NEW QUESTION # 12
Lizzy, an analyst, wants to recognize the level of risks to the organization so as to plan countermeasures against cyber attacks. She used a threat modelling methodology where she performed the following stages:
Stage 1: Build asset-based threat profiles
Stage 2: Identify infrastructure vulnerabilities
Stage 3: Develop security strategy and plans
Which of the following threat modelling methodologies was used by Lizzy in the aforementioned scenario?

- A. TRIKE
- B. VAST
- C. DREAD

- D. OCTAVE

Answer: D

Explanation:
The threat modeling methodology employed by Lizzy, which involves building asset-based threat profiles, identifying infrastructure vulnerabilities, and developing security strategies and plans, aligns with the OCTAVE (Operationally Critical Threat, Asset, and Vulnerability Evaluation) methodology. OCTAVE focuses on organizational risk and security practices, emphasizing self-directed risk assessments to identify and prioritize threats to organizational assets and develop appropriate security strategies and plans. This methodology is asset-driven and revolves around understanding critical assets, identifying threats to those assets, and assessing vulnerabilities, leading to the development of a comprehensive security strategy.References:

NEW QUESTION # 13
The cybersecurity team seeks to enhance its threat hunting capabilities in a large enterprise. They plan to search systematically and proactively for adversaries within their networks. What type of threat hunting approaches are they most likely to adopt, involving predefined processes, methodologies, and frameworks for their investigation?

- A. Entity-driven threat hunting
- B. Unstructured threat hunting
- C. Situational threat hunting
- D. Structured threat hunting

Answer: D

Explanation:
Structured Threat Hunting uses predefined methodologies, frameworks, and processes to conduct proactive searches for adversaries within networks.
This approach relies on:
* Established frameworks like MITRE ATT&CK or Diamond Model.
* Standardized investigation workflows.
* Defined hypotheses and repeatable steps for analysis.
It ensures consistency and repeatability in the organization's hunting efforts.
Why the Other Options Are Incorrect:
* A. Situational threat hunting: Focuses on specific incidents or triggers rather than predefined methodologies.
* C. Entity-driven threat hunting: Centers on specific users, hosts, or IP addresses based on observed indicators.
* D. Unstructured threat hunting: Ad-hoc and experience-driven, lacking standardized methods.
Conclusion:
The team is using Structured Threat Hunting, which employs standardized frameworks and processes.
Final Answer: B. Structured threat hunting
Explanation Reference (Based on CTIA Study Concepts):
Structured hunting is described in CTIA as a systematic, framework-based approach that uses defined methodologies for consistent and effective investigations.

NEW QUESTION # 14
ABC is a well-established cyber-security company in the United States. The organization implemented the automation of tasks such as data enrichment and indicator aggregation. They also joined various communities to increase their knowledge about the emerging threats. However, the security teams can only detect and prevent identified threats in a reactive approach.
Based on threat intelligence maturity model, identify the level of ABC to know the stage at which the organization stands with its security and vulnerabilities.

- A. Level 1: preparing for CTI
- B. Level 3: CTI program in place
- C. Level 0: vague where to start
- D. Level 2: increasing CTI capabilities

Answer: B

Explanation:
ABC cyber-security company, which has implemented automation for tasks such as data enrichment and indicator aggregation and has joined various communities to increase knowledge about emerging threats, is demonstrating characteristics of a Level 3 maturity in the threat intelligence maturity model. At this level, organizations have a formal Cyber Threat Intelligence (CTI) program in place, with processes and tools implemented to collect, analyze, and integrate threat intelligence into their security operations. Although they may still be reactive in detecting and preventing threats, the existence of structured CTI capabilities indicates a more developed stage of threat intelligence maturity.References:
