It is a challenging exam and not a traditional exam. But complete SAP C-TS414-2023 exam preparation can enable you to crack the SAP C-TS414-2023 exam easily. For the quick and complete SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management (C-TS414-2023) exam preparation you can trust C-TS414-2023 Exam Practice test questions. The SAP C-TS414-2023 exam practice test questions have already helped many SAP C-TS414-2023 exam candidates in their preparation and success.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q57-Q62):

NEW QUESTION # 57

An inspection plan group includes multiple inspection plans with different group counters. What determines the selected inspection plan when you create an inspection lot?

- A. Lot size
- B. Material type
- C. Procurement type of the material
- D. Sample size

Answer: A

Explanation:

In SAP S/4HANA QM, an inspection plan group contains multiple inspection plans, each identified by a unique group counter.

When an inspection lot is created (e.g., for goods receipt or production), the system must select the appropriate plan from the group:

* Lot Size (D): The lot size of the inspection lot is the primary determinant for selecting an inspection plan. In the inspection plan header (transaction QP01/QP02), you define a "usage" and "lot size range" for each plan within the group. The system matches the inspection lot's size to the applicable lot size range in the plan, ensuring the correct plan is chosen. This is standard behavior in QM (e.g., for inspection lot origin 01 or 03).

* Sample Size (A): Sample size is determined by the sampling procedure within the inspection plan, not the other way around. It doesn't select the plan.

* Material Type (B): Material type influences material master settings but does not directly determine the inspection plan selection within a group.

* Procurement Type of the Material (C): Procurement type (e.g., in-house vs. external) might influence the inspection type, but it doesn't select between plans in a group.

Thus, "Lot size" is the correct answer, as it aligns with SAP's logic for task list selection. References: SAP Help Portal - "Inspection Planning with Task Lists"; SAP S/4HANA QM User Guide - "Inspection Lot Creation".

NEW QUESTION # 58

For which structure elements of a quality notification can you assign a status profile? Note : 2 correct answer

- A. Items
- B. Activities
- C. Follow up actions
- D. Header
- E. Tasks

Answer: D,E

NEW QUESTION # 59

Which of the following can you use to explore released APIs?

- A. SAP Business Accelerator Hub
- B. SAP Integration Suite
- C. SAP Application Interface Framework

Answer: A

Explanation:

To explore released APIs in SAP S/4HANA:

* SAP Business Accelerator Hub (B): Formerly SAP API Business Hub, this is the official platform (<https://api.sap.com>) to explore,

test, and access released APIs for SAP S/4HANA, including QM- related APIs (e.g., Inspection Lot API). It's the standard tool as of 2025.

* SAP Application Interface Framework (A): AIF is for monitoring and managing interfaces, not exploring APIs.

* SAP Integration Suite (C): This is for building integrations, not a primary API exploration tool.

Thus, "SAP Business Accelerator Hub" is the correct answer (single-choice context assumed).References:

SAP Help Portal - "SAP Business Accelerator Hub"; SAP S/4HANA Developer Guide - "APIs".

NEW QUESTION # 60

Which catalogue types require the use of selection sets? Correct 2

- A. Actions
- B. Usage decision
- C. Characteristic
- D. Defect type
- E. Tasks

Answer: B,C

NEW QUESTION # 61

You have configured the system so that inspection lots are created for delivery items automatically. What does the system do if no results for the inspection lot have been recorded, and you change the material quantity in the delivery item?

- A. Cancel the current inspection lot and create a new one
- B. Create a new inspection lot with the different quantity
- C. Block the current inspection lot from processing
- D. Change the actual lot quantity of the current inspection lot

Answer: D

Explanation:

For an existing inspection lot tied to a delivery item (e.g., inspection type 10) with no results recorded:

* Change the Actual Lot Quantity of the Current Inspection Lot (A): If the delivery item quantity changes (VL02N), the system updates the inspection lot's quantity to match (status CRTD or INSP), as long as no results are recorded. This maintains synchronization without creating a new lot (SPRO > QM

> Quality Inspection > Inspection Lot Creation > Define Inspection Lot Update).

* Cancel and Create a New One (B): Cancellation and recreation occur only if the item is deleted, not just quantity-changed.

* Create a New Inspection Lot (C): A new lot isn't created for a quantity change; the existing lot adjusts.

* Block the Current Inspection Lot (D): Blocking isn't triggered by quantity changes in this scenario.

Thus, "Change the actual lot quantity of the current inspection lot" is the correct answer. References: SAP Help Portal - "Inspection Lot Updates"; SAP S/4HANA QM User Guide - "Delivery Integration".

NEW QUESTION # 62

.....

There is no doubt that the C-TS414-2023 certification is a popular exam in the industry. And, C-TS414-2023 is one of the most demanded certifications by the Cisco. We at Prep4sureExam, provide the money back guarantee on our C-TS414-2023 practice exam questions and training material. Our C-TS414-2023 certified professional team continuously works on updated exam content with Latest C-TS414-2023 Questions. If you want to clear the C-TS414-2023 exam in the best way, then you can utilize the best quality products and services provided by us. Our C-TS414-2023 PDF questions have all the updated question answers for C-TS414-2023 exams.
