The AWS-Developer quiz torrent we provide is compiled by experts with profound experiences according to the latest development in the theory and the practice so they are of great value. Please firstly try out our product before you decide to buy our product. It is worthy for you to buy our AWS-Developer Exam Preparation not only because it can help you pass the AWS-Developer exam successfully but also because it saves your time and energy. Your satisfactions are our aim of the service and please take it easy to buy our AWS-Developer quiz torrent.

To be eligible for the AWS Certified Developer - Associate certification exam, candidates must have a minimum of one year of experience in developing and maintaining applications on the AWS platform. They should also possess a strong understanding of AWS services, including AWS Lambda, AWS Elastic Beanstalk, AWS CloudFormation, and AWS CodeDeploy. AWS-Developer Exam is designed to test a candidate's ability to design, develop, and deploy scalable, highly available, and fault-tolerant applications on the AWS platform, as well as their ability to use AWS services to implement security and compliance controls. Passing the exam demonstrates that a developer has the skills and knowledge needed to build and deploy applications on the AWS platform, making them an asset to any organization that uses AWS services.

The authoritative, efficient, and thoughtful service of AWS-Developer practice paper will give you the best user experience, and you can also get what you want with our AWS-Developer study materials. I hope our AWS-Developer study materials can accompany you to pursue your dreams. If you can choose AWS-Developer free training materials, we will be very happy. We look forward to meeting you. With the help of our AWS-Developer learning guide, you will get more opportunities than others, and your dreams may really come true in the near future.

Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample Questions (Q54-Q59):

NEW QUESTION # 54

A user has configured an automated backup between 5 AM ?5:30 AM for the MySQL RDS DB. Will the performance of RDS get frozen momentarily during a backup?

- A. No
- B. Yes, always
- C. Yes, provided it is a single zone implementation

- D. Yes, only if the instance size is smaller than large size

Answer: C

Explanation:

Amazon RDS provides two different methods for backing up and restoring the Amazon DB instances. A brief I/O freeze, typically lasting a few seconds, occurs during both automated backups and DB snapshot operations on Single-AZ DB instances.

NEW QUESTION # 55

A developer maintains applications that store several secrets in AWS Secrets Manager. The applications use secrets that have changed over time. The developer needs to identify required secrets that are still in use. The developer does not want to cause any application downtime.

What should the developer do to meet these requirements?

- **A. Create a secrets manager-secret-unused AWS Config managed rule. Create an Amazon EventBridge rule to Initiate notification when the AWS Config managed rule is met.**
- B. Configure an AWS CloudTrail log file delivery to an Amazon S3 bucket. Create an Amazon CloudWatch alarm for the GetSecretValue. Secrets Manager API operation requests
- C. Configure AWS X-Ray for the applications. Create a sampling rule to match the GetSecretValue Secrets Manager API operation requests.
- D. Deactivate the applications secrets and monitor the applications error logs temporarily.

Answer: A

Explanation:

This solution will meet the requirements by using AWS Config to monitor and evaluate whether Secrets Manager secrets are unused or have been deleted, based on specified time periods. The secrets manager-secret- unused managed rule is a predefined rule that checks whether Secrets Manager secrets have been rotated within a specified number of days or have been deleted within a specified number of days after last accessed date. The Amazon EventBridge rule will trigger a notification when the AWS Config managed rule is met, alerting the developer about unused secrets that can be removed without causing application downtime.

Option A is not optimal because it will use AWS CloudTrail log file delivery to an Amazon S3 bucket, which will incur additional costs and complexity for storing and analyzing log files that may not contain relevant information about secret usage. Option C is not optimal because it will deactivate the application secrets and monitor the application error logs temporarily, which will cause application downtime and potential data loss.

Option D is not optimal because it will use AWS X-Ray to trace secret usage, which will introduce additional overhead and latency for instrumenting and sampling requests that may not be related to secret usage.

NEW QUESTION # 56

A Security Engineer is looking for a way to control access to data that is being encrypted under a CMK. The Engineer is also looking to use additional authenticated data (AAD) to prevent tampering with ciphertext.

Which action would provide the required functionality?

- A. Use IAM policies to restrict access to Encryptand DecryptAPI actions.
- **B. Use key policies to restrict access to the appropriate IAM groups.**
- C. Pass the key alias to AWS KMS when calling Encryptand DecryptAPI actions.
- D. Use kms:EncryptionContextas a condition when defining IAM policies for the CMK.

Answer: B

Explanation:

Explanation/Reference: <https://docs.aws.amazon.com/crypto/latest/userguide/crypto-ug.pdf>

NEW QUESTION # 57

A user is running a webserver on EC2. The user wants to receive the SMS when the EC2 instance utilization is above the threshold limit. Which AWS services should the user configure in this case?

- **A. AWS CloudWatch + AWS SNS.**

- B. AWS CloudWatch + AWS SQS.
- C. AWS EC2 + AWS Cloudwatch.
- D. AWS CloudWatch + AWS SES.

Answer: A

Explanation:

Amazon SNS makes it simple and cost-effective to push to mobile devices, such as iPhone, iPad, Android, Kindle Fire, and internet connected smart devices, as well as pushing to other distributed services. In this case, the user can configure that Cloudwatch sends an alarm on when the threshold is crossed to SNS which will trigger an SMS.

NEW QUESTION # 58

A user has launched 10 instances from the same AMI ID using Auto Scaling. The user is trying to see the average CPU utilization across all instances of the last 2 weeks under the CloudWatch console. How can the user achieve this?

- A. View the Auto Scaling CPU metrics
- B. The user has to use the CloudWatch analyser to find the average data across instances
- C. It is not possible to see the average CPU utilization of the same AMI ID since the instance ID is different
- D. Aggregate the data over the instance AMI ID

Answer: A

NEW QUESTION # 59

.....

A good deal of researches has been made to figure out how to help different kinds of candidates to get AWS-Developer certification. We revise and update the AWS-Developer test torrent according to the changes of the syllabus and the latest developments in theory and practice. We base the AWS-Developer Certification Training on the test of recent years and the industry trends through rigorous analysis. Therefore, for your convenience, more choices are provided for you, we are pleased to suggest you to choose our AWS-Developer exam question for your exam.
