SAP C-S4CPB-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Introduction to Cloud Computing and SAP Cloud ERP Basics: This section of the exam measures skills of ERP Implementation Project Manager and assesses foundational knowledge of cloud computing principles and SAP Cloud ERP structure. It ensures understanding of key differences from on-premise ERP, cloud deployment benefits, and basic navigation of cloud ERP systems.
Topic 2	<ul style="list-style-type: none">• Extensibility and Integration: This section of the exam measures skills of SAP Cloud ERP Consultant and deals with the capabilities of extending SAP applications to meet custom business requirements and integrating with other systems or services. The focus is on knowing when to extend standard functionality and how to ensure smooth system integration in a cloud context.
Topic 3	<ul style="list-style-type: none">• System Landscapes and Identity Access Management: This section of the exam measures skills of SAP Cloud ERP Consultant and involves understanding SAP's system landscape in the cloud, including tenants and environments. It also focuses on identity and access management, covering how user roles, permissions, and security are managed across the cloud ecosystem.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q32-Q37):

NEW QUESTION # 32

Through which component do you access your assigned process tasks from the SAP Activate Roadmap of SAP S/4HANA Cloud Public Edition (3-system landscape)?

- A. SAP Cloud ALM for Service
- B. SAP Central Business Configuration
- C. SAP Cloud ALM for Implementation
- D. SAP Cloud ALM for Operations

Answer: C

Explanation:

SAP Cloud ALM for Implementation is the component that provides access to the SAP Activate Roadmap of SAP S/4HANA Cloud Public Edition (3-system landscape). The SAP Activate Roadmap is a tool that guides the implementation project team through the phases, deliverables, tasks, and accelerators related to the SAP Activate methodology. The SAP Activate Roadmap is updated frequently to reflect the latest scope, processes, and best practices for SAP S/4HANA Cloud Public Edition. The SAP Cloud ALM for Implementation component also enables the project team to monitor the progress, status, and quality of the implementation project. NEW QUESTION # 33

Which tools does SAP provide to make it easier for customers to maintain their SAP S/4HANA Cloud systems after a release upgrade? Note: There are 2 correct answers to this question.

- A. Test Automation Tool
- B. SAP Signavio Process Navigator Tool
- C. Release Assessment and Scope Dependency Tool
- D. What's New Viewer Tool

Answer: A,B

NEW QUESTION # 34

Which of the following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf?

Note: There are 2 correct answers to this question.

- A. Data marked for deletion is picked for execution.
- **B. The test process failed the execution pre-check.**
- C. The process steps have been reordered.
- **D. An execution variant has not been maintained.**

Answer: B,D

Explanation:

The following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

* An execution variant has not been maintained: An execution variant is a set of test data that is used to execute a test process. It contains the input values and expected results for each test step. If an execution variant is not maintained for a test process, the system cannot run the test automatically and will skip it¹.

* The test process failed the execution pre-check: The execution pre-check is a validation that is performed before the test execution to ensure that the test process and the execution variant are consistent and complete. If the execution pre-check fails, it means that there are some issues or gaps in the test process or the execution variant that need to be resolved before the test can be run².

The following would not prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

* Data marked for deletion is picked for execution: Data marked for deletion is data that is no longer relevant or valid for the test process. It can be marked for deletion by the customer or by SAP. However, this does not affect the test execution, as the system will ignore the data marked for deletion and use the available data for the test process³.

* The process steps have been reordered: The process steps are the individual actions that are performed as part of the test process. They can be reordered by the customer or by SAP to reflect the changes in the business process or the user interface. However, this does not affect the test execution, as the system will follow the order of the process steps as defined in the test process⁴.

NEW QUESTION # 35

What have SAP S/4HANA Cloud Business Workflows been designed for? Note: There are 3 correct answers to this question.

- A. To create very simple release or approval procedures
- **B. To create business processes with a high number of people involved in a pre-defined sequence**
- C. To create standard procedures from SAP Signavio Process Navigator
- **D. To create complex, repeated work processes with iterative cycles**
- **E. To create cross-product workflow procedures**

Answer: B,D,E

Explanation:

SAP S/4HANA Cloud Business Workflows are designed to enhance and automate business processes within the organization. They serve multiple purposes:

* To create complex, repeated work processes with iterative cycles: These workflows are designed to handle intricate processes that occur regularly within the business environment, allowing for automation and efficiency in tasks that require repetition and involve multiple steps or conditions.

* To create cross-product workflow procedures: This capability allows for the integration of various SAP products and services into a cohesive workflow, ensuring smooth and interconnected operations across different aspects of the business. It enables workflows that span across different SAP applications and solutions, providing a unified approach to managing business processes.

* To create business processes with a high number of people involved in a pre-defined sequence: SAP S/4HANA Cloud Business Workflows are capable of handling processes that involve many participants, orchestrating the sequence of tasks to be completed by different individuals or departments. This ensures that each step of the process is executed in the right order by the right person, enhancing collaboration and efficiency.

NEW QUESTION # 36

What must you create when you build an integration scenario using the SAP Fiori Communication Management apps in SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. Communication interface
- **B. Communication arrangement**
- **C. Communication system**
- D. Communication API

Answer: B,C

Explanation:

When you build an integration scenario using the SAP Fiori Communication Management apps in SAP S/4HANA Cloud Public Edition, you must create a communication system and a communication arrangement.

A communication system represents the communication partner within a communication, such as the system that calls or provides services. A communication arrangement defines the settings for a specific communication scenario, such as the authentication method, the communication user, and the service URL.

You can use the Communication Systems app and the Communication Arrangements app to create and manage these objects in the SAP Fiori launchpad.
