

ZDTA Flexible Learning Mode & ZDTA Certification Exam

FACILITATING ASSESSMENT IN FLEXIBLE LEARNING AND DIFFERENT MODES IN INSTRUCTIONAL DELIVERY

1. Select summative assessment method to use

The key to selecting the summative assessment to use is **course alignment**. According to Memorial University's Center for Innovation in Teaching and Learning, course alignment means that the learning outcomes or objectives, assessments, and activities are all interconnected. These three support one another and are not independent from each other. We note that the verb from the learning outcomes can also serve as a basis when deciding what assessment we can use to meet the learning objective.

If you are planning to pass the ZDTA exam, you can choose our ZDTA practice materials as your learning material since our products are known as the most valid exam engine in the world, which will definitely be beneficial to your preparation for exams. There are many impressive advantages of our ZDTA Study Guide. And our ZDTA actual exam will be definitely conducive to realizing the dream of obtaining the certificate.

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Cyberthreat Protection Services: This domain targets Cybersecurity Analysts and covers broad cybersecurity fundamentals and advanced threat protection capabilities. Candidates must know about malware protection, intrusion prevention systems, command and control channel detection, deception technologies, identity threat detection and response, browser isolation, and incident detection and response. Data Protection Services
Topic 2	<ul style="list-style-type: none"> • Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.
Topic 3	<ul style="list-style-type: none"> • Identity Services: This section of the exam measures skills of Identity and Access Management Engineers and covers foundational identity services including authentication and authorization protocols such as SAML, SCIM, and OIDC. Candidates should understand identity administration tasks and how to manage policies and audit logs within the Zscaler platform.
Topic 4	<ul style="list-style-type: none"> • This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.
Topic 5	<ul style="list-style-type: none"> • Zscaler Digital Experience: This section evaluates Network Performance Analysts on their knowledge of Zscaler Digital Experience (ZDX), including understanding the ZDX score, architectural overview, features, functionalities, and practical use cases to optimize digital user experiences.

2026 Pass-Sure ZDTA Flexible Learning Mode | Zscaler Digital Transformation Administrator 100% Free Certification Exam

ZDTA study engine is very attentive to provide a demo for all customers who concerned about our products, whose purpose is to allow customers to understand our product content before purchase. Many students suspect that if ZDTA learning material is really so magical? Does it really take only 20-30 hours to pass such a difficult certification exam successfully? It is no exaggeration to say that you will be able to successfully pass the exam with our ZDTA Exam Questions.

Zscaler Digital Transformation Administrator Sample Questions (Q53-Q58):

NEW QUESTION # 53

How does Zscaler Risk360 quantify risk?

- A. The number of risk events is totaled by location and combined.
- B. Time to mitigate each identified risk is totaled, averaged, and tracked to show ongoing trends.
- C. A risk score is computed based on the number of remediations needed compared to the industry peer average.
- D. A risk score is computed for each of the four stages of breach.

Answer: C

Explanation:

Zscaler Risk360 quantifies risk by computing a risk score that is based on the number of remediations needed in comparison to the industry peer average. This approach allows organizations to understand their relative security posture by evaluating how many issues require remediation and benchmarking that against peers in the industry. This methodology enables prioritized risk management and provides context around the urgency and scale of remediation activities necessary to reduce risk.

Unlike simply counting risk events or focusing on time to mitigate, Risk360 uses this comparative remediation-based scoring to give a comprehensive view of risk. It does not compute separate scores for each of the four breach stages but rather aggregates remediation efforts and benchmarks them to industry standards.

This is confirmed by the study guide's explanation of Risk360's scoring method, highlighting the use of remediation counts compared to peers as the basis for risk scoring.

NEW QUESTION # 54

Which of the following is a common use case for adopting Zscaler's Data Protection?

- A. Prevent loss to Internet and Cloud Apps
- B. Securely connect users to Private Applications
- C. Prevent download of Malicious Files
- D. Reduce your Internet Attack Surface

Answer: A

Explanation:

A common use case for adopting Zscaler's Data Protection is to prevent data loss to Internet and Cloud Apps. Data protection focuses on detecting and stopping sensitive data exfiltration or leakage to unauthorized destinations over web and cloud channels.

While reducing the attack surface and blocking malicious downloads are important security functions, they are addressed by other Zscaler capabilities such as threat protection. Secure connection to private apps is covered by ZPA, not data protection.

The study guide emphasizes that data protection's primary purpose is to safeguard sensitive data from being lost or leaked to internet or cloud applications.

NEW QUESTION # 55

What Malware Protection setting can be selected when setting up a Malware Policy?

- A. Bypass
- B. Block
- C. Isolate
- D. Do Not Decrypt

Answer: B

Explanation:

The valid Malware Protection setting selectable when configuring a Malware Policy in Zscaler is Block. This setting instructs the platform to block malicious files or activities detected by malware scanning engines.

Other settings like Isolate or Bypass are not standard malware policy actions in Zscaler's malware protection configuration. The "Do Not Decrypt" option relates to SSL inspection settings, not malware policy actions.

The study guide specifies "Block" as the primary malware policy action to enforce protection.

NEW QUESTION # 56

Which of the following methods can be used to notify an end-user of a potential DLP violation in Zscaler's Workflow Automation solution?

- A. SMS text message.
- **B. Notifications in MS Teams / Slack**
- C. Automated phone call.
- D. Twitter post with custom hashtan

Answer: B

Explanation:

Zscaler's Workflow Automation integrates with collaboration platforms like Microsoft Teams and Slack to send real-time DLP violation alerts directly to end-users.

NEW QUESTION # 57

How is the relationship between App Connector Groups and Server Groups created?

- A. Both App Connector Groups and Server Groups are linked together via the Data Center element
- B. When you create a new App Connector Group you must select the list of Server Groups to which it provides visibility
- C. The relationship between App Connector Groups and Server Groups is established dynamically in the Zero Trust Exchange as users try to access Applications
- **D. When a new Server Group is created it points to the App Connector Groups that provide visibility to this Server Group**

Answer: D

Explanation:

When you create a Server Group in the ZPA admin console (or via API/Infrastructure-as-Code), you explicitly select which App Connector Groups should serve that Server Group. Those connector groups are then used to advertise reachability and steer traffic to the included application servers.

NEW QUESTION # 58

.....

We have first-rate information protection system, if you purchasing ZDTA exam materials from us, we can ensure you that the safety of your email box. We respect your privacy and will never send junk email to you. ZDTA exam dumps of us are also high-quality, and will help you pass the exam and get the certificate successfully. What's more, we have professional online chat service staff, if you have any questions about the ZDTA Exam Materials, just have a conversation with them. We will give you reply as quickly as possible.
