Updated Exam JN0-105 Learning offer you accurate Exam Exercise | Junos, Associate (JNCIA-Junos)

Our JN0-105 guide questions boost many advantages and varied functions. You can have a free download and tryout of our JN0-105 exam questions before the purchase and our purchase procedures are easy and fast. You can receive our JN0-105 exam questions in a few minutes and we provide 3 versions for you to choose. You need little time to learn the JN0-105 Exam Torrent and prepare the exam. Our passing rate and the hit rate is very high. After you pass the JN0-105 exam you will gain a lot of benefits

such as enter in the big company and double your wage.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q87-Q92):

NEW QUESTION # 87

You received a new Junos device and are configuring the system-related settings. You must configure this device for the current date and time on the US West coast. You have set the time zone to America

/Los_Angeles, however the time and date did not change.

In this scenario, which two additional actions would satisfy this requirement? (Choose two.)

- **A. Configure an NTP server.**
- B. Reboot the device.
- **C. Set the date and time setting manually.**
- D. Configure a DNS server.

Answer: A,C

Explanation:

When configuring the system-related settings for the current date and time on a Junos device, especially for a specific time zone like America/Los_Angeles, and the time does not automatically adjust, two effective actions can be taken. Firstly, setting the date and time manually allows for immediate correction of the system clock. This can be done via the CLI with the appropriate set date and time command. Secondly, configuring the device to use an NTP server can provide ongoing synchronization with an accurate time source, ensuring that the device maintains the correct time and date automatically in the future, even in the case of restarts or minor drifts in the internal clock.

NEW QUESTION # 88

What are two examples of exception traffic? (Choose two.)

- **A. log messages**
- B. transit packets
- C. ping to the local device
- **D. routing updates**

Answer: A,D

Explanation:

Exception traffic includes traffic that is not simply forwarded by the router but requires special handling, such as routing updates (B) and log messages (C). These types of traffic are processed by the router's control plane rather than just being forwarded through the data plane.

NEW QUESTION # 89

Which service does RADIUS provide?

- **A. authentication**
- B. routing
- C. DNS resolution
- D. time synchronization

Answer: A

Explanation:

RADIUS, which stands for Remote Authentication Dial-In User Service, provides authentication services for users trying to access a network. It is a networking protocol that provides centralized Authentication, Authorization, and Accounting (AAA) management for users who connect and use a network service.

NEW QUESTION # 90

Exhibit

```

{hold:node0} [edit]
root# set system root-authentication ?
Possible completions:
+ apply-groups Groups from which to inherit configuration data
+ apply-groups-except Don't inherit configuration data from these groups
encrypted-password Encrypted password string
load-key-file File (URL) containing one or more ssh keys
plain-text-password Prompt for plain text password (autoencrypted)
> ssh-dsa Secure shell (ssh) DSA public key string
> ssh-rsa Secure shell (ssh) RSA public key string
{hold:node0} [edit]
root# set system root-authentication plain-text-password
New password:
Retype new password:
{hold:node0} [edit]
root# commit and-quit
[edit interfaces]
'ge-0/0/0'
HA management port cannot be configured
error: configuration check-out failed
{hold:node0} [edit]
root#
You are unable to remotely access your Juniper device using the CLI.
Referring to the exhibit, which command would you add to the existing configuration to enable remote CLI access?

```

- A. set system root-authentication plain-text-password
- **B. set system services ssh**
- C. set system login idle-timeout 20
- D. load factory-default

Answer: B

Explanation:

In Junos OS, remote access to the device's CLI is commonly facilitated through Secure Shell (SSH), a protocol providing secure command-line access over an insecure network. The given exhibit indicates an attempt to set a root authentication password but does not show configuration for enabling remote access services. To enable SSH, which is not shown in the configuration snippet, you need to configure the device to accept SSH connections. This is done by enabling the SSH service within the system services hierarchy of the configuration. The correct command to add to the existing configuration for enabling remote CLI access via SSH is set system services ssh. This command activates the SSH service, allowing secure remote logins to the device.

NEW QUESTION # 91

Click the Exhibit button.

```

user@router> show route

inet.0: 13 destinations, 14 routes (13 active, 0 holddown, 0
hidden)
+ = Active Route, - = Last Active, * = Both
0.0.0.0/0          * [Static/5] 00:05:38
                   to 172.29.1.1 via ge-0/0/3.0

```

JUNIPER
NETWORKS

Referring the exhibit, what does the highlighted number indicate?

- A. metric is 5
- B. hop count is 5
- C. cost is 5
- D. route preference is 5

Answer: D

Explanation:

In the exhibit shown, the highlighted number next to the route type (Static) within the square brackets indicates the route preference, also known as the administrative distance. In Junos, the route preference is a value that determines the priority of the route source. Lower numbers indicate a higher priority when the routing table is being calculated. The route preference is used to select the best route when multiple paths to the same destination exist from different routing sources. The number 5 is unusually low for a static route by default, suggesting it has been manually configured to override other route types.

NEW QUESTION # 92

.....

The valid updated, and real PassCollection JN0-105 questions and both practice test software are ready to download. Just take the best decision of your professional career and get registered in Junos, Associate (JNCIA-Junos) JN0-105 certification exam and start this journey with PassCollection JN0-105 Exam PDF dumps and practice test software. All types of Juniper JN0-105 Exam Questions formats are available at the affordable price.
