If you are prepared to take the AZ-801 exam with the help of excellent AZ-801 learning materials on our website, the choice is made brilliant. Our AZ-801 training materials are your excellent choices, especially helpful for those who want to pass the AZ-801 Exam without bountiful time and eager to get through it successfully. Besides that, our AZ-801 study questions have three versions: PDF version, Soft version and APP version, which can be interestinng and helpful for you to choose.

Microsoft AZ-801 is an advanced certification exam designed for IT professionals who have a deep understanding of Windows Server Hybrid technologies. AZ-801 exam validates their expertise in configuring and managing hybrid scenarios, which involves integrating on-premises and cloud-based solutions. Configuring Windows Server Hybrid Advanced Services certification covers a range of advanced topics, such as Azure AD, Azure Site Recovery, Azure Backup, and Azure File Sync, among others.

Microsoft Configuring Windows Server Hybrid Advanced Services Sample Questions (Q213-Q218):

NEW QUESTION # 213
You have an Azure subscription. The subscription contains a Log Analytics workspace named Workspace1 and 100 virtual machines that run Windows Server.
You enable Microsoft Defender for Servers Plan 2 and configure Defender for Servers to monitor for Windows file and registry changes on the virtual machines.

You need to query the detected file and registry changes. Which table should you query?

- A. DeviceRegistryEvents
- B. ASimFileEventLogs
- C. MDCDetectionFimEvents
- D. ASimRegistryEventlogs

Answer: C

NEW QUESTION # 214
You have a failover cluster named Cluster1 that contains three nodes.
You plan to add two file server cluster roles named File1 and File2 to Cluster1. File1 will use the File Server for general use role.
File2 will use the Scale-Out File Server for application data role.
What is the maximum number of nodes for File1 and File2 that can concurrently serve client connections? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Topic 1, Contoso, Ltd

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd. is a manufacturing company that has a main office in Seattle and branch offices in Los Angeles and Montreal.

Existing Environment

Active Directory Environment

Contoso has an on-premises Active Directory Domain Services (AD DS) domain named contoso.com that syncs with an Azure Active Directory (Azure AD) tenant. The AD DS domain contains the domain controllers shown in the following table.

Contoso recently purchased an Azure subscription.

The functional level of the forest is Windows Server 2012 R2. The functional level of the domain is Windows Server 2012. The forest has the Active Directory Recycle Bin enabled.

The contoso.com domain contains the users shown in the following table.

The contoso.com domain has the Group Policy Objects (GPOs) shown in the following table.

The contoso.com domain has the Password Settings Objects (PSOs) shown in the following table.

Server Infrastructure

The contoso.com domain contains servers that run Windows Server 2022 as shown in the following table.

By using Windows Firewall with Advanced Security, the servers have isolation connection security rules configured as shown in the following table.

Server4 has no connection security rules.

Server4 Configurations

Server4 has the effective Group Policy settings for user rights as shown in the following table.

Server4 has the disk configurations shown in the following exhibit.

Virtualization Infrastructure

The contoso.com domain has the Hyper-V failover clusters shown in the following table.

Technical Requirements

Contoso identifies the following technical requirements:

Promote a new server named DC4 that runs to Windows Server 2022 to a domain controller.

Replicate the virtual machines from Cluster2 to an Azure Recovery Services vault.

Centrally manage performance alerts in Azure for all the domain controllers.

Ensure that User1 can recover objects from the Active Directory Recycle Bin.

Migrate Share1 to Server2, including all the share and folder permissions.

Back up Server4 and all data to an Azure Recovery Services vault.
Use Hyper-V Replica to protect the virtual machines in Cluster3.
Implement BitLocker Drive Encryption (BitLocker) on Server4.
Whenever possible, use the principle of least privilege.

NEW QUESTION # 215

You have a server named Server1 that runs Windows Server.
On Server1, you create a Data Collector Set named CollectorSet1 based on the Basic template.
You need to configure CollectorSet1 to meet the following requirements:
Older performance counter logs must be overwritten by new ones.
Performance counter logging must stop if there is less than 500 MB of free disk space.
What should you configure for each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 216

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com. The domain contains the servers shown in the following table.
You need to migrate Site1 from Server 1 to Server2. The solution must meet the following requirements:
* Minimize how long it takes to perform the migration.
* Minimize administrative effort.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of cations to the answer area and arrange them in the correct order.

Answer:

Explanation:
Explanation:

NEW QUESTION # 217

You need to create a Hyper-V hyper-converged cluster that stores virtual machines by using Storage Spaces Owed Which three actions should you perform in sequence? To answer, move the appropriate anions from the list of actions to the answer area and arrange them in the correct order.

Answer:
