## Heroku-Architect Valid Braindumps Ppt & Heroku-Architect 100% Exam Coverage

With the help of Heroku-Architect guide questions, you can conduct targeted review on the topics which to be tested before the exam, and then you no longer have to worry about the problems that you may encounter a question that you are not familiar with during the exam. With Heroku-Architect Learning Materials, you will not need to purchase any other review materials. Please be assured that with the help of Heroku-Architect learning materials, you will be able to successfully pass the exam.

### Salesforce Certified Heroku Architect Sample Questions (Q113-Q118):

#### NEW QUESTION # 113

A client is building a collection of Heroku applications that will be audited regularly. To comply with the audit, it must be guaranteed that the applications all forward their logs to the same, single destination. Which solution meets this requirements?

- A. Deploy all the applications to the same Shield Private Space with Private Space Logging enabled
- B. Deploy all the applications to the same Private Space with Logplex disabled.
- C. Deploy all the applications to the Common runtime, and add the same log drain URL to all of them.
- D. Deploy all of the applications to the Common Runtime, and attach the same instance of a logging add-on to all of them.

**Answer: A**

#### NEW QUESTION # 114

Universal Containers (UC) has an app that allows a customer to schedule a compute-intensive job. It allows the customer to schedule the job on an ad-hoc basis. UC has decided to break up the app into the following services: - Website: an Interface for their customers; - Billing: generates monthly invoices based on usage metrics; - Traffic Cop: manages the job queue, job definitions and job schedule; - Job Runner; runs jobs that Traffic Cop queues up. It is responsible for self-inspection and self-scaling. UC also wants to create a data lake for analytics. What foundational technology and design should an Architect use to manage communication between these services?

- A. Apache Kafka on Heroku Create a Kafka queue for each service. Create a central routing service that connects to all of the Kafka queues and routes data. The central router is attached to a data lake, and pushes every message into it.
- B. Heroku Connect and Salesforce Sync all relevant data into Salesforce and allow it to flow into each service Create custom objects for each service and allow them to post to each others' objects as needed. Push data from Salesforce into Heroku Postgres for a data lake.
- C. Apache Kafka on Heroku as a bus between all services Create topics for billing, jobs, and website clicks Create an additional service, which will subscribe for all topics, and dump every message into a data lake
- D. Heroku Redis, create a large Redis store. Allow each service to place messages with an agreed-upon format into a single queue, backed by the Redis store Services listen for messages addressed to them and take action on them. Redis will serve as the data lake.

**Answer: C**

Explanation:

#### NEW QUESTION # 115

A RESTful API is:

- A. A web-based service that provides standard ways for clients to make requests and receive responses
- B. How the web displays data in a hierarchical format readable by both people and machines
- C. A methodology (or maximizing the effectiveness of any vacation
- D. An Actually Pretty Informative meditation session

**Answer: C**

#### NEW QUESTION # 116

Which Heroku features should an Architect recommend to create a secure connection between Heroku and Microsoft Azure?

- A. Heroku Private Spaces and Private Space Peering, using Azure's VPC Peering.
- B. Heroku Shield Private Spaces and Internal Routing, using Azure's built-in VPN endpoint
- C. Heroku Private Spaces and Private Space VPN Connections, using Azure's built-in VPN endpoint.
- D. Heroku Private Spaces and Private Space VPN Connections, using a compatible VPN endpoint on Azure

**Answer: D**

Explanation:

### NEW QUESTION # 117

An app has two web dynos, Dyno A and Dyno B.

The app receives a request, which is routed to Dyno A.

A second request is sent from the same client. Which Dyno is the request routed to?

- A. The request is definitely routed to Dyno B.
- B. The request is definitely routed to Dyno A.
- C. The request is routed to Dyno A if it has finished handling the first request
- **D. The request is routed randomly to Dyno A or Dyno B**

**Answer: D**

Explanation:
