

Reliable HPE7-A11 Exam Preparation | HPE7-A11 Certified Questions

Preparation from reliable material is essential to get success in the real HPE Network Campus Access Professional Architect Exam (HPE7-A11) exam. One of the most crucial aspects of test preparation is relying on HP HPE7-A11 exam dumps. The authenticity of HPE Network Campus Access Professional Architect Exam (HPE7-A11) exam questions material plays a huge role in achieving a passing score. In the case of choosing, HPE Network Campus Access Professional Architect Exam (HPE7-A11) exam dumps outdated material, and one fails and loses resources. TestValid is committed to providing real HPE7-A11 Questions, ensuring that applicants get success in a short time.

Solutions is one of the top platforms that has been helping HPE Network Campus Access Professional Architect Exam exam candidates for many years. Over this long time period countless candidates have passed their dream HPE Network Campus Access Professional Architect Exam (HPE7-A11) certification exam. They all got help from Exams. Solutions HPE7-A11 Practice Questions and easily passed their exam. The HP HPE7-A11 exam questions are designed by experience and qualified HPE7-A11 certification expert.

HPE7-A11 Certified Questions, HPE7-A11 Test Simulator Online

As job seekers looking for the turning point of their lives, it is widely known that the workers of recruitment is like choosing apples--viewing resumes is liking picking up apples, employers can decide whether candidates are qualified by the HPE7-A11

appearances, or in other words, candidates' educational background and relating HPE7-A11 professional skills. Knowledge about a person and is indispensable in recruitment. That is to say, for those who are without good educational background, only by paying efforts to get an acknowledged HPE7-A11 Certification, can they become popular employees. So for you, the HPE7-A11 latest braindumps compiled by our company can offer you the best help.

HPE Network Campus Access Professional Architect Exam Sample Questions (Q73-Q78):

NEW QUESTION # 73

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge. The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use. The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client decided that wired headless devices would be authenticated using Mac Authentication and would have RADIUS attributes sent back to the NAD to assign VLAN and port access parameters to the authentication session on the switch port. What would be critical in making this a successful deployment? (Select two.)

- A. ClearPass
- B. DHCP
- C. Mobility Gateway
- D. Airwave

Answer: A,B

Explanation:

For a successful deployment of MAC Authentication with RADIUS attributes for VLAN and port access parameters, ClearPass is critical. ClearPass Policy Manager offers advanced network access control, policy management, and is capable of handling MAC Authentication effectively. It can communicate with the Network Access Devices (NADs) to apply the correct access policies based on RADIUS attributes received during the authentication process. DHCP is also crucial in this setup for dynamically assigning IP addresses to authenticated devices, ensuring that they can connect to the network with the appropriate network settings. Together, ClearPass and DHCP services form the backbone of a secure, manageable, and dynamically segmented network infrastructure, ensuring devices are authenticated and receive the correct network configuration.

NEW QUESTION # 74

Drag and Drop Question

You are going with a 3-tier design and need to calculate the oversubscription ratio on the Access, Distribution, Core, and ToR Layer. What is a suitable oversubscription ratio for each layer?

Answer:

Explanation:

NEW QUESTION # 75

What is the simple difference between a main distribution framework (MDF) closet and an intermediate distribution framework (IDF) closet?

- A. MDF is the point where traffic egresses the campus network, and IDFs distribute that connectivity throughout the building.
- B. MDF is a term used in Europe whereas the Americas refer to all network closets as IDFs in their documentation.
- C. MDFs always have larger rooms than IDFs.
- D. MDFs only connect to other MDFs, and IDFs only connect to other IDFs.

Answer: A

Explanation:

In network design, the Main Distribution Frame (MDF) and Intermediate Distribution Frame (IDF) are critical components of the network infrastructure. The MDF is the primary hub of the network, often where services from outside the campus or building enter and get distributed. It acts as a central point for network distribution. On the other hand, IDFs are secondary hubs situated throughout the building or campus, extending connectivity provided by the MDF to various endpoints or areas within the building. The simple difference between them lies in their roles within the network infrastructure: the MDF serves as the main point of network ingress and egress, while IDFs are used to further distribute the network to specific locations or floors within the building.

NEW QUESTION # 76

ACME retail has 38 locations spread out across five US states and two provinces in Canada.

They are looking to grow 20% over the next two years. They have an HQ with a staff of 200 employees. The organization has eight Regional Managers and two VPs who work from home and the road. Stores typically have 17 employees on average per location. The two warehouses have a remote loading system and 20 employees each to load the trucks and fulfill the online orders. The warehouse has 40-foot ceilings and large metal racks to store inventory. The main location is 240K sq ft (22300 sq m) and the Canadian warehouse is 130K sq ft (12100 sq m). The forklifts on the loading docks are equipped with a wireless tablet on board. A typical store is reportedly about 60,000 sq ft (5575 sq m) and smaller stores are planned at 25,000 sq ft (2320 sq m). The locations need to expand the abilities to vendors that need to add setup displays or interactive kiosks in the stores. The current infrastructure was installed in 2015 and used wireless N technology in a coverage model. The wiring is Cat5, and they are unsure of the fiber connections. The inventory is all placed on the floor when it is delivered to the local store. Inventory control is handled through Zebra barcode scanners, and they have had a lot of issues in getting signals throughout the stores and this makes monthly inventory difficult. The organization has a small help desk to troubleshoot issues that happen at the retail locations and PC support for the office. The company is looking to upgrade away from the current PBX system later this year. With the need to grow and cut costs, they are interested in moving the data to the cloud but need to get almost real-time inventory control for the online service to function.

The network has all been wired over the last ten years, but with the new systems being all wireless, they have seen the trend to offer wireless to all the vendors for their needs but also would be to allow employees, guests, and contractors all to use it. With the new IT director starting next week, the project has been set by the CTO of the company. The marketing group has asked how they can interact with the customers and get more info, while the IT support desk needs to cut staff in half.

The office has an MDF and two IDFs located on floors one and two. The MDF is in the basement, and you have multiple WAN circuits for the HQ links. Each store has a local handoff from the cable company (ethernet) in the middle of the store in the office, so distance for the wiring is not an issue.

The customer has budget concerns but does want something that could last 7+ years.

The customer would like to host all the applications at the HQ Data Center.

Which design would meet the customer's requirements?

- A. UXI Sensors
- B. Instant OS access points
- C. SD-Branch Architecture
- D. 10000 switch with Pensando
- E. HPE Comware switches

Answer: C

Explanation:

For ACME Retail, which aims to host all applications at the HO Data Center and has multiple locations spread across different geographical areas, the Aruba SD-Branch Architecture would be the most suitable design to meet their requirements. This architecture provides a simplified, integrated branch networking solution combining SD-WAN, LAN, and security features. It enables centralized management and control, allowing ACME Retail to efficiently route traffic from branch locations to the HO Data Center, ensuring secure and reliable access to applications. The SD- Branch solution can accommodate the company's growth and adapt to changing network demands, making it an ideal choice for a scalable and flexible network infrastructure that supports ACME Retail's business objectives.

NEW QUESTION # 77

You meet with a customer to update the network when the previous network manager has left the company for another position.

What are some of the methods to validate the current network state when the available network documentation is not valid?

(Choose two.)

- A. Documenting existing network configuration and topology is not required because previous iterations of network designs

are considered obsolete.

- B. Begin searching through file shares for old documentation and compare the files and drawings to each other.
- C. Use neighbor discovery protocols to learn neighbor relationships, document the connections, and build a topology from the learned information.
- D. Interview random company staff to gather the 'tribal knowledge' of how the network functions during normal operations and during degraded states.
- E. Physically examine the network devices to hand over hand validate the connections from device- to-device documenting the connections and cabling type if possible.

Answer: C,E

Explanation:

Physically inspecting devices provides accurate, ground-truth validation of cabling and interconnections, while using neighbor discovery protocols (LLDP/CDP) allows you to map switch adjacencies and reconstruct an accurate topology when documentation is outdated or missing.

NEW QUESTION # 78

.....

We provide you with high-quality HPE7-A11 learning materials for you, since the experienced experts compile and verify HPE7-A11 learning materials, therefore the quality and the correctness can be guaranteed. By using HPE7-A11 exam dumps of us, you will get a certificate successfully, hence you can enter a good enterprise and your salary will also be improved. At the same time, if you choose HPE7-A11 Learning Materials of us, we have complete online and offline service stuff and after-service, and you can consult us anytime.

HPE7-A11 Certified Questions: <https://www.testvalid.com/HPE7-A11-exam-collection.html>

HP Reliable HPE7-A11 Exam Preparation From the demo, you can know about the format of each version and decide which format is suitable for you, HP Reliable HPE7-A11 Exam Preparation So let us take a look of them respectively, HP Reliable HPE7-A11 Exam Preparation You will not be affected by the unable state of the whole network, HP Reliable HPE7-A11 Exam Preparation For the convenience of the Exams candidates, the difficult portions of the syllabus have been explained with the help of experts to be simplified.

Despite the best intentions of everyone involved, Latest HPE7-A11 Cram Materials the process leads to higher traffic, higher bounce rates and lower engagement rates, Therefore, if you truly use our HPE7-A11 Exam Guide Materials, you will more opportunities to enter into big companies.

Experience Important Features with TestValid HPE7-A11 Exam Questions

From the demo, you can know about the format of each version and decide which HPE7-A11 Test Simulator Online format is suitable for you, So let us take a look of them respectively, You will not be affected by the unable state of the whole network.

For the convenience of the Exams candidates, HPE7-A11 the difficult portions of the syllabus have been explained with the help of experts to be simplified, To meet this objective the TestValid is offering HP HPE7-A11 practice exam questions with top-rated features.
