## C-ACDET-2506 New Braindumps | Valid C-ACDET-2506 Exam Guide

TestPDF SAP C-ACDET-2506 dumps contain required materials for the candidates. Once you purchase our products, all problems will be readily solved. You can try to use our free demo and download pdf real questions and answers before you make a decision. These exam simulations will help you to understand our products. Widespread scope and regularly update are the outstanding characteristic of TestPDF SAP C-ACDET-2506 braindump. By choosing it, all IT certifications are ok.

## SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q12-Q17):

### NEW QUESTION # 12

How can you set the order of your custom Contract Workspace fields? (Select 2 correct answers)

- A. Navigate to the UI where the class is presented, select Customize in the banner, edit, and drag and drop fields, then publish.
- B. Fields are presented in alphabetical order of the field label.
- C. Select Field Configuration and under the Advanced tab set the Sequence property, then publish.
- D. Select Field Configuration, find the class, and select the Layout tab. Drag and drop the order of the fields, then publish.

**Answer: C,D**

Explanation:

Custom Contract Workspace field order can be controlled through two methods:

\* Using the Layout tab in Field Configuration, where fields can be dragged and dropped to reorder them visually, followed by publishing the changes.

\* Using the Sequence property under the Advanced tab, assigning numeric values that define the sort order, with lower numbers appearing first. Option B is incorrect because UI banner customization does not manage field order in Contract Workspace screens. Option C is incorrect; field order is controlled by explicit settings, not alphabetical label order.

### NEW QUESTION # 13

Which of the following data elements must be manually loaded into the Production environment after full configuration migration is completed using the Intelligent Configuration Manager (ICM)? (Select 2 correct answers)

- A. Enumerations
- B. User to Group Mapping
- C. Relation and Relation Entries
- D. Units of Measure

**Answer: A,C**

Explanation:

After migrating configurations using ICM, Enumerations and Relation entries require manual loading into Production because they are not included in automatic migration bundles. Enumerations provide picklist values, while Relations define dependencies between fields. Units of Measure are typically part of standard configuration or migrated automatically. User to Group Mapping is managed separately through provisioning or identity management tools, not via ICM. Manual loading of these data elements ensures data integrity and avoids missing references.

### NEW QUESTION # 14

Users are able to publish a contract workspace without populating the Supplier field. What action can be performed on the Supplier field to force population before publishing?

- A. Enable Require value before publish
- B. Configure a validity condition
- C. Enable Required
- D. Configure a visibility condition

**Answer: A**

Explanation:

SAP Ariba provides a specific property in the Advanced tab called "Require value before publish", which ensures that a field must be populated prior to the contract workspace being published. Enabling this option on the Supplier field enforces this mandatory behavior during the publish action. The standard "Required" checkbox only enforces field completion in the UI during data entry but does not prevent publishing if the field is empty. Visibility conditions control whether the field is displayed, not whether it is required at publish. Validity conditions enforce value correctness but not presence at publish time. This feature enhances data completeness at critical lifecycle points.

### NEW QUESTION # 15

During verification in Production, a stakeholder reports that the imported form template appears outdated.

What could be a likely reason for this?

- A. The system automatically reverted the template to a previous version during import.
- B. The Production site is missing certain parameter settings.
- C. The Production site does not support custom form templates.
- **D. The Test site template was not the latest version when exported.**

**Answer: D**

Explanation:

If an imported form template appears outdated in Production, the most common cause is that the version exported from Test was not the latest published version. SAP Ariba's export/import process is version-specific; only the selected version at export time is moved. If the latest updates weren't published or exported, Production will receive an older version.

SAP does not auto-revert templates to previous versions during import, and missing parameter settings typically do not affect template versions. Production supports custom templates as long as metadata and versions align.

Proper version control, including publishing the latest template version in Test before export, is essential to avoid this issue.

#### **NEW QUESTION # 16**

What are the key characteristics of a Bluefield deployment scenario? (Select 2 correct answers)

- A. Many team members have a naive perception of deploying software solutions
- **B. The customer already has an SAP Ariba Strategic Sourcing suite solution deployed**
- C. The Test site has been configured using the SAP Bluefield template
- **D. The Production site may have live transactions**

**Answer: B,D**

Explanation:

A Bluefield deployment means the customer already has an SAP Ariba solution deployed (B), and the production system may be live with ongoing transactions (C). This requires careful, incremental migration to avoid disruption. There is no specific "Bluefield template" for test sites (D), and team perceptions (A) are irrelevant.

#### **NEW QUESTION # 17**

.....

If you want to get a desirable position and then achieve your career dream, you are at the right place now. Our C-ACDET-2506 Study Tool can help you pass the exam. So, don't hesitate, choose the C-ACDET-2506 test torrent and believe in us. Let's strive to our dreams together. Life is short for us, so we all should cherish our life. The C-ACDET-2506 test torrent can let users in a short time, accurately grasp the proposition trend of each year, doing all effects in the process of the difficulties in the hot, user's weak link and targeted training, and exercise the user's solving problem ability, eventually achieve the objectives of the pass SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite qualification test.
