The PL-400 exam measures a candidate's ability to design, develop, secure, and troubleshoot Power Platform solutions. It includes various topics such as creating and customizing model-driven apps, designing and developing canvas apps, creating and managing Power Automate workflows, creating and managing chatbots with Power Virtual Agents, and integrating Power BI with other Power Platform services. Passing the PL-400 Exam demonstrates that a candidate has the necessary skills and knowledge to create and customize business solutions with Microsoft Power Platform, making them a valuable asset to any organization looking to leverage these powerful tools.

Microsoft Power Platform Developer Sample Questions (Q38-Q43):

NEW QUESTION # 38

You need to configure a connector for the driving record verification API.

How should you configure the system? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

Explanation:

☐

NEW QUESTION # 39

You open a canvas app in edit mode. A warning message displays as shown in the graphic.

☐

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

NEW QUESTION # 40

You deploy a Power Platform plug-in to a production environment. The plug-in code contains detailed tracing information. You are a member of the Environment Maker security role for the environment.

Users report unexpected results when they interact with confidential data by using the plug-in. You confirm that the plug-in works without errors in a development environment.

You need to investigate the root cause of the plug-in errors.

What should you do?

- **A. Install Plug-in profiler in the production environment by using the Plug-in Registration tool.**
- B. Send a GET request to retrieve the plugintracelogs records.
- C. Send a PUT request to enable plug-in tracing for the production environment.
- D. Reproduce and capture the errors, then debug from Visual Studio.

Answer: A

Explanation:

Plug-in profiler is a solution that you can install on your environment that enables you to capture the execution context of a plug-in and then use that data to re-play the event within Visual Studio while debugging.

There are two tools available from which to run the Plug-in Profiler:

the Plug-in Registration Tool and Power Platform Tools for Visual Studio.

NEW QUESTION # 41

You need to ensure data returned from the Web API corresponds to the correct environment. What should you use?

- A. plug-in secure configurations
- B. records in a new configuration table
- C. system settings
- D. environment variables

Answer: D

NEW QUESTION # 42

A company has a model-driven app.

A custom button on a form calls a JavaScript function that validates form data fields and creates a web basket.

The JavaScript function then displays a message to the user.

Users are located in the United States, which uses ISO Code 1033, and France, which uses ISO Code 1036.

Users in France report that the message displays in English.

You need to modify the RibbonDiffXml file to ensure that messages appear in the user's language.

How should you complete the CommandDefinition node? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Explanation:

Box 1: CrmParameter

In addition to data values, you can retrieve client context information by using <CrmParameter>. You can use the following options as the value for the CrmParameter element: OrgName, OrgLcid, and UserLcid.

Box 2: UserLcid

userLCID is the language code of the current user.

Note: A locale is a set of user preference information related to the user's language. The locale determines how dates, times, currencies, and numbers are formatted, how items are alphabetically sorted, and how strings are compared. The locale identifier (LCID) is a 32-bit value that uniquely defines a locale.
