NEW QUESTION # 218

You need to automatically apply a sensitivity label to documents that contain information about your company's network including computer names, IP addresses, and configuration information.

Which two objects should you use? Each correct answer presents part of the solution. (Choose two.) NOTE: Each correct selection is worth one point.

- A. a sensitive info type that uses keywords
- B. a data loss prevention (DLP) policy
- C. a sensitive info type that uses a regular expression
- D. a custom trainable classifier
- E. an Information protection auto-labeling policy
- F. a sensitivity label that has auto-labeling

Answer: D,F

Explanation:

However, if the label contains trainable classifiers as a label condition:

- When the label conditions contain just trainable classifiers, you won't see the option to automatically create an auto-labeling policy.

- When the label conditions contain trainable classifiers and sensitive info types, an auto-labeling policy will be created for just the sensitive info types.
