For your satisfaction, LatestCram gives you a free demo download facility. You can test the features and then place an order.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q47-Q52):

NEW QUESTION # 47

Which percentage of Chrome is recommended during Beta before general availability'?

- A. 5%
- B. 10%

- C. 2%
- D. 1%

Answer: A

Explanation:

While the exact percentage isn't explicitly stated in the provided material, industry best practices for software deployment, including browser updates, recommend testing in a Beta environment with a representative but limited subset of users before a full rollout. A common recommendation for Beta testing is around 5% of the user base. This provides sufficient feedback and issue detection without impacting the majority of users.

NEW QUESTION # 48

An organization using Chrome browser on Windows has policies from group policy and Chrome Enterprise Core. In what order are the policies applied?

- A. From least restrictive to most restrictive
- **B. By the precedence hierarchy**
- C. Cloud policy takes precedence
- D. Group policy takes precedence

Answer: B

Explanation:

When both Group Policy (local machine policy) and Chrome Enterprise Core (cloud policy) are configured on a Windows device, the effective policy is determined by a defined order of precedence. Generally, cloud policies for managed browsers will override conflicting local policies. The specific precedence order is configurable, but it follows a hierarchical structure where certain policy sources take priority over others.

Options C and D present a simplified view that might not always be the case depending on the configuration.

Option B is a general principle of conflict resolution but doesn't describe the specific order in Chrome policy application.

NEW QUESTION # 49

The browser administrators at a company have configured the following extension policies:

Policy Name | Policy Value

----- | -----

```
ExtensionInstallAllowlist | [ "lpbdmiphcndhhacbfegbdmnoffaepiici",
"ghagpmigmndpbjkmolikibogefcm", "enebfjnlbicamdncnfhaapucdmkj",
"hpkimhnadcdidjaejaegpeeikllochd", "bnpillbeaniprjdcnkiahniegbcobanno" ]
ExtensionInstallBlocklist | [ ]
ExtensionInstallForceList | [ "ghagpmigmndpbjkmolikibogefcm;[https://clients2.google.com/service
/update2/crx](https://clients2.google.com/service/update2/crx)", "ufninibicajhgibfhjcgimlmdhccodfl;
[https://clients2.google.com/service/update2/crx](https://clients2.google.com/service/update2/crx)",
"hpkimhnadcdidjaejaegpeeikllochd;[https://clients2.google.com/service/update2/crx](https://clients2.google.
com/service/update2/crx)" ]
```

An employee at the company wants to install an extension from the Chrome Web Store called "Grammar Friend" with the extension ID `ufninibicajhgibfhjcgimlmdhccodfl`. What will happen when the user goes to the Grammar Friend page in the Chrome Web Store?

- A. The "Add to Chrome" button will be available to click, and the user can install the extension.
- B. A red banner that says "Your administrator has blocked this item (ID ufninibicajhgibfhjcgimlmdhccodfl)" will appear, and the "Add to Chrome" button will be grayed out.
- C. The "Remove from Chrome" button will be available because the extension is already installed.
- **D. A blue banner that says "This item's installation is required by your organization" will appear, and the "Remove from Chrome" button will be grayed out.**

Answer: D

Explanation:

The extension ID `ufninibicajhgibfhjcgimlmdhccodfl` is present in the `ExtensionInstallForceList`.

Extensions in this list are automatically installed and cannot be removed by the user. Therefore, when the user visits the Chrome Web Store page for "Grammar Friend," they will see a blue banner indicating that the extension is required by their organization, and the

"Remove from Chrome" button will be disabled. The "Add to Chrome" button will not be clickable in the standard way because it's already being force-installed.

NEW QUESTION # 50

To reduce risk, an organization is required to maintain a minimum Chrome browser version. The organization allows updates but finds that not all browsers are within one major version of the stable release.

Which policy option would help an admin enforce Chrome browser updates to the latest major stable version via automatic updates?

- A. Auto-update check period
- B. Rollback to target version
- C. Relaunch notification
- D. Component updates

Answer: A

Explanation:

While not directly stating "enforce to the latest major stable version," the "Auto-update check period" policy, when configured appropriately (shorter intervals), ensures that devices check for and apply updates more frequently. This increases the likelihood of browsers reaching and staying closer to the latest stable version over time. "Rollback to target version" is for reverting updates, "Component updates" manages specific browser components, and "Relaunch notification" prompts users to restart after an update.

NEW QUESTION # 51

An organization has Chrome set to auto-update. The security team runs a compliance report from Chrome Enterprise Core and notices that some rarely used machines are showing an old version of Chrome. However, when an engineer logs in to these PCs and checks Chrome directly, the correct updated version appears. What is the most likely reason for this discrepancy?

- A. The display version does not update until Chrome is launched
- B. Network setting is blocking the unattended auto-update check
- C. The machine has a different version of Chrome installed that is not managed via auto update
- D. The auto-update feature is malfunctioning and not updating Chrome until it is launched

Answer: A

Explanation:

The most likely reason for this discrepancy is that the version reported in the Chrome Enterprise Core compliance report might not be updated in real-time until Chrome is actively running and checks in. When an engineer logs in and launches Chrome, it likely completes the update process and reports the correct version.

The auto-update feature generally works in the background, and a completely different unmanaged version (option C) or a persistent network block (option D) would likely prevent updates even when Chrome is launched. A malfunctioning auto-update (option A) is less likely to resolve itself upon manual launch.

NEW QUESTION # 52

.....

To give you an idea about the top features of LatestCram Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) exam questions, a free demo of LatestCram Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) exam dumps is being offered free of cost.
