最新的 PMI Certification PMI-PMOCP 免費考試真題 (Q111-Q116):

問題 #111

A PMO professional notices that the project managers are not adhering to the established project management guidelines within the organization. What actions should the PMO professional take to address this issue effectively?

- A. Revise the current guidelines based on their knowledge and experience to ensure the guidelines are more practical.
- B. Escalate the issue to the project sponsors to enforce the project managers' adherence to the guidelines.
- C. Distribute updated manuals and provide additional project management training sessions to the project managers.
- **D. Conduct a survey with project managers to understand their challenges, then create a customized action plan to address the gaps.**

答案: D

解題說明:

Within the PMI-PMOCP Governance domain, the PMO professional's responsibility is to ensure compliance through understanding and collaboration rather than unilateral enforcement. When project managers are not following guidelines, the first step is to engage with them to understand the root causes of non-adherence. This can include process complexity, lack of awareness, or practical challenges.

Conducting a survey or assessment (Option D) aligns with best practices for continuous improvement and stakeholder engagement. It enables the PMO to tailor solutions—such as training, process adjustments, or communication improvements—based on actual feedback rather than assumptions.

Options A and B, though seemingly proactive, risk missing the real issues if implemented without input.

Revising guidelines without stakeholder consultation (Option A) can lead to ineffective or resisted changes.

Distributing manuals and training (Option B) is useful only if it addresses identified gaps. Escalating directly to sponsors (Option C) should be a last resort, as it may create resistance and harm relationships.

This approach is consistent with PMI's emphasis on governance through collaboration, communication, and continuous process improvement, as outlined in the PMO governance frameworks.

問題 #112

A PMO professional has been tasked with evolving the PMO's value proposition in a rapidly changing, capital-intensive industry that has been strongly impacted by new environmental, social, and governance (ESG) regulations. The organization's strategy emphasizes flexibility and innovation, but the PMO must also ensure compliance with these evolving requirements.

What should the PMO professional do when developing a PMO value proposition?

- A. Create a value proposition based on a recently launched PMO standard.
- B. Develop a value proposition that incorporates industry-specific requirements.
- C. Develop a value proposition that prioritizes financial metrics.
- **D. Create a value proposition aligned with the organization's strategic goals.**

答案: D

解題說明:

A PMO's value proposition must be aligned with the organization's overarching strategic goals, including the need for flexibility, innovation, and regulatory compliance. Option C encapsulates this alignment, ensuring that the PMO supports business priorities and evolving market requirements effectively.

Focusing solely on financial metrics (Option A) or on PMO standards (Option B) risks misalignment or being outdated. While industry-specific requirements (Option D) are important, they should be integrated into the broader strategic goals rather than forming the entire basis of the value proposition.

PMI emphasizes that a well-crafted PMO value proposition reflects strategic priorities to maximize organizational value.

問題 #113

A PMO software tool was introduced 6 months ago to give PMO customers a comprehensive portfolio overview. The PMO professional recently received feedback indicating that customers are having difficulty navigating the tool and locating the necessary dashboards.

What should the PMO professional have done to prevent this issue?

- A. Presented the benefits of the software to PMO customers across multiple communication channels.
- **B. Organized specific training sessions for PMO customers on how to use the software.**
- C. Surveyed PMO customers regarding the most valuable functions to implement in the software.
- D. Interviewed PMO customers regarding the dashboards they would use regularly.

答案: B

解題說明:

Introducing new tools requires proper change management practices including training and user enablement.

PMI-PMOCP emphasizes that PMO professionals must organize targeted training sessions to ensure users can effectively navigate and utilize new software.

Training reduces resistance, increases user adoption, and helps customers fully benefit from the tool's capabilities. While communicating benefits (option A), surveying functionality (option B), or interviewing users (option D) are useful steps, none replace the essential hands-on training required to build proficiency and confidence.

By proactively providing training, the PMO professional ensures smoother transitions, better tool utilization, and overall improved governance and portfolio reporting effectiveness.

問題 #114

In recent months, a company was contracted to deliver several projects requiring specialist technical resources. Several clients have begun to complain about the limited availability of the specialist technical resources, which will impact their project timelines.

What should the PMO professional do to help solve the problem?

- A. Invite project managers to hire additional skilled resources to face the high number of simultaneously running projects.
- B. Support delivery managers and sales representatives in managing relationships with clients.
- **C. Suggest the centralization of project resource management and align the project plans to their availability.**
- D. Request that the sales representatives review the contracts and deadlines that the company has taken responsibility for.

答案: C

問題 #115

The executive management team for a healthcare company is discussing the second quarter's low result in the customer satisfaction score, which is a key performance indicator (KPI). One of the executives shares concerns about wasting efforts on projects and initiatives without being able to keep up with competitors and increase the customer satisfaction score.

Which action should the PMO professional take to avoid such a situation?

- A. Ask to review the customer satisfaction metrics.
- B. Establish a customer experience department.
- **C. Support the reevaluation of the strategic plan by the executives.**
- D. Avoid the customer satisfaction metric analysis when assessing projects.

答案: C

解題說明:

To prevent misalignment of projects with strategic goals, the PMO professional should support the executive team in reevaluating the strategic plan to ensure projects directly contribute to critical KPIs like customer satisfaction.

Avoiding metric analysis (Option A) neglects insight. Reviewing metrics (Option C) is necessary but insufficient alone. Establishing new departments (Option D) may help but is a longer-term solution.

PMI-PMOCP Strategic Alignment focuses on aligning strategy and execution to optimize business outcomes.
