- C. To act as the liaison between the customer and SAP Support in resolving technical issues and manage customer escalations
- D. To perform configuration changes required to the SAP Ariba Strategic Sourcing suite solutions

**Answer: C**

### NEW QUESTION # 22

How can you define default values on fields?

- A. Default values are not permitted
- B. Set only for Constant values
- C. Default values must be manually entered by the user
- D. Set as Constants or Expressions based on other field values

**Answer: D**

### NEW QUESTION # 23

If you add a custom field to the ContractWorkspace class, which other class(es) will that field be added to?

- A. InternalContractWorkspace and SalesContractWorkspace
- B. AbstractContractWorkspace
- C. ContractRequest
- D. SalesContractRequest and InternalContractRequest

**Answer: A**

### NEW QUESTION # 24

During the configuration of a new custom field, after it's been saved but before the field has been Published, you realize that you set the wrong type of the field.

What is the next step you should take to resolve the issue?

- A. Delete the field and create a new field with the same name and the intended field type
- B. Clear and recreate the field with same field name and the intended field type
- C. Mark the field as Hidden, and create a new field with a slightly different name and the intended field Type
- D. Change the field Type by selecting the intended type in the dropdown and Save

**Answer: A**

### NEW QUESTION # 25

When performing migration to production for a Greenfield customer, which item needs to be made available in Production prior to creating the migration package in Intelligent Configuration Manager (ICM)?

- A. Users
- B. Locations
- C. Translations
- D. Approval Rules

**Answer: C**

Explanation:

Before creating and deploying migration packages with the Intelligent Configuration Manager (ICM), translation string resource files (custom field labels, help tips, validation messages, etc.) must be uploaded into Production via AML & Translations Upload. This ensures that migration bundles referencing these translations do not cause missing label or localization issues post-migration. Locations, users, and approval rules are either migrated as part of configuration packages or managed separately, and do not require prior upload to Production before creating migration packages.
