SAP C-S4CPR-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Migration and Business Process Testing: This section of the exam measures skills of a SAP Data Migration Analyst and covers the tools and processes used to migrate legacy data into SAP S • 4HANA Cloud. It includes preparation, validation, execution of data loads, and conducting business process testing to ensure data accuracy and system readiness.
Topic 2	• Implementation and Configuration for Sourcing and Procurement: This section of the exam measures skills of a SAP Sourcing and Procurement Consultant and covers the core configuration tasks required to set up sourcing and procurement processes in SAP S • 4HANA Cloud. It includes implementing purchase requisitions, purchase orders, approvals, sourcing, and invoice management while ensuring alignment with organizational procurement needs.
Topic 3	• System Landscapes and Identity Access Management: This section of the exam measures skills of a SAP System Administrator and covers basic understanding of the SAP S • 4HANA Cloud system architecture, including identity and access management concepts. It focuses on setting up user roles, managing authorizations, and maintaining secure system access within the SAP landscape.

Topic 4	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of a SAP Implementation Specialist and covers how to configure and personalize the SAP Fiori Launchpad. It includes understanding app management, tile groups, catalogs, and business roles to ensure a user-friendly and efficient experience for end users.
Topic 5	• Introduction to Cloud Computing and SAP Cloud ERP Deployment Options: This section of the exam measures skills of a Cloud ERP Consultant and covers foundational knowledge of cloud computing and SAP S • 4HANA Cloud deployment options. It provides insights into multi-tenant vs single-tenant models and helps determine the best fit for customer requirements.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q66-Q71):

NEW QUESTION # 66
Which of the following are captured in a completed Digital Discovery Assessment?Note: There are 2 correct answers to this question.

- A. SAP Fiori application extensions
- B. Target customer go-live date
- C. Business role requirements
- D. Known integration requirements

Answer: C,D

NEW QUESTION # 67
From which document can you create an RFQ?

- A. Purchase Contract
- B. Purchase Order
- C. Scheduling Agreement
- D. Purchase Requisition

Answer: D

Explanation:
In SAP S/4HANA Cloud Public Edition, aRequest for Quotation (RFQ)can be created from aPurchase Requisition, which serves as the source document for procurement needs. Below is an explanation of the correct answer:
* Purchase Requisition (B):A purchase requisition is an internal request for goods or services. From this document, an RFQ can be generated to solicit bids from suppliers.
* Scheduling Agreement (A):A scheduling agreement is a long-term procurement agreement with predefined delivery schedules and cannot be used to create an RFQ.
* Purchase Contract (C):A purchase contract is a formal agreement with a supplier and is not used to generate RFQs.
* Purchase Order (D):A purchase order is a legally binding document issued to a supplier after the RFQ process, so it cannot be used to create an RFQ.

NEW QUESTION # 68

Which scope item covers the requisitioning of raw materials and goods for production?

- A. Procurement of Direct Materials (J45)
- B. Quality Management in Procurement (1FM)
- C. Requisitioning (18J)
- D. Consumable Purchasing (BNX)

Answer: A

Explanation:
The scope item "Procurement of Direct Materials (J45)" specifically covers the requisitioning of raw materials and goods for production. Here's why this is the correct answer:
* Procurement of Direct Materials (J45):This scope item focuses on the procurement of materials that are directly used in the production process. It includes functionalities such as creating purchase requisitions, managing material requirements planning (MRP), and ensuring timely availability of raw materials for production.
* Requisitioning (18J):The Requisitioning scope item is more generic and covers the creation of purchase requisitions for various purposes, including indirect materials and services. It does not specifically focus on direct materials for production.
* Consumable Purchasing (BNX):This scope item is tailored for purchasing consumable materials, such as office supplies or maintenance materials, which are not directly tied to production processes.
* Quality Management in Procurement (1FM):This scope item deals with quality inspections and assurance in procurement processes but does not address the requisitioning of raw materials for production.

NEW QUESTION # 69

Which of the following apps can you use to extend the organizational data of an already existing material /product in SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. Manage Product Master Data
- B. Change Material
- C. Create Material
- D. Manage Source Data Products

Answer: A,B

Explanation:
In SAP S/4HANA Cloud Public Edition, extending the organizational data of an already existing material /product can be achieved through specific apps designed for managing and modifying master data. Here's a detailed explanation of the correct answers:
* Manage Product Master Data (A):This app allows users to manage product master data across different organizational levels, such as plants, sales organizations, and distribution channels. It is particularly useful for extending the organizational data of an existing material by adding or modifying attributes relevant to specific organizational units. This app provides a centralized interface to handle various aspects of product data.
* Change Material (B):The "Change Material" app is used to modify existing material master records. It allows users to update or extend the organizational data for materials in different organizational contexts, such as plant-specific or purchasing-related data. This app is essential when you need to make changes to existing materials without creating new ones.
* Create Material (C):This app is used to create new material master records rather than extending or modifying existing ones. Therefore, it is not suitable for extending the organizational data of an already existing material.
* Manage Source Data Products (D):This app is related to managing source data for products, typically used in procurement processes to define sources of supply. It does not directly deal with extending organizational data for existing materials.
