Choose COBIT-2019 test guide to get you closer to success!

### ISACA COBIT 2019 Foundation Sample Questions (Q96-Q101):

#### NEW QUESTION # 96

An enterprise plans to outsource all of its noncore IT operations but wants to ensure the proper level of governance, risk and compliance (GRC) controls. Which of the following governance and management objectives would provide the MOST relevant management practices for the enterprise?

- A. AP013 Managed Security
- B. AP012 Managed Risk
- C. APO10 Managed Vendors
- **D. APO09 Managed Service Agreements**

**Answer: D**

Explanation:

According to the ISACA COBIT 2019 Framework, the objective APO09 Managed Service Agreements provides the most relevant management practices for an enterprise that plans to outsource all its non-core IT operations but wants to ensure the proper level of governance, risk, and compliance (GRC) controls. This is specified in Domain 4, Objective 4.5: "Manage the acquisition and maintenance of IT-related assets". The APO09 objective provides guidance on how to manage service agreements with vendors, including the proper management of risks and compliance with related regulations and standards. Additionally, APO09 provides guidance on the proper selection and management of service providers, and how to ensure that the service agreements are properly monitored and evaluated to ensure the expected quality of service.

#### NEW QUESTION # 97

Within a tailored enterprise governance system, a sourcing model for information and technology is associated with:

- A. relevant industry frameworks.
- **B. design factors.**
- C. focus areas.

**Answer: B**

Explanation:

Design factors can influence the blueprint of your enterprise's governance system and position it for the successful use of I&T.

#### NEW QUESTION # 98

In Phase 1 of the COBIT implementation approach, which of the following should be used to outline executive management's desire for change within the enterprise?

- **A. Business case**
- B. Balanced scorecard
- C. Risk assessment

**Answer: A**

Explanation:

Phase 1 of the COBIT implementation approach focuses on recognizing the need for change and initiating the program. A critical

component of this phase is articulating executive management ' s desire and rationale for change within the enterprise. The most effective tool for this purpose is the development of a " Business case.

"

\* Business Case: This document serves as a formal justification for undertaking a change initiative. It outlines the strategic alignment of the proposed change with enterprise goals, the expected benefits, costs, potential risks, and the overall impact on the organization. By presenting a well-structured business case, executive management can communicate the necessity and anticipated value of the change, securing stakeholder buy-in and guiding decision-making processes.

Option A, " Balanced scorecard, " is a strategic planning and management tool used to monitor organizational performance against strategic goals. While valuable for performance measurement, it is not specifically designed to convey the impetus for change.

Option B, " Risk assessment, " involves identifying and evaluating potential risks that could impact the organization. Although understanding risks is essential, a risk assessment does not comprehensively capture the executive management ' s motivation and justification for change.

Therefore, in Phase 1 of the COBIT implementation approach, a " Business case " is the appropriate instrument to outline executive management ' s desire for change within the enterprise.

### NEW QUESTION # 99

Which of the following is an enterprise goal according to COBIT?

- A. Business service continuity and availability
- B. Managed IT-related risks
- C. IT compliance with internal policies

**Answer: A**

### NEW QUESTION # 100

The number of focus areas describing a certain governance topic or issue that can be addressed by governance objectives is:

- A. determined by the size of the enterprise
- B. dependent on process maturity
- C. virtually unlimited

**Answer: C**

Explanation:

The number of focus areas describing a certain governance topic or issue that can be addressed by governance objectives is virtually unlimited. Focus areas are topics or issues that can be addressed by governance objectives, such as digital transformation, cybersecurity, privacy, etc. Focus areas can be defined by any stakeholder or group within or outside the enterprise, depending on their needs and interests. COBIT provides examples of some common focus areas, but they are not exhaustive or prescriptive.13
