

PDII Exam Format | Salesforce Complete PDII Exam Dumps: Platform Developer II Latest Released

P.S. Free & New PDII dumps are available on Google Drive shared by PrepAwayExam: <https://drive.google.com/open?id=1zKhzuakSVGb6TtBFTy5gGc4pIsEW9mmD>

The test software used in our products is a perfect match for Windows' PDII learning material, which enables you to enjoy the best learning style on your computer. Our PDII certification guide also use the latest science and technology to meet the new requirements of authoritative research material network learning. Unlike the traditional way of learning, the great benefit of our PDII learning material is that users can flexibly adjust their learning plans. We hope that our new design of PDII test questions will make the user's learning more interesting and colorful.

Salesforce Certified Platform Developer II (PDII) is an advanced certification designed for experienced Salesforce developers who want to demonstrate their expertise in building advanced applications on the Salesforce platform. Platform Developer II certification is for individuals who have completed the Salesforce Certified Platform Developer I certification and have at least two years of experience in developing on the Salesforce platform.

Salesforce PDII certification exam is intended for developers who have completed the Salesforce Certified Platform Developer I certification, which covers the basics of Salesforce development. The PDII Certification Exam focuses on advanced topics and is designed to test a developer's ability to design and implement complex solutions using the Salesforce platform.

The PDII exam consists of 60 multiple-choice questions and five programming assignments that test your ability to design, develop, and deploy custom applications on the Salesforce platform. To pass the exam, you need to score at least 65% on the multiple-choice section and complete all the programming assignments within the given time frame.

Which two interfaces can the developer implement to make the component available as a quick action?

Choose 2 answers

- A. Force:lightningQuicAction
- B. Force:hasObjectName

- C. Force:lightningQuickActionWithoutHeader
- D. Lightning QuickActionAPI
- E. Force:hasRecordId

Answer: A,B

NEW QUESTION # 127

When testing batch classes, what must a developer do?

- A. Call the class' "execute" method
- B. Use seeAllData=true
- C. Encapsulate code in Test.startTest() and Test.stopTest()
- D. Limit the amount of records you test to < 200

Answer: C,D

NEW QUESTION # 128

A Visualforce page loads slowly due to the large amount of data it displays. Which strategy can a developer use to improve the performance?

- A. Use lazy loading to load the data on demand, instead of the controller's constructor.
- B. Use an <apex:actionPoller> in the page to load all of the data asynchronously.
- C. Use Javascript to move data processing to the browser instead of the controller.
- D. Use the transient keywords for the List variables used in the custom controller.

Answer: A

NEW QUESTION # 129

A user receives the generic "An internal server error has occurred" while interacting with a custom Lightning component. What should the developer do to ensure a more meaningful message?

- A. Use an AuraHandledException in a try-catch block.
- B. Use platform events to process the error
- C. Add an error-view component to the markup.
- D. Add an onerror event handler to the tag

Answer: A

NEW QUESTION # 130

A developer is creating unit tests for code that makes SOAP web service callouts. The developer needs to insert some test data as a part of the unit tests setup.

What are three actions to enable this functionality? (Choose three.)

- A. Surround the callout with Test.startTest(), Test.stopTest()
- B. Implement the WebServiceMock interface
- C. Surround the data insertion with Test.startTest(), Test.stopTest()
- D. Implement the HttpCalloutMock interface
- E. Update code to call Test.setMock()

Answer: A,B,E

NEW QUESTION # 131
