In the process of preparing the passing test, our B2C-Commerce-Architect guide materials and service will give you the oriented assistance. We can save your time and energy to arrange time schedule, search relevant books and document, ask the authorized person. As our study materials are surely valid and high-efficiency, you should select us if you really want to Pass B2C-Commerce-Architect Exam one-shot. With so many advantages of our B2C-Commerce-Architect training engine to help you enhance your strength, would you like have a look at our process of using B2C-Commerce-Architect study materials?

Salesforce Certified B2C Commerce Architect certification is a valuable credential for architects who want to demonstrate their expertise in designing and architecting B2C Commerce solutions. It helps candidates stand out in the job market and opens up new career opportunities. With the growing demand for B2C Commerce solutions, this certification is becoming increasingly important for architects who want to stay ahead of the competition.

Salesforce B2C-Commerce-Architect Certification Exam measures a candidate's ability to design, implement, and manage complex B2C Commerce solutions. It requires a deep understanding of the platform's capabilities, as well as a mastery of key concepts such as data modeling, site design, and integration with other systems. Candidates must also be able to identify and resolve issues that arise during the development process, and ensure that solutions meet business requirements.

Passing Salesforce certification B2C-Commerce-Architect exam can not only chang your work and life can bring, but also consolidate your position in the IT field. But the fact is that the passing rate is very low.

## Salesforce Certified B2C Commerce Architect Sample Questions (Q25-Q30):

**NEW QUESTION # 25**
Given a website launched to production, the Architect can rely on several SFCC Business Manager tools that provide an automatic notification feature.
Which three tools have such a feature and do not require to be monitored manually?
Choose 3 answers

- A. Job Schedules
- B. Quota Status
- C. Custom Log Settings
- D. Pipeline Profiler

- E. Analytics Conversion Reports

**Answer: A,B,D**

Explanation:
The Salesforce B2C Commerce Business Manager tools that feature automatic notifications are:
Option A (Job Schedules): Business Manager can send notifications based on job schedules, alerting users when a scheduled job has completed, failed, or met specific conditions. This feature helps in monitoring automated processes without manual oversight.
Option D (Pipeline Profiler): This tool provides automatic notifications regarding the performance of different pipelines, allowing architects and developers to monitor site performance and troubleshoot issues proactively.
Option E (Quota Status): Automatically notifies administrators when certain quotas are reached or exceeded, such as API call limits or data storage limits, which is crucial for maintaining site stability and performance.
These tools are essential for proactive site management, ensuring that administrators can address potential issues before they affect the site's operation.

**NEW QUESTION # 26**
During implementation, the team found that there is a notification controller exposed for an external service that marks the order as paid when notification is received. The notification URL is sent to the service together with the payment request and contains only the URL with orderID as the parameter.
What should the Architect recommend to the team in order to prevent the unauthorized usage of the controller to mark the orders as paid?

- A. Add a customer number in the callback URL and match the customer number against the one stored on the order.
- B. Add HTTPS restriction to the controller start node.
- C. Add an order token in the callback URL and match the token against the one stored on the order.
- D. Add a session attribute and validate it on the callback.

**Answer: C**

Explanation:
To enhance the security of the notification controller exposed for marking orders as paid, the recommended approach is to add an order-specific token to the callback URL (Answer C). This token should be verified against a stored value on the order to ensure the authenticity and integrity of the payment notification. This method prevents unauthorized use of the controller, as only callbacks containing the correct, order-specific token would be allowed to mark orders as paid. This strategy is essential in maintaining secure and reliable transaction processes within Salesforce B2C Commerce.

**NEW QUESTION # 27**
A company is using both Service Cloud and B2C Commerce but they are not using Mulesoft or any other integration middleware and do not plan on adding that in the near future. However, there is a need to keep customer records in sync across both Service Cloud and B2C Commerce. When a change to the customer record in Service Cloud takes place, such as an updated customer name, the same customer record should be updated in B2C Commerce. Assume that there is a common ID that uniquely identifies the customer across the two systems.
How should a Solution Architect deliver the desired functionality?

- A. Send a platform event from Service Cloud and subscribe to the platform event in B2C Commerce using the built-in functionality
- B. Send an Outbound Message from Service Cloud and catch and handle the Outbound Message using the B2C Commerce APIs
- C. Use change data capture to send a message from Service Cloud and catch and handle the message using B2C Commerce Service Cloud Connector
- D. Develop a custom solution in Service Cloud to consume and communicate with B2C Commerce APIs

**Answer: A**

**NEW QUESTION # 28**
The developer has been given the following business requirement:
The shipping method, "Free Standard Ground Shipping" has an exclusion for products with 'category equals or is child of

electronics-televisions.' The marketing department has scheduled a sale offering a "Free Standard Ground Shipping" method for brand XyzTv televisions for the next 3 months.
What method accomplishes this while following best practices'

- A. Extend the code in cartridge/models/shipping/shippingMethod.js using module.superModule and add an exception for the specified brand.
- B. Create a new shipping method and label it "Free Standard Ground Shipping". Give it the qualifier 'brand equals XyzTv', and add it to the checkout options.
- C. Create an allow list for the existing shipping method by adding a product exclusion for 'brand equals XyzTv' to the exclusion list fo<" "Free Standard Ground Shipping."
- D. Extend the CheckoutShippingServices controller using module.superModule and add an exception for the specified brand.

**Answer: D**

**NEW QUESTION # 29**
The Client is Crowing and decided to migrate its ecommerce website to B2C Commerce. The Client provided the Architect with the f metrics for its existing website over the past 12 months and forecasted into the next year:
Noting these historical metrics and the forecasted growth of 300%, which load test targets meet best practices for testing the new B2C Commerce site?

- A. 1500 visits per hour, 30000 page views per hour, and 375 orders per hour
- B. 15000 visits per hour, 300000 page views per hour, and 3750 orders per hour
- C. 150000 visits per hour, 3000000 page views per hour, and 37500 orders per hour
- D. 3000 visits per hour, 60000 page views per hour, and 750 orders per hour

**Answer: B**

Explanation:
Considering the existing metrics and forecasted 300% growth, the appropriate load testing targets for the new B2C Commerce site would be:
* 15000 visits per hour: This figure is calculated by applying the expected growth to the peak visits per hour (1000 visits), resulting in 4000 visits. The choice of 15000 provides a higher buffer to accommodate unforeseen spikes in traffic.
* 300000 page views per hour: Similarly, this is scaled up from the peak page views per hour (20000) considering the growth, ensuring the site can handle high demand and interactions.
* 3750 orders per hour: This target is based on the peak orders per hour (250) with the growth applied, allowing testing of the system's ability to handle transactions under significant load.
These targets ensure that the system is robust enough to handle increased traffic and transactions without performance degradation, crucial for maintaining customer satisfaction and operational stability.

**NEW QUESTION # 30**
.....

The Salesforce Certified B2C Commerce Architect (B2C-Commerce-Architect) certification is a valuable credential that every Salesforce professional should earn it.
