MB-820 Reliable Test Cram, Latest MB-820 Exam Bootcamp

All of the traits above are available in this web-based MB-820 practice test of Actual4dump. The main distinction is that the Microsoft MB-820 online practice test works with not only Windows but also Mac, Linux, iOS, and Android. Above all, taking the MB-820 web-based practice test while preparing for the examination does not need any software installation. Furthermore, MS Edge, Internet Explorer, Opera, Safari, Chrome, and Firefox support the web-based Microsoft MB-820 practice test of Actual4dump.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q107-Q112):

NEW QUESTION # 107
You are developing a codeunit for a company that uses Business Central.

The code unit must be run only during installation of an extension package.

You need to create the codeunit.

How should you complete the code' To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Subtype: Install

Trigger: OnInstallAppPerCompany

You are developing a codeunit that should only run during the installation of an extension package.

Options:

* Subtype: The correct subtype is Install, as it indicates that the codeunit runs only when the extension is being installed.

* Trigger: The correct trigger for running during installation is OnInstallAppPerCompany, which handles code execution when the app is installed for a specific company.

NEW QUESTION # 108

You need to access the RoomsAPI API from the canvas app.

What should you do?

- A. Use the default API configuration in Business Central
- B. Enable the APIs for the Business Central online environment.
- C. Include in the extension a codeunit of type Install that publishes RoomsAPI.
- D. Open the Web Services page and publish the RoomsAPI page as a web service.

Answer: D

Explanation:

* API Publishing for Extensions:

* In Business Central, when creating custom APIs like RoomsAPI, it is important to ensure that they are automatically published during the installation or upgrade of the extension.

* To achieve this, you can include a codeunit of type Install in the extension that explicitly publishes the custom API (RoomsAPI) as a web service. This ensures that it is available for use immediately after the extension is deployed without requiring manual intervention.

* Codeunit Type:

* A codeunit of type Install runs when the extension is installed or upgraded. This type of codeunit can be used to perform setup tasks such as publishing web services or APIs like RoomsAPI.

* Why Not Other Options?

* Option A (default API configuration): This would not automatically publish the RoomsAPI.

Default APIs do not cover custom APIs.

* Option B (enable APIs for the environment): Enabling APIs in Business Central allows the standard APIs to be used, but custom APIs still need to be manually published.

* Option C (publish via Web Services page): This would work but requires manual intervention to publish RoomsAPI, which does not fulfill the requirement of automatic publishing during installation.

Reference Documentation:

* Publishing APIs in Extensions

* Codeunit Types in Business Central

NEW QUESTION # 109

You need to create the code related to the Subcontract Documents table to meet the requirement for the quality department.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
