## **Efficient Salesforce Ind-Dev-201 Valid Exam Tips Are Leading Materials & The Best Ind-Dev-201: Salesforce Certified Industries CPQ Developer**

As we have become the leader in this career and our experts have studying the Ind-Dev-201 exam braindumps for many years and know every detail about this subject. So our Ind-Dev-201 simulating exam is definitely making your review more durable. To add up your interests and simplify some difficult points, our experts try their best to design our Ind-Dev-201 Study Material and help you understand the learning guide better.

### **Salesforce Certified Industries CPQ Developer Sample Questions (Q151-Q156):**

#### **NEW QUESTION # 151**

Which four of the following would require compatibility rules?

Note: This question displayed answer options in random order when taking this Test.

- A. Only DSL customers can purchase a modem
- B. VPN Access can only be delivered over high speed internet
- C. MetroE cannot be delivered to Consumer customers
- D. Apple iPhone requires SIM card
- E. High Def set top box is required for High Def TV packages

**Answer: A,B,D,E**

Explanation:

In Salesforce Industries CPQ (formerly Vlocity), compatibility rules are used to ensure that certain products are compatible or require other products in order to function properly or meet certain conditions. Here's a breakdown of the answer:

- \* A. Apple iPhone requires SIM card - This is a direct compatibility rule where one product (iPhone) necessitates another product (SIM card).
  - \* C. VPN Access can only be delivered over high speed internet - This is another compatibility rule that specifies a delivery condition based on the underlying service (high-speed internet).
  - \* D. Only DSL customers can purchase a modem - This condition specifies that the purchase of one product (modem) is contingent on the customer having another product or service (DSL), which is a compatibility rule.
  - \* E. High Def set top box is required for High Def TV packages - Similar to A, this specifies that to use one product (High Def TV packages), another product (High Def set top box) is required.
- Option B, "MetroE cannot be delivered to Consumer customers," is more of an eligibility or exclusion rule rather than a compatibility rule.

#### NEW QUESTION # 152

What do you use to take 20% off the price of a child product in a promotion?

Note: This question displayed answer options in random order when taking this Test.

- A. A price list
- B. An override
- C. An adjustment
- D. A price list entry

**Answer: C**

Explanation:

To take 20% off the price of a child product in a promotion, you would use an "adjustment." Adjustments in Vlocity CPQ allow for the modification of prices by a percentage or fixed amount, directly influencing the price based on specific promotional rules or conditions. This method is highly effective for applying discounts in a dynamic and flexible manner, accommodating various promotional strategies.

#### NEW QUESTION # 153

How can you create a quote from an existing asset?

- A. From the Orders tab
- B. Using the Change to Quote action button
- C. From the Quotes tab
- D. From the Opportunities tab

**Answer: B**

Explanation:

To create a quote from an existing asset in Salesforce Industries CPQ, you can utilize the "Change to Quote" action button. This feature is designed to streamline the process of generating new quotes based on existing assets, thereby facilitating upselling, contract renewals, or modifications. This action converts the details and configurations of an existing asset into a quote, allowing for efficient re-use of existing data and ensuring consistency in customer engagements.

#### NEW QUESTION # 154

Document sections within a Vlocity Document Template can be conditionally included based on which two items?

Note: This question displayed answer options in random order when taking this Test.

- A. Browser Version
- **B. Merge codes**
- **C. Advanced Entity Filters**
- D. Products

**Answer: B,C**

Explanation:

In Salesforce Industries (Vlocity) document templates, document sections can be conditionally included based on Advanced Entity Filters and Merge Codes. Advanced Entity Filters allow the template to include or exclude sections based on specific data points or criteria related to the entities being used in the document (e.

g., customer data, product types). Merge Codes are placeholders in the template that dynamically pull in data or content based on the underlying data model and specific conditions, allowing for highly customized and relevant document generation.

#### **NEW QUESTION # 155**

Entity Filters are tied to a single Advanced Rule.

- **A. False**
- B. True

**Answer: A**

Explanation:

Entity Filters in Salesforce Industries CPQ (formerly Vlocity CPQ) are not exclusively tied to a single Advanced Rule. Instead, they can be associated with multiple rules, depending on the complexity and needs of the configuration. This flexibility allows Entity Filters to be reused across different rules, enhancing efficiency and reducing redundancy in rule setup.

\* False (B): Entity Filters are designed to be modular and reusable, allowing them to be applied across various scenarios and rules within the Salesforce Industries CPQ environment.

#### **NEW QUESTION # 156**

.....

To prepare successfully in a short time, you need a trusted platform of real and updated Salesforce Ind-Dev-201 exam dumps.
