

Amazon SCS-C02 Valid Exam Testking | New SCS-C02 Exam Experience

2026 Latest ITExamSimulator SCS-C02 PDF Dumps and SCS-C02 Exam Engine Free Share: <https://drive.google.com/open?id=1VjvvyumfNywx-DFpf-T95aNyIQQgf3a>

We have three different versions of AWS Certified Security - Specialty prep torrent for you to choose, including PDF version, PC version and APP online version. Different versions have their own advantages and user population, and we would like to introduce features of these versions for you. There is no doubt that PDF of SCS-C02 exam torrent is the most prevalent version among youngsters, mainly due to its convenience for a demo, through which you can have a general understanding and simulation about our SCS-C02 Test Braindumps to decide whether you are willing to purchase or not, and also convenience for paper printing for you to do some note-taking. As for PC version of our AWS Certified Security - Specialty prep torrent, it is popular with computer users, and the software is more powerful. Finally when it comes to APP online version of SCS-C02 test braindumps, as long as you open this study test engine, you are able to study whenever you like and wherever you are.

Amazon SCS-C02 Exam Syllabus Topics:

Topic	Details
Topic 1	Threat Detection and Incident Response: In this topic, AWS Security specialists gain expertise in crafting incident response plans and detecting security threats and anomalies using AWS services. It delves into effective strategies for responding to compromised resources and workloads, ensuring readiness to manage security incidents. Mastering these concepts is critical for handling scenarios assessed in the SCS-C02 exam.
Topic 2	Management and Security Governance: This topic teaches AWS Security specialists to develop centralized strategies for AWS account management and secure resource deployment. It includes evaluating compliance and identifying security gaps through architectural reviews and cost analysis, essential for implementing governance aligned with certification standards.
Topic 3	Security Logging and Monitoring: This topic prepares AWS Security specialists to design and implement robust monitoring and alerting systems for addressing security events. It emphasizes troubleshooting logging solutions and analyzing logs to enhance threat visibility.

Simulator For SCS-C02 Certification Exams

If you want to get a desirable opposition and then achieve your career dream, you are a right place now. Our SCS-C02 study tool can help you pass the exam. So, don't be hesitate, choose the SCS-C02 test torrent and believe in us. Let's strive to our dreams together. Life is short for us, so we all should cherish our life. Our SCS-C02 Guide Torrent can help you to save your valuable time and let you have enough time to do other things you want to do. Just buy our SCS-C02 exam questions, then you will pass the SCS-C02 exam easily.

Amazon AWS Certified Security - Specialty Sample Questions (Q253-Q258):

NEW QUESTION # 253

To meet regulatory requirements, a Security Engineer needs to implement an IAM policy that restricts the use of AWS services to the us-east-1 Region.

What policy should the Engineer implement?

- A.
- B. A computer code with text Description automatically generated

- C. A computer code with black text Description automatically generated

- D. A computer code with black text Description automatically generated

Answer: D

Explanation:

https://docs.aws.amazon.com/IAM/latest/UserGuide/reference_policies_examples_aws_deny-requested-region.h

NEW QUESTION # 254

A company is undergoing a layer 3 and layer 4 DDoS attack on its web servers running on IAM.

Which combination of IAM services and features will provide protection in this scenario? (Select THREE).

- A. IAM Certificate Manager (ACM)
- B. Amazon Route 53
- C. Amazon GuardDuty
- D. Amazon S3
- E. IAM Shield
- F. Elastic Load Balancer

Answer: C,E,F

NEW QUESTION # 255

A security engineer is troubleshooting a connectivity issue between a web server that is writing log files to the logging server in another VPC. The engineer has confirmed that a peering relationship exists between the two VPCs. VPC flow logs show that requests sent from the web server are accepted by the logging server, but the web server never receives a reply.

Which of the following actions could fix this issue?

- A. Add an outbound rule to the security group associated with the web server that allows requests to the logging server.
- B. Add an inbound rule to the security group associated with the logging server that allows requests from the web server.
- C. Add a route to the route table associated with the subnet that hosts the logging server that targets the peering connection.
- D. Add a route to the route table associated with the subnet that hosts the web server that targets the peering connection.

Answer: C

NEW QUESTION # 256

A company wants to receive an email notification about critical findings in AWS Security Hub. The company does not have an existing architecture that supports this functionality. Which solution will meet the requirement?

- **A. Create an Amazon EventBridge rule to detect critical Security Hub findings. Create an Amazon Simple Notification Service (Amazon SNS) topic as the target of the EventBridge rule. Subscribe an email endpoint to the SNS topic to receive published messages.**
- B. Create an AWS Lambda function to identify critical Security Hub findings. Create an Amazon Simple Notification Service (Amazon SNS) topic as the target of the Lambda function. Subscribe an email endpoint to the SNS topic to receive published messages.
- C. Create an Amazon EventBridge rule to detect critical Security Hub findings. Create an Amazon Simple Email Service (Amazon SES) topic as the target of the EventBridge rule. Use the Amazon SES API to format the message. Choose an email address to be the recipient of the message.
- D. Create an Amazon Kinesis Data Firehose delivery stream. Integrate the delivery stream with Amazon EventBridge. Create an EventBridge rule that has a filter to detect critical Security Hub findings. Configure the delivery stream to send the findings to an email address.

Answer: A

NEW QUESTION # 257

A company uses Amazon CloudWatch to monitor application metrics. A security engineer needs to centralize the metrics from several AWS accounts. The security engineer also must create a dashboard to securely share the metrics with customers. Which solution will meet these requirements?

- A. Set up a designated monitoring account. Configure the necessary permissions for a CloudWatch wizard to query the metrics from source accounts. Create a CloudWatch dashboard that includes the metrics. Share the dashboard by using SSO. Configure AWS IAM Identity Center as the SSO provider.
- B. Use AWS Resource Access Manager (AWS RAM) to share CloudWatch metrics between the accounts. Set up a designated monitoring account. Create a CloudWatch dashboard that includes the metrics. Share the dashboard. Specify the email addresses of users who can use a password to view the dashboard.
- **C. Set up a designated monitoring account. Configure the necessary permissions in CloudWatch for source accounts to send metrics to the monitoring account. Create a CloudWatch dashboard that includes the metrics. Share the dashboard by using SSO. Configure Amazon Cognito as the SSO provider.**
- D. Use AWS Resource Access Manager (AWS RAM) to share CloudWatch metrics between the accounts. Set up a designated monitoring account. Create a CloudWatch dashboard that includes the metrics. Share the dashboard by using SSO. Configure AWS IAM Identity Center as the SSO provider.

Answer: C

NEW QUESTION # 258
