Reliable ISO-IEC-27001-Foundation Dumps Book & ISO-IEC-27001-Foundation Practice Tests

Our product is revised and updated according to the change of the syllabus and the latest development situation in the theory and the practice. The ISO-IEC-27001-Foundation exam torrent is compiled elaborately by the experienced professionals and of high quality. The contents of ISO-IEC-27001-Foundation guide questions are easy to master and simplify the important information. It conveys more important information with less answers and questions, thus the learning is easy and efficient. The language is easy to be understood makes any learners have no obstacles. The ISO-IEC-27001-Foundation Test Torrent is suitable for anybody no matter he or she is in-service staff or the student, the novice or the experience people who have worked for years. The software boosts varied self-learning and self-assessment functions to check the results of the learning.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 2	<ul style="list-style-type: none">• Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 3	<ul style="list-style-type: none">• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 4	<ul style="list-style-type: none">• Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
Topic 5	<ul style="list-style-type: none">• Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 6	<ul style="list-style-type: none">• Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 7	<ul style="list-style-type: none">• Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q49-Q54):

NEW QUESTION # 49

Which benefit is NOT relevant by implementing an ISMS for an organization?

- A. Information security controls are tailored to suit the organization's specific circumstances
- B. Information security staff will be qualified to ISO/IEC 27001 Foundation level
- C. Information security compliance will increase stakeholder trust in the organization
- D. Information security risks are assessed and the probability and/or impact reduced

Answer: B

Explanation:

The benefits of implementing an ISMS under ISO/IEC 27001 are well established. Clause 0.1 (General) explains that an ISMS provides a systematic approach to managing sensitive information and "preserves confidentiality, integrity, and availability of information by applying a risk management process and gives confidence to interested parties that risks are adequately managed." Option A is correct as a benefit, since trust and confidence from stakeholders is an outcome of compliance.

Option C is also a benefit, since controls are chosen and tailored based on organizational context and risk assessment (Clause 6.1.3). Option D reflects another real benefit—reducing the probability and/or impact of incidents through effective risk management. However, staff qualifications (option B) are not guaranteed benefits of implementing an ISMS. While training and competence (Clause 7.2) are required, the standard does not require or provide ISO/IEC 27001 Foundation-level certification for staff. That is an external training/certification scheme, not an ISMS outcome.

Therefore, the benefit NOT relevant to implementing ISO/IEC 27001 is B.

NEW QUESTION # 50

Identify the missing words in the following sentence.

The organization shall establish, implement, maintain and [?] an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document.

- A. communicate the importance of
- B. enforce standards for
- C. report on
- **D. continually improve**

Answer: D

Explanation:

Clause 4.4 of ISO/IEC 27001:2022 states:

"The organization shall establish, implement, maintain and continually improve an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document." This requirement highlights that an ISMS is not static; it must evolve continuously to adapt to new risks, technologies, and business changes. Options A, C, and D are not mentioned in the clause. The continual improvement cycle is central to ISO standards, aligning with the Plan-Do-Check-Act (PDCA) model.

Thus, the missing words are "continually improve."

NEW QUESTION # 51

What activity is done first when preparing for an initial certification audit?

- A. Provide evidence that nonconformities from an internal audit have been actioned
- **B. Agree the scope of the ISMS with the Certification Body auditor**
- C. Provide records to the Certification Body auditor for the Stage 2 audit
- D. Provide documents to the Certification Body auditor for the Stage 1 audit

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001:2022 standards and certification guidance:

Before a certification audit can begin, the scope of the ISMS must be clearly defined and agreed with the Certification Body.

ISO/IEC 27001 Clause 4.3 requires: "The scope shall be available as documented information." Certification Bodies require this scope statement to plan audit duration, resources, and coverage. Only after the scope is agreed does the Stage 1 audit begin, which reviews documented information and readiness. Stage

2 focuses on implementation and effectiveness. Evidence of corrective actions (C) is checked at Stage 2 if issues were identified earlier. Records provision (D) occurs during Stage 2, not first.

Thus, the first step in preparing for certification is A: Agreeing the scope of the ISMS with the Certification Body auditor.

NEW QUESTION # 52

Which audit activity related to ISO/IEC 27001 may be carried out by a practitioner?

- **A. Conduct an internal audit of the organization**
- B. Conduct a surveillance audit of their own area of the organization
- C. Conduct an audit of a Certification Body
- D. Conduct an audit of an Accredited Training Organization

Answer: A

Explanation:

ISO/IEC 27001 requires internal audits and sets out how they must be conducted: "The organization shall conduct internal audits at planned intervals..." (9.2.1) and "plan, establish, implement and maintain an audit programme(s)... [and] select auditors and conduct audits that ensure objectivity and the impartiality of the audit process" (9.2.2). These extracts confirm that practitioners (internal to the organization) can conduct internal audits provided objectivity and impartiality are ensured (e.g., they do not audit their own work). Surveillance audits (option A) and audits of Accredited Training Organizations or Certification Bodies (options C, D) are third-party activities outside the remit of an internal practitioner under ISO/IEC 27001; the standard's audit requirement is focused on the organization's own internal audit programme. Therefore, conducting an internal audit (B) is the correct practitioner activity per Clause 9.2.

NEW QUESTION # 53

Which of the following statements about the relationship between ISO/IEC 27001 and ISO/IEC 27002 is true?

* ISO/IEC 27002 provides implementation advice on the controls selected during the ISO/IEC 27001 information security risk management process

* ISO/IEC 27002 provides a process for information security risk management which implements the requirements of ISO/IEC 27001

- A. Only 2 is true
- B. Both 1 and 2 are true
- C. Only 1 is true
- D. Neither 1 or 2 is true

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001 & 27002:2022 standards:

ISO/IEC 27001 Annex A lists reference controls. ISO/IEC 27002 provides detailed guidance on the implementation of those controls, including purpose, guidance, and examples. Clause 6.1.3 of ISO/IEC

27001 makes the link explicit: controls from Annex A are referenced, but ISO/IEC 27002 explains how to implement them.

However, ISO/IEC 27002 does not provide a process for risk management—that is covered by ISO/IEC

27005. Risk management requirements are in ISO/IEC 27001 (Clauses 6.1.2 and 6.1.3).

Therefore, statement 1 is true, but statement 2 is false. Correct answer: A.

NEW QUESTION # 54

.....

Are you tired of feeling overwhelmed and unsure about how to prepare for the ISO-IEC-27001-Foundation exam? Are you ready to take control of your future and get the ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) certification you need to accelerate your career? If so, it's time to visit ExamsReviews and download real APMG-International ISO-IEC-27001-Foundation Exam Dumps. Our team of experts has designed a ISO-IEC-27001-Foundation Exam study material that has already helped thousands of students just like you achieve their goals. We offer a comprehensive ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) practice exam material that is according to the content of the ISO-IEC-27001-Foundation test.
