Although the passing rate of our CCFA-200b Study Materials is close to 100 %, if you are still worried, we can give you another guarantee: if you don't pass the exam, you can get a full refund. Yes, this is the truth.

CrowdStrike Falcon Administrator Sample Questions (Q121-Q126):

NEW QUESTION # 121
Which statement is TRUE regarding disabling detections on a host?

- A. Hosts with detections disabled will not alert on blocklisted hashes or machine learning detections, but will still alert on IOA-based detections. It will remain that way until detections are enabled again
- B. Hosts cannot have their detections disabled individually
- C. Hosts with detections disabled will not alert on anything until detections are enabled again
- D. Hosts with detections disabled will not alert on anything for 24 hours (by default) or longer if that setting is changed

Answer: C

Explanation:
The statement that is true regarding disabling detections on a host is that hosts with detections disabled will not alert on anything until detections are enabled again. As explained in question

127, disabling detections for a host will stop the sensor from sending any detection or prevention events to the Falcon console, and remove any existing events for that host from the console. This means that the host will not alert on anything, including blocklisted hashes, machine learning detections, or indicator of attack (IOA)-based detections. The host will remain in this state until detections are enabled again.

NEW QUESTION # 122
What may prevent a user from logging into Falcon via single sign-on (SSO)?

- A. Falcon is in reduced functionality mode
- B. The user never configured their security questions
- C. The maintenance token has expired
- D. The SSO username doesn't match their email address in Falcon

Answer: D

Explanation:
The option that may prevent a user from logging into Falcon via single sign-on (SSO) is that the SSO username doesn't match their email address in Falcon. SSO is a feature that allows you to use an external identity provider (IdP) to authenticate and authorize users to access the Falcon platform. SSO simplifies and streamlines the login process, as users only need to remember one set of credentials for multiple applications. However, SSO requires that the username in the IdP matches the email address in Falcon for each user. If there is a mismatch between the username and the email address, the user will not be able to log into Falcon via SSO.

NEW QUESTION # 123
Which of the following policies allowlist network traffic even while a host is Network Contained?

- A. Containment Policy
- B. Response Policy
- C. IP Allowlist Policy
- D. Firewall Policy

Answer: C

NEW QUESTION # 124
Which of the following would give you information about inactive sensors within the Falcon console?

- A. Sensor Update Policies
- B. Sensor Coverage Lookup
- C. Sensor Health
- D. Sensor Downloads

Answer: C

NEW QUESTION # 125
Which option best describes the general process for a manual installation of the Falcon Sensor on MacOS?

- A. Grant the Falcon package Full Disk Access, install the Falcon package, use falconctl to license the sensor
- B. Install the Falcon package passing it the installation token in the command line
- C. Install the Falcon package, use falconctl to license the sensor, approve the system extension, grant the sensor Full Disk Access
- D. Grant the Falcon package Full Disk Access, install the Falcon package, load the Falcon Sensor with the command 'falconctl stats'

Answer: C

NEW QUESTION # 126

......

The paper materials students buy on the market are often not able to reuse. After all the exercises have been done once, if you want to do it again you will need to buy it again. But with CCFA-200b test question, you will not have this problem. All customers who purchased CCFA-200b Study Tool can use the learning materials without restrictions, and there is no case of duplicate charges. For the PDF version of CCFA-200b test question, you can print multiple times, practice multiple times, and repeatedly reinforce your unfamiliar knowledge.
