At QuestionsTube, you can read ARA-C01 free demo questions in pdf file, so you can check the questions and answers before deciding to download the Snowflake ARA-C01 practice questions. These free demo questions are parts of the ARA-C01 exam questions. Download and read them carefully, you will find that the ARA-C01 test questions of QuestionsTube will be your great learning materials online. Share some ARA-C01 exam online questions below.

1. An Architect needs to allow a user to create a database from an inbound share.

P.S. Free 2026 Snowflake ARA-C01 dumps are available on Google Drive shared by TorrentExam
<https://drive.google.com/open?id=1cLKapqS2nhC1XmYqR7NeUqG6Tc4Dzz1A>

Nowadays, all of us are living a fast-paced life and we have to deal with things with high-efficiency. We also develop our ARA-C01 practice materials to be more convenient and easy for our customers to apply and use. The most advanced operation system in our ARA-C01 Exam Questions which can assure you the fastest delivery speed, and your personal information will be encrypted automatically by our operation system. Within several minutes, you will receive our ARA-C01 study guide!

The Snowflake ARA-C01 certification exam and this will assist you to take the right decision for your career. The right decision is to enroll in the Snowflake ARA-C01 exam and start preparation with top-notch Snowflake ARA-C01 Exam Dumps. All Snowflake ARA-C01 practice test questions formats are ready for quick download.

ARA-C01 Latest Test Cost | ARA-C01 Exam Study Guide

The Practice Exam software is specially made for the students so they can feel real-based examination scenarios and feel some pressure on their brains and don't feel excessive issues while giving the final Snowflake exam. There are a lot of customers that are currently using SnowPro Advanced Architect Certification (ARA-C01) and are satisfied with it. TorrentExam has designed this

product after getting positive feedback from professionals and is rated one of the best study materials for the preparation of the Snowflake ARA-C01 exam.

Snowflake SnowPro Advanced Architect Certification Sample Questions (Q30-Q35):

NEW QUESTION # 30

A company is storing large numbers of small JSON files (ranging from 1-4 bytes) that are received from IoT devices and sent to a cloud provider. In any given hour, 100,000 files are added to the cloud provider. What is the MOST cost-effective way to bring this data into a Snowflake table?

- A. A stream
- B. An external table
- C. A copy command at regular intervals
- D. A pipe

Answer: D

Explanation:

Explanation

* A pipe is a Snowflake object that continuously loads data from files in a stage (internal or external) into a table. A pipe can be configured to use auto-ingest, which means that Snowflake automatically detects new or modified files in the stage and loads them into the table without any manual intervention1.

* A pipe is the most cost-effective way to bring large numbers of small JSON files into a Snowflake table, because it minimizes the number of COPY commands executed and the number of micro-partitions created. A pipe can use file aggregation, which means that it can combine multiple small files into a single larger file before loading them into the table. This reduces the load time and the storage cost of the data2.

* An external table is a Snowflake object that references data files stored in an external location, such as Amazon S3, Google Cloud Storage, or Microsoft Azure Blob Storage. An external table does not store the data in Snowflake, but only provides a view of the data for querying. An external table is not a cost-effective way to bring data into a Snowflake table, because it does not support file aggregation, and it requires additional network bandwidth and compute resources to query the external data3.

* A stream is a Snowflake object that records the history of changes (inserts, updates, and deletes) made to a table. A stream can be used to consume the changes from a table and apply them to another table or a task. A stream is not a way to bring data into a Snowflake table, but a way to process the data after it is loaded into a table4.

* A copy command is a Snowflake command that loads data from files in a stage into a table. A copy command can be executed manually or scheduled using a task. A copy command is not a cost-effective way to bring large numbers of small JSON files into a Snowflake table, because it does not support file aggregation, and it may create many micro-partitions that increase the storage cost of the data5.

NEW QUESTION # 31

How is the change of local time due to daylight savings time handled in Snowflake tasks? (Choose two.)

- A. Task schedules can be designed to follow specified or local time zones to accommodate the time changes.
- B. A task will move to a suspended state during the daylight savings time change.
- C. A task schedule will follow only the specified time and will fail to handle lost or duplicated hours.
- D. A task scheduled in a UTC-based schedule will have no issues with the time changes.
- E. A frequent task execution schedule like minutes may not cause a problem, but will affect the task history.

Answer: A,E

NEW QUESTION # 32

A group of Data Analysts have been granted the role analyst role. They need a Snowflake database where they can create and modify tables, views, and other objects to load with their own data. The Analysts should not have the ability to give other Snowflake users outside of their role access to this data.

How should these requirements be met?

- A. Grant ANALYST_ROLE ownership on the database, but grant the ownership on future [object type] s in database

privilege to SYSADMIN.

- B. Grant SYSADMIN ownership of the database, but grant the create schema privilege on the database to the ANALYST_ROLE.
- C. Grant ANALYST_ROLE OWNERSHIP on the database, but make sure that ANALYST_ROLE does not have the MANAGE GRANTS privilege on the account.
- D. Make every schema in the database a managed access schema, owned by SYSADMIN, and grant create privileges on each schema to the ANALYST_ROLE for each type of object that needs to be created.

Answer: C

Explanation:

Granting ANALYST_ROLE OWNERSHIP on the database allows the analysts to create and modify tables, views, and other objects within the database. However, to prevent the analysts from giving other Snowflake users outside of their role access to this data, the ANALYST_ROLE should not have the MANAGE GRANTS privilege on the account. The MANAGE GRANTS privilege enables a role to grant or revoke privileges on any object in the account, regardless of the ownership of the object¹.

Therefore, by removing this privilege from the ANALYST_ROLE, the analysts can only grant or revoke privileges on the objects that they own within the database, and not on any other objects in the account².

The other options are not correct because:

B) Granting SYSADMIN ownership of the database and granting the create schema privilege on the database to the ANALYST_ROLE would allow the analysts to create schemas within the database, but not to create or modify tables, views, or other objects within those schemas. The analysts would need to have the create [object type] privilege on each schema to create or modify objects within the schema³.

C) Making every schema in the database a managed access schema, owned by SYSADMIN, and granting create privileges on each schema to the ANALYST_ROLE for each type of object that needs to be created would allow the analysts to create and modify objects within the schemas, but not to grant or revoke privileges on those objects. A managed access schema is a schema that requires explicit grants for any access to the objects within the schema, regardless of the ownership of the objects⁴. Therefore, the analysts would need to have the grant privilege on each schema to grant or revoke privileges on the objects within the schema.

D) Granting ANALYST_ROLE ownership on the database and granting the ownership on future [object type] s in database privilege to SYSADMIN would allow the analysts to create and modify objects within the database, but also to grant or revoke privileges on those objects. The ownership on future [object type] s in database privilege enables a role to automatically become the owner of any new object of the specified type that is created in the database. Therefore, by granting this privilege to SYSADMIN, the analysts would not be able to prevent SYSADMIN from accessing or modifying the objects that they create within the database.

NEW QUESTION # 33

Which of the following ingestion methods can be used to load near real-time data by using the messaging services provided by a cloud provider?

- A. Spark
- B. Snowflake Connector for Kafka
- C. Snowpipe
- D. Snowflake streams

Answer: B

Explanation:

Snowflake Connector for Kafka and Snowpipe are two ingestion methods that can be used to load near real-time data by using the messaging services provided by a cloud provider. Snowflake Connector for Kafka enables you to stream structured and semi-structured data from Apache Kafka topics into Snowflake tables.

Snowpipe enables you to load data from files that are continuously added to a cloud storage location, such as Amazon S3 or Azure Blob Storage. Both methods leverage Snowflake's micro-partitioning and columnar storage to optimize data ingestion and query performance. Snowflake streams and Spark are not ingestion methods, but rather components of the Snowflake architecture.

Snowflake streams provide change data capture (CDC) functionality by tracking data changes in a table. Spark is a distributed

computing framework that can be used to process large-scale data and write it to Snowflake using the Snowflake Spark Connector.

NEW QUESTION # 34

Which of the below query will you run to get the approximate number of distinct values in a table?

- A. `select approx_count_distinct(column1) from table1;`
- B. `select approx_count(column1) from table1;`
- C. `select count_distinct(column1 approx) from table1;`

Answer: A

NEW QUESTION # 35

.....

Consistent practice with it relieves exam stress and boosts self-confidence. The web-based ARA-C01 practice exam does not require additional software installation. All operating systems also support this SnowPro Advanced Architect Certification (ARA-C01) practice test. We update our SnowPro Advanced Architect Certification (ARA-C01) pdf format regularly so keep calm because you will always get updated SnowPro Advanced Architect Certification (ARA-C01) questions.

ARA-C01 Latest Test Cost: <https://www.torrentexam.com/ARA-C01-exam-latest-torrent.html>

All the ARA-C01 test dumps are helpful, so our reputation derives from quality, Perhaps you still have doubts about our ARA-C01 study tool, Gear up your ARA-C01 Latest Test Cost - SnowPro Advanced Architect Certification learning experience with PDF files because now you can prepare ARA-C01 Latest Test Cost - SnowPro Advanced Architect Certification exam even when you are on the go. 25% Exclusive Discount on Practice Exam + PDF Get 25% special discount on ARA-C01 Latest Test Cost - SnowPro Advanced Architect Certification Dumps when bought together, It is well known that TorrentExam provide excellent Snowflake ARA-C01 exam certification materials.

What you described here is very realistic and accurate view on the subject ARA-C01 Latest Test Cost that is so often misstreated by lots of trendy hype, Gain as much practical programming experience as possible through school projects, internships, and self-driven projects one of the questions that ARA-C01 employers are most certainly going to ask you is what kinds of applications and websites do you create on your own time just for fun.

Free PDF Quiz ARA-C01 - High Hit-Rate SnowPro Advanced Architect Certification Visual Cert Exam

All the ARA-C01 test dumps are helpful, so our reputation derives from quality, Perhaps you still have doubts about our ARA-C01 study tool, Gear up your SnowPro Advanced Architect Certification learning experience with PDF files because now you can prepare SnowPro Advanced Architect Certification exam even when you ARA-C01 Exam Study Guide are on the go. 25% Exclusive Discount on Practice Exam + PDF Get 25% special discount on SnowPro Advanced Architect Certification Dumps when bought together.

It is well known that TorrentExam provide excellent Snowflake ARA-C01 exam certification materials, There are multiple Snowflake ARA-C01 practice exam guidelines available at TorrentExam that you can use to improve your current situation.
