問題 #85

The Adapter Match Rules tab provides the developer the access to resolve match rule issues during interrogation of an application and during maintenance of the solution. The Match Rules tab contains four areas.

Drag each Area on the left to the correct Area Description.

Answer Area		Area	Area Description
Target			A filtered list of all the interrogated targets and similar targets found in the application
Match Rules			An editable grid of a highlighted target that also enables testing of the target's properties
Selected Target			A list of associated match rules and available match rules for the highlighted target
Selected Match Rule			A grid of a highlighted match rule that allows for rule customization, if necessary

答案:

解題說明:

Answer Area		Area	Area Description
Target	Match Rules		A filtered list of all the interrogated targets and similar targets found in the application
Match Rules	Selected Target		An editable grid of a highlighted target that also enables testing of the target's properties
Selected Target	Target		A list of associated match rules and available match rules for the highlighted target
Selected Match Rule	Selected Match Rule		A grid of a highlighted match rule that allows for rule customization, if necessary

Area

Target
Match Rules
Selected Target
Selected Match Rule

Answer Area

Area

Match Rules
Selected Target
Target
Selected Match Rule

Area Description

A filtered list of all the interrogated targets and similar targets found in the application

An editable grid of a highlighted target that also enables testing of the target's properties

A list of associated match rules and available match rules for the highlighted target

A grid of a highlighted match rule that allows for rule customization, if necessary

問題 #86

When interrogating a single-page web application, you need to create a container for the logical page view.

You decide to use the Select Element in the Interrogation Steps list, move the options to the Ordered Interrogation Steps column and place them in the correct order.

Interrogation Steps

- Select the control from the list.
- Drag and drop the bullseye icon to the control.
- On the Interrogation Form, select the **Select Element** interrogation option.
- Navigate to the view that contains the control.
- Click **Close** to close the dialog box.
- Click **Create Container**.

Ordered Interrogation Steps

答案:

解題說明:

interrogation steps

- Select the control from the list.
- Drag and drop the bullseye icon to the control.
- On the Interrogation Form, select the **Select Element** interrogation option.
- Navigate to the view that contains the control.
- Click **Close** to close the dialog box.
- Click **Create Container**.

Ordered Interrogation Steps

- Navigate to the view that contains the control.
- On the Interrogation Form, select the **Select Element** interrogation option.
- Drag and drop the bullseye icon to the control.
- Select the control from the list.
- Click **Create Container**.
- Click **Close** to close the dialog box.

Explanation:

- | Ordered Interrogation Steps | |
|-----------------------------|-----------------------------------------------------------------------------------|
| 1 | Navigate to the view that contains the control. |
| 2 | On the Interrogation Form, select the Select Element interrogation option. |
| 3 | Drag and drop the bullseye icon to the control. |
| 4 | Select the control from the list. |
| 5 | Click Create Container . |
| 6 | Click Close to close the dialog box. |

When interrogating a single-page web application (SPA), controls often reside within dynamic DOM regions or logical page views that reload content without changing the page URL.

To effectively interrogate such controls, developers must create containers that define a logical grouping for the dynamic content—allowing Pega Robot Studio to maintain proper context when referencing those controls.

According to the Pega Robotics System Design and Implementation Guide, section "Interrogating Single- Page Web Applications": "When interrogating single-page web applications (SPA), developers must first create a container that represents the logical view within which controls exist.

- * Navigate to the page or view where the target control appears.
- * In the Interrogation Form, select **Select Element** to enable control selection mode.
- * Use the Bullseye tool to highlight and select the control or parent HTML element.
- * From the list of detected controls, choose the desired control to bind.
- * Click **Create Container** to define the logical page grouping for the interrogated control.
- * Click **Close** to exit the dialog once the container has been successfully created." Detailed Step Reasoning:
 - * Navigate to the view that contains the control.
 - * Ensures that the desired control is visible within the web application's dynamic content area.
 - * On the Interrogation Form, select the **Select Element** interrogation option.
 - * Activates the **Select Element** mode, allowing you to interrogate web-based elements precisely.
 - * Drag and drop the bullseye icon to the control.
 - * Highlights the specific control in the web application that you want to interrogate.
 - * Select the control from the list.
 - * Confirms which element to bind from the list of detected elements in the DOM.
 - * Click **Create Container**.
 - * Creates a container object in the automation hierarchy that represents the logical view of the web application (essential for SPAs).
 - * Click **Close** to close the dialog box.
 - * Completes the interrogation process and finalizes the container creation.

Final Ordered Steps:

Order

Interrogation Step

1

Navigate to the view that contains the control.

2

On the Interrogation Form, select the Select Element interrogation option.

3

Drag and drop the bullseye icon to the control.

4

Select the control from the list.

5

Click Create Container.

6

Click Close to close the dialog box.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Interrogating Single-Page Applications and Creating Logical Containers section (Pega Robotics 19.1 and later).

問題 #87

Pega Robot Studio provides five rules on how to differentiate between cloneable application objects when using key assignments in automations. The first rule states that an event creates the instance to set the context of a cloneable object. The remaining four rules state the requirements for a key assignment.

In the Answer Area, determine if each rule description requires a key assignment.

<u>Rule Description</u>	<u>Key Assignment Required?</u>
An event from Child Context to Parent Context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment
An event from Parent Context to Child Context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment
Logic within the same context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment
An event from No Context to a Context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment

答案:

解題說明:

Answer Area

<u>Rule Description</u>	<u>Key Assignment Required?</u>
An event from Child Context to Parent Context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment
An event from Parent Context to Child Context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment
Logic within the same context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment
An event from No Context to a Context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment

<u>Rule Description</u>	<u>Key Assignment Required?</u>
An event from Child Context to Parent Context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment
An event from Parent Context to Child Context	<input type="checkbox"/> Does not require a key assignment <input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment
Logic within the same context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment
An event from No Context to a Context	<input type="checkbox"/> Does not require a key assignment <input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment

問題 #88

Which of the following controls cannot be added to the Windows form?

- A. PictureBox
- B. ComboBox
- C. ProgressBar
- **D. Pointer**

答案: D

問題 #89

While setting up Start My Day, the user makes some changes in the Manage Applications window to prioritize and manage the applications that are configured to launch using the Start My Day functionality.

Which of the following applications does the user see on the desktop after using the Start My Day functionality?

- A. CRM, BankerInsight
- B. Pega Finance, Notepad, BankerInsight
- C. Pega Finance, CRM, Notepad, BankerInsight
- D. CRM, Notepad, BankerInsight

答案： B

解題說明：

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

In Pega Robot Studio, the Start My Day (SMD) functionality allows a user to define and launch all required applications at once when starting work. The configuration of these applications is performed in the Manage Applications window, where each application can be individually enabled or disabled for automatic startup.

According to the Pega Robotics System Design and Implementation Guide, in the section "Start My Day Configuration and Manage Applications", the documentation specifies the following:

"Applications configured for Start My Day will launch automatically when the Start My Day feature is invoked.

The Manage Applications dialog lists all project applications and determines which ones are launched using the 'Enabled' checkbox. Only applications marked as enabled will be started when the user initiates Start My Day. Applications that are listed but not enabled remain closed." The screenshot in the question shows the following configuration under the Manage Applications window:

Application

Enabled

Type

Path

Pega Finance

Yes

Adapter

BankerInsight

Yes

Adapter

C:\Program Files (x86)\CRM Setup\CRM.exe

CRM

No

Exe

C:\Program Files (x86)\CRM Setup\CRM.exe

Notepad

Yes

Exe

C:\Windows\notepad.exe

From this configuration, the Enabled column indicates that the following applications will start automatically when Start My Day is triggered:

* Pega Finance

* BankerInsight

* Notepad

The CRM application is not enabled and therefore will not launch.

Option Analysis:

* Option A (Pega Finance, Notepad, BankerInsight): Correct, as these are the enabled applications.

* Option B (CRM, BankerInsight): Incorrect, because CRM is not enabled.

* Option C (CRM, Notepad, BankerInsight): Incorrect, because CRM is not enabled.

* Option D (Pega Finance, CRM, Notepad, BankerInsight): Incorrect, because CRM is not enabled.

Therefore, the correct answer is A. Pega Finance, Notepad, BankerInsight.

Reference:Extracted and verified from Pega Robotics System Design and Implementation Guide, Start My Day (SMD) Configuration and Application Management section (Pega Robotics 19.1 and later).

問題 #90
