

Get a 30% Special Discount on SolarWinds SCP-NPM Exam Dumps

What's more, part of that Exam-Killer SCP-NPM dumps now are free: https://drive.google.com/open?id=1QIGZwKpLs6LE9IFwRD6rKk_5W9VuWUJ2

If you are wandering for SCP-NPM study material and the reliable platform that will lead you to success in exam, then stop considering this issue. Exam-Killer is the solution to your problem. They offer you reliable and updated SCP-NPM exam questions. The exam questions are duly designed by the team of subject matter experts; they are highly experienced and trained in developing exam material. Exam-Killer offers a 100% money back guarantee, in case you fail in your SCP-NPM. You claim revert, by showing your transcript and undergoing through the clearance process. Also, we provide 24/7 customer service to all our valued customers. Our dedicated team will answer all your queries related to SCP-NPM.

These SolarWinds Network Performance Monitor (NPM) Exam (SCP-NPM) practice test covers all the topics of the SCP-NPM test and includes real SCP-NPM questions. If you are attempting the SCP-NPM examination for the first time, you will get an exact idea about the SCP-NPM exam and how you can clear it with flying colors. These SolarWinds SCP-NPM Questions are available in desktop SCP-NPM practice exam software, web-based SCP-NPM practice test, and SolarWinds Network Performance Monitor (NPM) Exam (SCP-NPM) dumps pdf format.

Confused About Where to Start Your SolarWinds SCP-NPM Exam Preparation? Here's What You Need to Know

Our SCP-NPM Test Braindumps boost high hit rate and can stimulate the exam to let you have a good preparation for the exam. Our SCP-NPM prep torrent boost the timing function and the content is easy to be understood and has been simplified the important information. Our SCP-NPM test braindumps convey more important information with less amount of answers and questions and thus make the learning relaxed and efficient. If you fail in the exam we will refund you immediately. All SolarWinds Network Performance Monitor (NPM) Exam exam torrent does a lot of help for you to pass the exam easily and successfully.

SolarWinds SCP-NPM (SolarWinds Network Performance Monitor) Certification Exam is an essential certification for IT professionals who want to demonstrate their expertise in managing and optimizing network performance. SCP-NPM exam covers a

wide range of topics related to network performance monitoring, and it is available online from anywhere in the world. IT professionals who hold the SCP-NPM Certification are in high demand, and they are often able to command higher salaries and more job opportunities than their non-certified peers.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q37-Q42):

NEW QUESTION # 37

How do you prevent alerts when an interface is down, without influencing the status of the parent node?

- A. Select Unmanage Now in the parent node's Maintenance Mode drop-down
- B. Add a dependency with the node as the parent object, and the interface as the child
- C. Add a dependency with the interface as the parent object, and the interface as the child
- D. Select Display Interface as Unplugged Rather Than Down in the Node Management view

Answer: D

Explanation:

If you do not want to be notified when an interface is down, you can specify that the interface is unpluggable. The interface status is not reflected in the status of the parent node and in alerts. On the Node Management view, select the interface, and click Edit Properties. Select Display Interface as Unplugged Rather Than Down, and click Submit. The interface status does not influence the status of the parent node¹. Reference:

Suspend collecting data for interfaces in NPM - SolarWinds (see the Set the interface status as Unpluggable section)

NEW QUESTION # 38

What is required of your nodes to detect duplex mismatches? (Choose all that apply.)

- A. Duplex of both devices must be identified as full or half
- B. Ensure corresponding values for each interface are different
- C. Unify the duplex mode configuration on neighboring interfaces
- D. The nodes must support topology and be interconnected

Answer: A,C,D

Explanation:

To detect duplex mismatches, you need to meet the following requirements¹:

The nodes must be monitored by NPM.

The nodes must be in the up state during the discovery.

The nodes must support topology and be interconnected.

Duplex of both devices must be identified as full or half.

The Possible Duplex Mismatches widget must be enabled on the node details view.

You do not need to ensure corresponding values for each interface are different, as this is the result of a duplex mismatch, not a requirement for detection. In fact, you should unify the duplex mode configuration on neighboring interfaces to avoid mismatches¹.

NEW QUESTION # 39

Users report that email is slow. The Exchange team reports that everything is normal on the mail servers. What NPM statistic can you look at to find what might be causing the issue?

- A. Mail queue length on the Exchange server
- B. Server component monitor status
- C. SMTP service on the Exchange server
- D. Network bandwidth utilization

Answer: D

Explanation:

NPM can monitor the network bandwidth utilization of your devices, interfaces, and applications using SNMP and NetFlow protocols. Network bandwidth utilization is the amount of data transmitted or received over a network link in a given time period.

High network bandwidth utilization can indicate network congestion, packet loss, latency, or other performance issues that can affect

the email delivery speed. By looking at the network bandwidth utilization of the devices and interfaces involved in the email communication, you can identify the possible bottlenecks or sources of network problems that might be causing the email slowness. References: Monitor network bandwidth utilization in NPM, Network Bandwidth Analyzer Pack, How to Monitor Network Bandwidth Using the Command Line.

NEW QUESTION # 40

Retention policies require you to keep Syslog messages in the database for 9 days before you can discard them. Syslog messages from 8 days ago are missing. What is likely the issue?

- A. Detailed records are summarized after seven days
- B. Database compaction runs weekly
- C. Default Syslog retention period is seven days
- D. Default Syslog web filter is seven days

Answer: C

NEW QUESTION # 41

Which items can you display in Web Console maps?

- A. Monitored nodes and network links
- B. Quarks, gluons, Leptons, nodes, and network links
- C. Interfaces, volumes, and database instances
- D. Monitored nodes, interfaces and volumes, SAM applications and components, and network links

Answer: D

Explanation:

Web Console maps are interactive and dynamic maps that you can create and customize using the Orion Maps feature in the SolarWinds Platform Web Console. You can display various items on the maps, such as monitored nodes, interfaces and volumes, SAM applications and components, and network links. You can also add custom labels, annotations, and images to the maps. Web Console maps can help you visualize the relationships and dependencies among your network devices and applications, as well as troubleshoot issues and identify root causes.
