Life is short for each of us, and time is precious to us. Therefore, modern society is more and more pursuing efficient life, and our AZ-900 Study Materials are the product of this era, which conforms to the development trend of the whole era. It seems that we have been in a state of study and examination since we can remember, and we have experienced countless tests, including the qualification examinations we now face. In the process of job hunting, we are always asked what are the achievements and what certificates have we obtained?

The Microsoft AZ-900 exam is available in multiple languages, and the test format comprises multiple-choice questions that need to be completed within 60 minutes. AZ-900 exam fee is \$99, and individuals who pass the exam receive the Microsoft Certified Azure Fundamentals certification. Microsoft Azure Fundamentals certification validates an individual's understanding of cloud computing and their ability to use Microsoft Azure to solve business problems.

Microsoft AZ-900 Exam covers a range of topics related to cloud computing and Azure services. These include understanding the benefits and considerations of cloud computing, identifying key Azure services, including compute, storage, and networking, and understanding Azure pricing and support options. AZ-900 exam also assesses an individual's knowledge of security, privacy, compliance, and trust in Azure, as well as their understanding of Azure management tools and monitoring.

In order to save your time and energy, you can install AZ-900 Test Engine on your phone or i-pad, so that you can study in your spare time. You will get a good score with high efficiency with the help of AZ-900 practice training tools.

Microsoft Azure Fundamentals Sample Questions (Q56-Q61):

NEW QUESTION # 56

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: No

Azure firewall does not encrypt network traffic. It is used to block or allow traffic based on source/destination IP address, source/destination ports and protocol.

Box 2: No

A network security group does not encrypt network traffic. It works in a similar way to a firewall in that it is used to block or allow traffic based on source/destination IP address, source/destination ports and protocol.

Box 3: No

The question is rather vague as it would depend on the configuration of the host on the Internet. Windows Server does come with a VPN client and it also supports other encryption methods such as IPsec encryption or SSL/TLS so it could encrypt the traffic if the Internet host was configured to require or accept the encryption.

However, the VM could not encrypt the traffic to an Internet host that is not configured to require the encryption.
