

# Exam Questions for the Peoplecert DevOps-Foundation Exam 2026 - Pass Easily

BTW, DOWNLOAD part of ActualVCE DevOps-Foundation dumps from Cloud Storage: [https://drive.google.com/open?id=1k\\_BvEM-slx\\_PHU1mydsfjrbEBeYEBLUW](https://drive.google.com/open?id=1k_BvEM-slx_PHU1mydsfjrbEBeYEBLUW)

Peoplecert DevOps-Foundation exams play a significant role to verify skills, experience, and knowledge in a specific technology. Enrollment in the PeopleCert DevOps Foundationv3.6Exam DevOps-Foundation is open to everyone. Upon completion of PeopleCert DevOps Foundationv3.6Exam DevOps-Foundation Exam Questions' particular criteria. Participants in the DevOps-Foundation Dumps come from all over the world and receive the credentials for the PeopleCert DevOps Foundationv3.6Exam DevOps-Foundation Questions. They can quickly advance their careers in the fiercely competitive market and benefit from certification after earning the DevOps-Foundation Questions badge.

This type of Peoplecert DevOps-Foundation actual exam simulation helps to calm your exam anxiety. Since the software keeps a record of your attempts, you can overcome mistakes before the Peoplecert DevOps-Foundation final exam attempt. Knowing the style of the Peoplecert DevOps-Foundation examination is a great help to pass the test and this feature is one of the perks you will get in the desktop practice exam software.

## 100% Free DevOps-Foundation – 100% Free New Exam Answers | Trustable PeopleCert DevOps Foundationv3.6Exam Training Questions

With so many online resources, knowing where to start when preparing for an Peoplecert DevOps-Foundation exam can be tough. But with Peoplecert DevOps-Foundation practice test, you can be confident you're getting the best possible Peoplecert DevOps-Foundation Exam Dumps. Peoplecert exam mirrors the Peoplecert DevOps-Foundation exam-taking experience, so you know what to expect on Peoplecert DevOps-Foundation exam day.

### Peoplecert DevOps-Foundation Exam Syllabus Topics:

| Topic | Details |
|-------|---------|
|       |         |

|         |   |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"> <li>• <b>Business and Technology Frameworks:</b> This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.</li> </ul> |
| Topic 2 | <ul style="list-style-type: none"> <li>• <b>Sharing, Shadowing and Evolving:</b> This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.</li> </ul>   |
| Topic 3 | <ul style="list-style-type: none"> <li>• <b>Core DevOps Principles:</b> This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.</li> </ul>  |
| Topic 4 | <ul style="list-style-type: none"> <li>• <b>Measurement, Metrics, and Reporting:</b> This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.</li> </ul>  |

## Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q77-Q82):

### NEW QUESTION # 77

Which of the following is NOT a reason business is interested in DevOps?

- A. Customers value outcomes, not products
- B. Intelligent data must drive direction quickly
- C. IoT is rapidly increasing
- **D. DevOps must automate all the things**

**Answer: D**

Explanation:

Businesses are drawn to DevOps because it improves agility, responsiveness, and quality.

\* A: The growth of IoT requires scalable, automated, and reliable delivery processes.

\* B: Fast, intelligent decision-making is needed to respond to market changes.

\* D: The shift toward valuing customer outcomes over products is central to modern service delivery.

However, C is a misconception. While automation is a key DevOps practice, the goal is strategic automation- automating where it adds measurable value, improves quality, or accelerates delivery. "Automate all the things" without consideration can waste resources, increase complexity, and reduce adaptability.

### NEW QUESTION # 78

Which of the following is an example of a "shift left" testing strategy?

- **A. Unit testing as part of continuous integration**
- B. Testing in production
- C. Manual testing
- D. Biannual vulnerability assessments of live systems

**Answer: A**

Explanation:

Shift Left Testing means moving testing earlier in the development process, so defects are found sooner and fixes are cheaper. Unit testing as part of CI is the classic "shift left" strategy: automated unit tests run with every code change, catching errors before code moves further down the pipeline.

\* Testing in production (A) is "shift right."

\* Manual testing (B) is typically late-stage and not automated.

\* Biannual vulnerability assessments (D) are after-the-fact and far from "shift left." Extract-style reference:

"Shift left means performing testing activities earlier, for example by including unit tests in the CI process, reducing costly late-stage defects."

-DevOps Handbook

PeopleCert Foundation: "Shift left" is a key DevOps testing principle-find issues fast, fix fast, deploy safely.

### NEW QUESTION # 79

How do shortened feedback loops PRIMARILY improve IT's performance?

- A. They ensure a faster flow between Dev and Ops
- B. They encourage learning and experimentation
- C. They create a value stream map
- D. They help to create and share knowledge when needed

**Answer: A**

Explanation:

According to PeopleCert DevOps Foundation v3.6, the Second Way of DevOps focuses on creating and amplifying feedback loops. The primary purpose of shortening these loops is to accelerate the flow of work and information between all stages of the delivery pipeline, especially between Development and Operations.

When feedback loops are short, defects, performance issues, and risks can be identified and resolved earlier in the process, preventing costly delays and large-scale rework. This supports faster, safer releases and improves the organization's responsiveness to customer needs.

While A (learning) and D (knowledge sharing) are important benefits of feedback loops, they are secondary outcomes. The main, direct effect is improving flow efficiency—ensuring that handoffs between Dev and Ops happen smoothly, quickly, and with higher quality. Option C (value stream mapping) is a useful Lean practice to identify delays and bottlenecks, but it is a diagnostic tool, not the primary improvement gained from shortening feedback loops.

Thus, the correct answer is B—shortened feedback loops primarily improve IT performance by ensuring faster flow between Development and Operations.

### NEW QUESTION # 80

Agile funding can be \_\_\_\_\_

- A. Fixed cost
- B. Continuous cost
- C. All of the Above
- D. Reviewed frequently

**Answer: C**

Explanation:

Agile funding is flexible and adapts to the iterative, incremental nature of Agile and DevOps projects.

It can be fixed cost for some work, continuous cost for ongoing value streams, and is reviewed frequently to align with evolving priorities.

All three characteristics are true, so D ("All of the Above") is correct.

Extract-style reference:

"Agile funding models support continuous review and adaptation, providing the flexibility required for digital transformation and DevOps ways of working."

- Project to Product, Mik Kersten

PeopleCert DevOps Foundation v3.6: Advocates funding models that encourage agility, experimentation, and rapid value delivery.

## NEW QUESTION # 81

Firmly entrenched silos and a combative relationship between Dev and Ops is an example of:

- A. Poor leadership
- B. Low trust
- C. Change fatigue
- **D. Cultural debt**

**Answer: D**

Explanation:

Cultural debt-not just low trust or poor leadership-best describes the scenario of entrenched silos and combative Dev/Ops relations.

\* Cultural debt leads to resistance to new ways of working, lack of cooperation, and a focus on individual rather than collective success.

Why not the others?

\* Low trust and poor leadership are symptoms of cultural debt.

\* Change fatigue occurs after repeated failed initiatives; here, the core issue is cultural stasis.

Reference/Extract:

"DevOps transformation often fails without addressing cultural debt. Breaking down silos, building shared understanding, and changing incentives are essential for sustainable change."

-DevOps Handbook, State of DevOps Report, PeopleCert DevOps Foundation v3.6 Section 3.4

## NEW QUESTION # 82

.....

Owing to our high-quality DevOps-Foundation real dump and high passing rate, our company has been developing faster and faster and gain good reputation in the world. Our education experts are adept at designing and researching exam questions and answers of DevOps-Foundation study materials. What's more, we can always get latest information resource. Our high passing rate is the leading position in this field. We are the best choice for candidates who are eager to Pass DevOps-Foundation Exam and acquire the certification.
