some guidance for our professional experts have done all of these above matters for you by collecting the most accurate questions and answers, Undoubtly everyone wants to receive his or her Salesforce B2C-Commerce-Architect exam braindumps as soon as possible after payment, and especially for those who are preparing for the exam, just like the old saying goes "Time is money & time is life and when the idle man kills time, he kills himself." Our B2C-Commerce-Architect study materials are electronic exam materials, and we can complete the transaction in the internet, so our operation system only need a few minutes to record the information of you after payment before sending the Salesforce B2C-Commerce-Architect dumps torrent to you by e-mail automatically, Besides, rather than waiting for the gain of our B2C-Commerce-Architect practice guide, you can download them immediately after paying for it, so just begin your journey toward success now.

By default, this is the upper-left corner of the page, It starts by discussing hardware and operating system considerations, Then our B2C-Commerce-Architect study materials can give you some guidance for our professional experts B2C-Commerce-Architect have done all of these above matters for you by collecting the most accurate questions and answers.
