

SC-200 Latest Test Preparation | SC-200 PDF

Microsoft SC-200 Real Exam Questions - Clear Your Exam Quickly on First Attempt

To earn the Security Operations Analyst Associate SC-200 certification, it is vital to have the latest study material from a reliable source. Luckily, you can get actual SC-200 Questions from Pass4Success at affordable rates. Microsoft Security Operations Analyst SC-200 exam questions are updated according to the current SC-200 exam content by a team of experts. Pass4Success offers Microsoft Security Operations Analyst SC-200 real pdf that are based on the actual SC-200 exam scenarios. Accurate SC-200 questions are provided in three accessible formats which are desktop practice test software, Microsoft SC-200 PDF dumps, and Security Operations Analyst Associate SC-200 web-based practice exam software.

Information about Microsoft SC-200 Exam:

Vendor:	Microsoft
Exam Code:	SC-200
Exam Name:	Microsoft Security Operations Analyst
Number of Questions:	138
Certification Name:	Security Operations Analyst Associate
Exam Language:	English
Promo Code For SC-200 Questions:	Save25

Overcome Exam Fear with Microsoft SC-200 Desktop Practice Test Software

The Pass4Success practice test is quite similar to the real exam. And candidates feel like attempting the actual SC-200 exam questions while taking the Microsoft Security Operations Analyst SC-200 practice test. You can tailor types of Microsoft Certification Exams Questions and the time of the Security Operations Analyst Associate SC-200 practice exam to match your learning needs. Efficient

P.S. Free & New SC-200 dumps are available on Google Drive shared by Pass4Test: <https://drive.google.com/open?id=1w9dnONjSB7JsataqKmHUUfBgyXw2X1P>

Our SC-200 exam training material is organized by high experienced IT workers. Our IT elite team offer new version of SC-200 Exam real questions gradually, which aims to ensure examinees pass SC-200 test in one time.

Microsoft SC-200 Exam is an important certification for security professionals who work with Microsoft technologies. Achieving this certification demonstrates a strong understanding of security operations and the ability to implement effective security measures in a Microsoft environment. With the increasing demand for skilled security professionals, this certification can help boost career opportunities and salary potential.

Latest Updated Microsoft SC-200 Latest Test Preparation: Microsoft Security Operations Analyst | SC-200 PDF

Obtaining the SC-200 certificate will make your colleagues and supervisors stand out for you, because it represents your professional skills. At the same time, it will also give you more opportunities for promotion and job-hopping. The SC-200 latest exam dumps have different classifications for different qualification examinations, which can enable students to choose their own learning mode for themselves according to the actual needs of users. On buses or subways, you can use fractional time to test your learning outcomes with SC-200 Test Torrent, which will greatly increase your pro forma efficiency.

Microsoft Security Operations Analyst Sample Questions (Q348-Q353):

NEW QUESTION # 348

You have an Azure subscription that has Azure Defender enabled for all supported resource types.

You create an Azure logic app named LA1.

You plan to use LA1 to automatically remediate security risks detected in Defenders for Cloud.

You need to test LA1 in Defender for Cloud.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 349

Hotspot Question

You have a Microsoft 365 subscription that uses Microsoft Purview and contains a Microsoft SharePoint Online site named Site1. Site1 contains the files shown in the following table.

Name	Author
File1.docx	User1
File2.docx	User2
File3.xlsx	User3

From Microsoft Purview, you create the content search queries shown in the following table.

Name	Query
Search1	Author:"User1" FileExtension:xlsx
Search2	Author:"User*" and FileExtension:*
Search3	Author?("User1..3")

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

- | Statements | Yes | No |
|----------------------------|-----------------------|-----------------------|
| Search1 will return File3. | <input type="radio"/> | <input type="radio"/> |
| Search2 will return File1. | <input type="radio"/> | <input type="radio"/> |
| Search3 will return File2. | <input type="radio"/> | <input type="radio"/> |

Answer:

Explanation:

Answer Area

Statements

Yes No

Search1 will return File3.

Search2 will return File1.

Search3 will return File2.

NEW QUESTION # 350

You have an on-premises datacenter that contains a custom web app named App1. App1 uses Active Directory Domain Services (AD DS) authentication and is accessible by using Microsoft Entra application proxy.

You have a Microsoft 365 E5 subscription that uses Microsoft Defender XDR.

You receive an alert that a user downloaded highly confidential documents.

You need to remediate the risk associated with the alert by requiring multi-factor authentication (MFA) when users use App1 to initiate the download of documents that have a Highly Confidential sensitivity label applied.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft

For App1 to require MFA, use:

- Microsoft Entra ID Protection
- Conditional Access
- Microsoft Entra Domain Services
- Microsoft Entra ID Protection

To implement a session policy, use:

- Microsoft Defender for Office 365
- Microsoft Defender for Cloud Apps
- Microsoft Defender for Identity
- Microsoft Defender for Office 365

Answer:

Explanation:

Answer Area

Microsoft

For App1 to require MFA, use:

- Microsoft Entra ID Protection
- Conditional Access
- Microsoft Entra Domain Services
- Microsoft Entra ID Protection

To implement a session policy, use:

- Microsoft Defender for Office 365
- Microsoft Defender for Cloud Apps
- Microsoft Defender for Identity
- Microsoft Defender for Office 365

Explanation:

Answer Area

Microsoft

For App1 to require MFA, use: Microsoft Entra ID Protection

To implement a session policy, use: Microsoft Defender for Office 365

In this scenario, App1 is a custom web app published through Microsoft Entra Application Proxy and authenticated using Active

Directory Domain Services (AD DS) . Because it's integrated with Microsoft Entra ID (formerly Azure AD) for access control, the most appropriate and supported way to require MFA for users accessing the application is through Conditional Access .

Microsoft Entra Conditional Access policies evaluate user sign-in conditions such as risk level, device compliance, location, and sensitivity of data before granting access. Specifically, Microsoft's documentation states:

"Conditional Access policies allow administrators to require multi-factor authentication, block access, or enforce specific controls such as app protection or session policies for cloud and on-premises applications integrated with Microsoft Entra ID." Therefore, to make MFA mandatory for users accessing App1, a Conditional Access policy must be created targeting that application.

For the second part, to implement a session policy that controls or monitors user behavior (such as downloading highly confidential documents), the correct choice is Microsoft Defender for Cloud Apps (MDA) . Microsoft's official guidance says:

"Session policies in Microsoft Defender for Cloud Apps provide real-time session controls that enable administrators to monitor and restrict user activity in cloud apps, including download, cut/copy, and upload actions based on sensitivity labels or user risk." These session policies integrate seamlessly with Conditional Access via the "Use Conditional Access App Control" setting to apply continuous access evaluation during a user's session.

Hence, the correct verified configuration is:

* Require MFA: Conditional Access

* Implement session policy: Microsoft Defender for Cloud Apps

NEW QUESTION # 351

You have an Azure subscription.

You need to delegate permissions to meet the following requirements:

* Enable and disable advanced features of Microsoft Defender for Cloud.

* Apply security recommendations to a resource.

The solution must use the principle of least privilege.

Which Microsoft Defender for Cloud role should you use for each requirement? To answer, drag the appropriate roles to the correct requirements. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Roles

- Resource Group Owner
- Security Admin
- Subscription Contributor
- Subscription Owner

Answer Area

Enable and disable advanced features of Microsoft Defender for Cloud:

Apply security recommendations to a resource:

Answer:

Explanation:

Roles

- Resource Group Owner
- Security Admin
- Subscription Contributor
- Subscription Owner

Answer Area

Enable and disable advanced features of Microsoft Defender for Cloud: Security Admin

Apply security recommendations to a resource: Subscription Contributor

Explanation:

Roles

- Resource Group Owner
- Security Admin
- Subscription Contributor
- Subscription Owner

Answer Area

Enable and disable advanced features of Microsoft Defender for Cloud: Security Admin

Apply security recommendations to a resource: Subscription Contributor

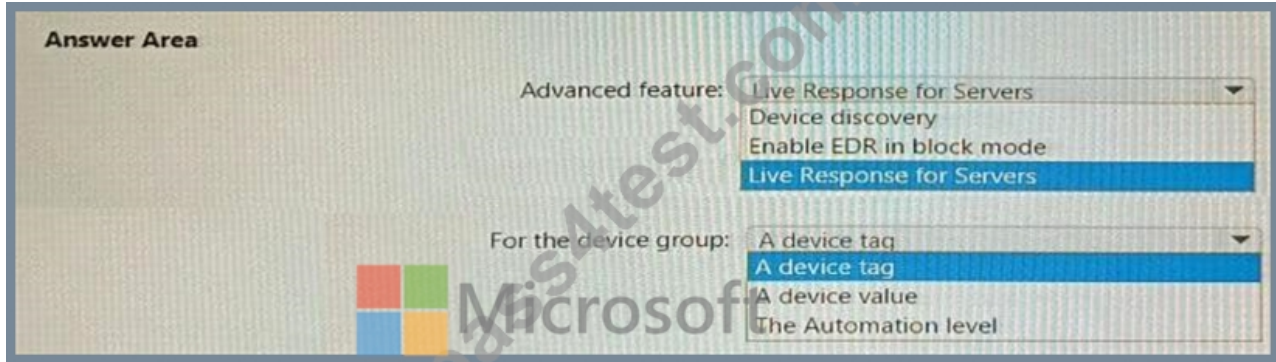

NEW QUESTION # 352

You have a Microsoft 365 E5 subscription that uses Microsoft 365 Defender for Endpoint.

You need to ensure that you can initiate remote shell connections to Windows servers by using the Microsoft 365 Defender portal.

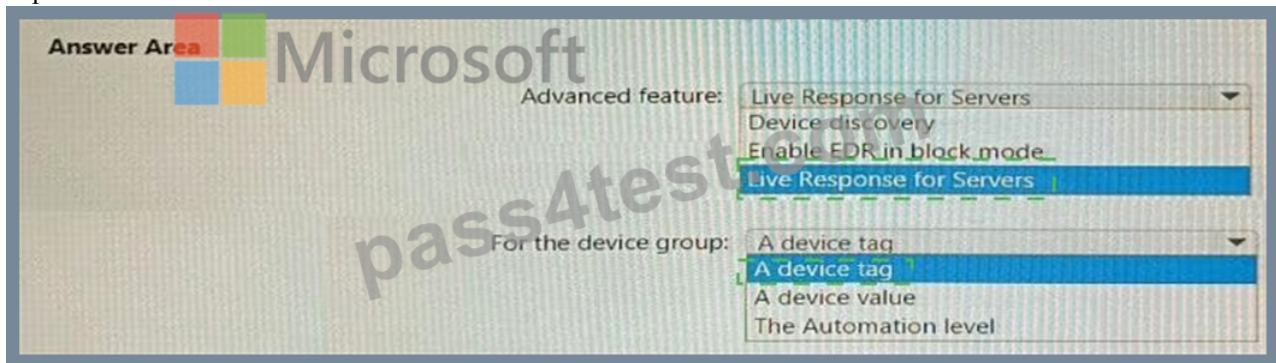

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

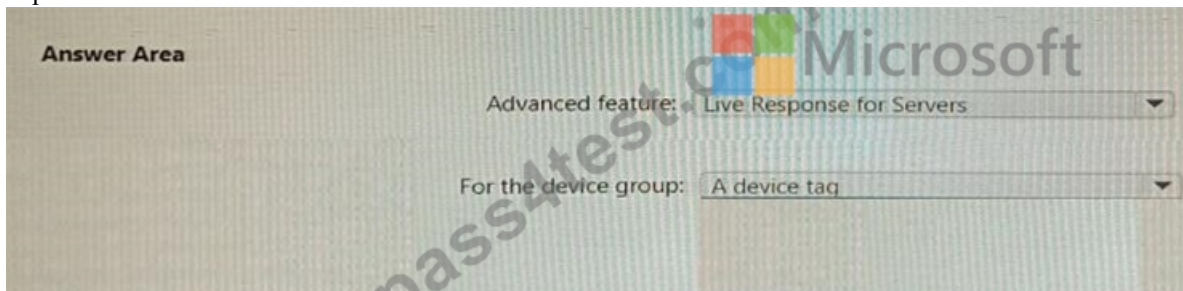

Answer:

Explanation:

Explanation:

In Microsoft Defender for Endpoint , the Live Response feature enables security analysts to remotely connect to devices (including servers) via a secure shell session directly from the Microsoft 365 Defender portal . This feature allows real-time investigation, evidence collection, and remediation commands without requiring direct network access to the device.

To enable this capability for Windows servers , you must first enable the "Live Response for Servers" advanced feature within Defender for Endpoint settings. Microsoft's documentation explicitly states that this setting allows remote shell access to onboarded Windows Server devices, which is disabled by default for security reasons.

Once the advanced feature is enabled, Live Response permissions and functionality are managed at the device group level. Device groups in Defender for Endpoint are typically configured using device tags , which classify and organize endpoints (e.g., by department, OS type, or role). Tag-based grouping allows administrators to apply policies or features (like Live Response) efficiently to specific sets of devices, such as only production servers.

Alternative options such as "Automation level" or "device value" are unrelated - automation level controls auto-remediation, while device value assigns importance for alert prioritization.

Thus, the correct configuration steps are:

- * Enable Live Response for Servers under advanced features.
- * Apply the configuration to the target device group identified by a device tag .

Final Answer:

- * Advanced feature: Live Response for Servers
- * For the device group: A device tag

NEW QUESTION # 353

.....

Our to-the-point and trustworthy Microsoft SC-200 Exam Questions in three formats for the Microsoft SC-200 certification exam will surely assist you to qualify for Microsoft Security Operations Analyst certification. Do not underestimate the value of our Microsoft SC-200 Exam Dumps because it is the make-or-break point of your career.
