NEW QUESTION # 44
Which is NOT a Scrum Value?

- A. Openness
- B. Focus
- C. Commitment
- D. Drive

Answer: D

Explanation:
Comprehensive and Detailed Explanation (concise, policy-compliant):
Scrum is built on five explicit values that guide behavior and decisions: Commitment, Focus, Openness, Respect, and Courage. These values support Scrum's empirical foundations-transparency, inspection, and adaptation-by fostering trust, candor, and accountability within the team and with stakeholders. "Commitment" underscores owning goals and the Definition of Done; "Focus" directs effort toward Sprint and Product Goals; "Openness" encourages visibility of work and issues; "Respect" sustains a collaborative, professional environment; and "Courage" enables tackling hard problems and being transparent about progress and impediments. "Drive" is not one of the five Scrum values. While individual motivation matters, Scrum emphasizes collective commitment and sustainable pace over generic notions of "drive." Therefore, among the options provided, Drive is the one that is not a Scrum value.

NEW QUESTION # 45
Which of the following statements about an agile approach to projects is true?
Deploying the Solution incrementally throughout the project to validate the solution.
Early release of Solution Increments helps test assumptions about value.

- A. Both 1 and 2 are true
- B. Neither 1 or 2 is true
- C. Only 1 is true
- D. Only 2 is true

Answer: A

Explanation:
Comprehensive and Detailed Explanation (verified, paraphrased from AgilePM principles):
AgilePM promotes incremental and iterative delivery, aiming to deploy usable increments early and often. Regular deployment and demonstration validate fitness for purpose, expose risks sooner, and provide empirical feedback for planning. Early release of increments also tests assumptions about value with real users and stakeholders, informing prioritization (e.g., MoSCoW) and shaping subsequent increments. This approach supports continuous learning, sharper benefits focus, and stronger financial governance, because funding and scope decisions can be based on evidence from working solution slices rather than predictions. Hence, both statements accurately reflect agile project delivery.
