### ACMP Global Certified Change Management Professional Sample Questions (Q45-Q50):

NEW QUESTION # 45

What refers to the extent to which an organization uses change management and project management methodologies, techniques, and tools?

- A. Change alignment
- B. Change absorption
- C. Change capacity
- **D. Change maturity**

**Answer: D**

Explanation:

"Change maturity" describes systematic, consistent use of methods, tools, and governance across initiatives.

ACMP encourages assessing organizational maturity to tailor approach and risk posture. Capacity/absorption relate to the volume/timing of changes; alignment relates to strategy fit. (Reference: ACMP Standard, Process Group 1 - Evaluate; Organizational context & maturity considerations for tailoring the approach.)

#### **NEW QUESTION # 46**

A state-owned company engaged in a change project faced a major issue related to its image as a socially responsible organization. What could the leaders do to ensure the outcomes remain consistent with the company vision?

- A. Take action to ensure stakeholders don't retreat to the prior current state condition
- **B. Make adjustments to the change management plan by adding, eliminating, or realigning change program components to reinforce the change**
- C. Observe and objectively measure sustained behaviors and attitudes throughout the process
- D. Leverage the communication plan to ensure that it supports the big picture of where the organization's strategic priorities are

**Answer: B**

Explanation:

To ensure alignment with its vision of being socially responsible, leaders should adjust the change management plan as needed - adding, eliminating, or realigning components. ACMP highlights that plans are dynamic and must evolve to remain consistent with organizational values and vision. While communication (C), measurement (D), and reinforcement (B) are valuable, the comprehensive approach is to realign the plan itself to reinforce vision consistency.

(Reference: ACMP Standard, Process Group 3 - Develop Plan; Guidance: Adjust plans as necessary to align with organizational vision and strategic priorities.)

#### **NEW QUESTION # 47**

During execution of the change management plan, what elements are combined to ensure the plan is carried out as intended?

- A. Timelines, communications and project plans
- B. Benefits realization plan, resource plan and sustainability plan
- C. Project schedule, stakeholder engagement plan and resource plan
- **D. Resources, strategies, timelines, communications and learnings**

**Answer: D**

Explanation:

Execution requires integration of resources, strategies, timelines, communications, and learning activities.

ACMP identifies these as the key building blocks of execution. Combining them ensures alignment between what is planned and what is implemented. While other options contain useful elements, option B comprehensively includes the essential factors needed to carry out the plan as designed.

(Reference: ACMP Standard, Process Group 4 - Execute; Activities: Coordinate resources, implement communications, deliver training, and manage resistance.)

#### **NEW QUESTION # 48**

As the project reaches completion, whose approval should be sought to formally close the change?

- A. Training Lead
- **B. Senior sponsor**
- C. Change Lead
- D. Project manager

**Answer: B**

Explanation:

Formal closure of a change management effort requires approval from the senior sponsor. This ensures the accountable executive validates that outcomes were achieved, ownership transferred, and sustainability measures are in place. The project manager approves project closure, while the change lead and training lead execute tasks but do not have the authority to formally close. Thus, the sponsor's approval is required to ensure accountability for benefits realization.

(Reference: ACMP Standard, Process Group 5 - Close; Activity: Seek formal sponsor approval for closure.)

#### NEW QUESTION # 49

What plan must be executed to ensure the results achieved through the adopted change are maintained?

- A. Human resource plan
- **B. Sustainability plan**
- C. Transition plan
- D. Stakeholder engagement plan

**Answer: B**

Explanation:

The sustainability plan ensures results are reinforced and maintained after initial adoption. ACMP explains that this plan integrates reinforcement mechanisms, monitoring adoption, aligning performance management, and recognizing behaviors. Transition plans (A) handle operational handoffs, stakeholder engagement (B) supports involvement, and human resource plans (D) address capacity. To ensure outcomes are sustained, the correct plan is the sustainability plan (C).

(Reference: ACMP Standard, Process Group 4 - Execute; Sustainability Plan ensures long-term adoption and embedding into operations.)
